

FAA Gives Approval To T&I Classes

The Federal Aviation Agency has given its full approval to FCC's aircraft mechanics program.

Robert P. Hansler, dean of the technical-industrial education division at FCC, said the approval is for the two year program in power plants and air frames and for one year courses in each specialty.

The agency revealed that the approval is for an indefinite period of time as long as FCC complies with the agency's regulations for training and certifying aircraft mechanics.

This school's aircraft power plant program began in the fall semester of 1958 and received the agency's approval. The instructor of the course is Shannon S. Smith.

The new agency action extends its approval to the air frame course, under the direction of Harmon W. Allen, which began last fall, and the joint power plant and air frame program.

To qualify for licenses, students must have a minimum of 1,650 hours of instruction during the two year program, 960 for a power plant mechanics license, and 650 for an air frame license. They must also pass an oral, practical and written examination.

The first FCC students to receive aircraft power plant mechanics licenses were Thomas V. Williams of Madera and William R. Kemper of Chowchilla.

Owner May Claim Lost School Ring

Anyone having friends from the 1959 graduating class at San Joaquin Memorial High School, please have them check for their class ring!

A man's gold ring with red set and the initials D. F. on it was found on Weldon Avenue Monday noon.

The owner may claim the ring by contacting the switchboard operator in the main Administration Building.

STUDENT BODY OFFICERS — The spring officers are left to right, David Hanna, president; Diane Nixon, vice president; Carrol Jacobsen, treasurer, and Linda Carol Miller, secretary.

Asiatic Flu Keeps 200 Students From School

It has been estimated that over 200 students are out of school from four to seven days because of the recent Asian flu epidemic in the area.

The estimate was made by Paul H. Starr, dean of men, and the school nurse, Nora Simpson. The Asian flu, which returns after a three year absence, is affecting most of the western states.

Miss Simpson said some of the symptoms the student should watch for are a low backache, aching muscles, sore throat and chills which are usually followed by a high temperature.

The beginning stages of the flu might not cause a temperature. Nevertheless, if the symptoms exist the patient should go directly to bed, warned Miss Simpson.

Besides an anti flu vaccine, the only other preventive is the student's own body resistance to the flu. Because of the shortages of the vaccine, doctors recommend that only persons with chronic sicknesses make use of it.

Miss Simpson said that once the student is down with the flu, he

should stick to a fluid diet: milk, soups and juices. A doctor should be consulted if the patient has trouble breathing.

The Asian flu, which is a relatively new type of influenza, might be as strong as it is now because of its three year absence, stated an article in a local newspaper. It also said that the Fresno hospitals are being taxed with pneumonia cases which developed from the primary stages of the Asian flu.

At present Fresno hospitals are not taking flu cases unless they have developed into pneumonia, which can happen if the student does not take the proper precautions.

"It has been noted that many of the students are returning to school before they have completely recovered," Simpson said. "To prevent this doctors recommend that the patient stay indoors at least one day after his temperature has reached normal."

Job Placement Includes Work For Summer

"It is a benefit to the college as well as to the student that each employee is well placed," said Gervase Eckenrod of the business placement office.

Eckenrod said that counseling for summer jobs will start April 15. Although the placement is slow now, the jobs will be filled early.

The first step in obtaining a job is to file an application form with the job placement office. Then an interview will be held. From these the type of job, the hours available and the need of the applicant will be determined.

The placement office receives job offers from business men, former students and from the state employment office. They are for both full and part time jobs.

FCC Students Elect David Hanna President

It's official — David Hanna is the Fresno City College spring student body president.

Because of a discrepancy of 15 more ballots cast than students registered in the first election, the student council declared the election null and void and called for another vote.

A new election committee was appointed by committee chairman Charles D. Young as some members of the first committee were election candidates. This is prohibited by the student body constitution.

The voting procedure was closely supervised, either by the student advisors, Miss Doris Deakins and Joseph W. King, or Young were present at the polls during the voting hours.

According to official election results only 365 students visited the polls in the second election as opposed to a record 466 in the first, but the results proved to be consistent. No changes were made, as those who won the first election emerged victorious.

Hanna, a sophomore journalism major, defeated Barbara Anderson in the presidential race 245 to 113. Diane Nixon was unopposed in her bid for vice-president. Linda Carol Miller again defeated Marge Neufeld for the office of secretary, and Carrol Jacobsen won the treasurer's position over Sidney Craighead.

Allen Graves was an unopposed candidate for the AMS presidency. Brenda Daum nosed out Virginia Collins for the office of AWS president, 69 to 61.

The ten candidates elected to the posts of representatives at large are Al Gray, Eric Radanovich, Roger Dupzyk, Jon Johnson, Douglas Webb, Tamra Koerner, Charles Overs, Jr., Rae Deane Pyatt, Linda Weddle and Lladona Miller.

FCC Gets Equipment In Surplus Sale

The technical and industrial division has just received two ton of electronics equipment.

The surplus electronics equipment was bought at a "one cent sale" held at the Sacramento Signal Depot. Robert P. Hansler, technical and industrial education dean, estimated that the equipment originally cost the navy \$100,000. Hansler paid \$38.60 for it at the sale.

Attending the sale with Hansler were Robert F. Winter, a science consultant with the city schools; Edward L. Reid, science teacher at Fresno High School; and James B. Dinsdale, electronics teacher at FCC.

Hansler stated that the electronics equipment was obtained for city wide usage which includes all junior high schools, senior high schools and FCC.

He also said that teachers who will mainly be using the equipment are James B. Dinsdale, Chester S. Garrison, and Gerald J. Fries, electronics teachers of the day classes, and Winston Moody and Joseph Hyrn, electronics teachers of the night classes.

CC Extends Registration

The deadline for preregistration at FCC has been extended from tomorrow until Jan. 29.

Archie Bradshaw, dean of students, said new students who have completed entrance examinations and filed admission applications and transcripts may see counselors next week during final examinations.

Bradshaw warned students who have not preregistered to do so at once, because 58 classes have been closed and late comers may find it hard to arrange their schedule as they wish.

Students who do not preregister this month will not be allowed to do so until Feb. 3. Preregistered students will finish registration Feb. 2 and 3. Classes will start Feb. 4.

The spring semester enrollment is expected to be about 200 less than the 4,100 who registered for the spring semester last year by school officials.

Officials expect the evening enrollment to remain the same as the 1,800 who attended last spring.

Bradshaw expects about 500 new day students and 1,600 returning students. This will make the total of 2,100 students which is expected.

English and mathematics placement examinations and college aptitude tests will be given at 8 AM, Jan. 27 and Feb. 1 and 2 in the FCC auditorium and at 7 PM Feb. 2 in Room 200 of McLane Hall.

Night students may enroll Monday through Thursday from 6:30 to 9:30 PM until Feb. 3.

Students Plan Music Recital

A piano and voice recital will be presented by FCC students from 7 to 10 PM, Jan. 27 in the FCC auditorium.

The recital will be presented by Lowell Spencer's first and second semester piano and voice students.

The program will include solos and duets from the advanced classes and representatives from the vocal classes.

Lee Rosemeyer, a student artist on the piano, will be featured. Rosemeyer will perform the Moonlight Sonata by Beethoven, Waltz in E Minor by Chopin and Prelude in C Minor by Rachmaninoff on the new grand piano recently acquired by FCC.

Spencer plans to have a recital of the piano and vocal students at the end of each semester.

"All students are encouraged to attend this program. We promise a real pleasant musical evening to all who attend," Spencer stated.

FINAL EXAMINATION SCHEDULE

Fall Semester 1959-60

Friday, Jan. 22

8-11 AM.....8-11 AM daily-shop classes
1-4 PM.....1-4 PM daily shop classes
8-9:50 AM.....8 AM MWF and daily classes
10-11:50 AM.....8 AM TTh classes
1-2:50 PM.....1 PM MWF and daily classes

Monday, Jan. 25

8-9:50 AM.....9 AM MWF and daily classes
10-11:50 AM.....9 AM TTh classes
1-2:50 PM.....2 PM MWF and daily classes

Tuesday, Jan. 26

8-9:50 AM.....10 AM MWF and daily classes

BUSINESS MANAGER.....MARGARET VILLALOBOS

Hanna Thanks All For Their Support

As newly elected student body president of Fresno City College, I would like to thank those who helped make this election one of the best in the college's history.

Many problems arose in the procedures of this election, but with proper application of knowledge learned through experience, steps can be taken to prevent such a thing from happening again.

To take the space here to thank all the people I should would be impossible — the Rampage just doesn't have that much space. These people know who they are, and to them I would like to extend my sincerest gratitude for all they have done. I especially would like to thank the Latin American and Alpha Gamma Sigma clubs for their support.

May I extend my best wishes to all for a happy and profitable spring semester.

David Hanna

Education In Spring Looks Toward Science

Since American education's answer to the Russian Sputnik is being concentrated in the four areas of science, mathematics, engineering, and foreign languages, Fresno City College officials announced the college will offer 126 classes in these fields during the spring semester.

President Stuart M. White said they will include 72 in science, 34 in mathematics, 12 in engineering, and eight in foreign languages. They also will include 105 day classes and 21 at night.

Sixty-five day sections in science will range from elementary botany to general zoology. They also will include courses in human anatomy, physiology, biology, chemistry, geology, physical science, and physics.

The seven night courses in science will be in botany, zoology, chemistry, physics, geology, and astronomy.

Many specialties will be included among 25 day sections in mathematics. These will range from elementary and intermediate algebra to trigonometry and several forms of calculus. They also will include plane and analytical geometry, mathematics for the elementary teacher, and slide rule manipulation and theory.

The nine night classes in mathematics will include elementary and intermediate algebra, trigonometry, calculus, plane geometry, and industrial mathematics.

Engineering will have nine day classes, including elementary plane surveying, engineering drawing, descriptive geometry, mechanisms, and statics. The three night classes in engineering will include surveying, drawing, and descriptive geometry.

Four foreign languages will be given in the spring semester; they are French, German, Spanish, and Russian. Day students will have six classes, including two each in Russian and Spanish and one each in French and German. Night students will have a Russian course and one in Spanish.

Welding Students Train For Industry

A student presses the trigger of the welding gun and four things happen simultaneously.

Electricity arcs from the electrode to the metal, creating an arc of 7,000 degrees fahrenheit.

Water circulates through the head of the welding gun to cool it.

An inert gas, argon, is passed through a nozzle in the head of the gun to protect the weld from nitrides, oxides, and other weakening elements in the atmosphere.

And a metal rod is either shot through the head of the gun or laid in place, depending upon which of the two new techniques are being used.

H. Dean Larsen, the welding instructor, said the processes just described are instrumental in our missile program and are used extensively in industry.

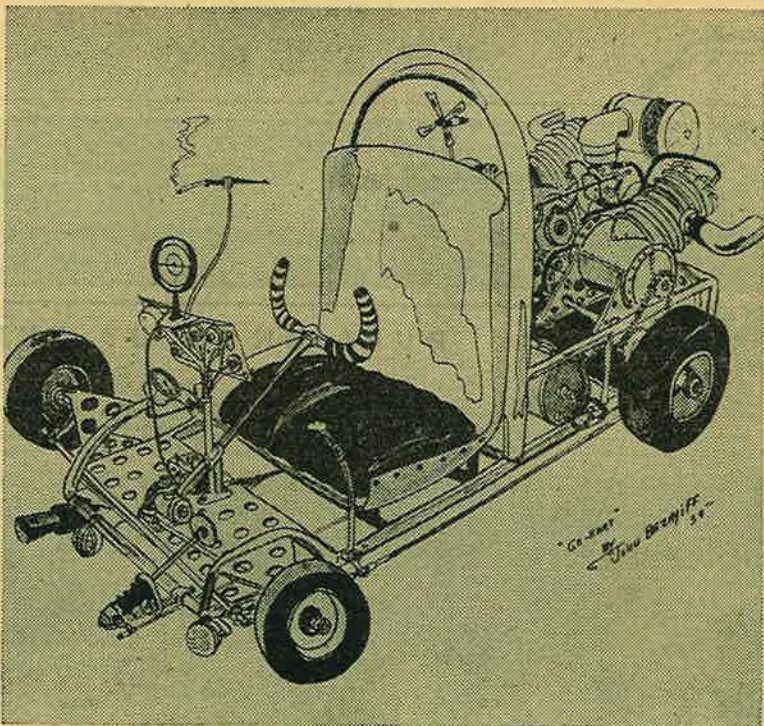

Larsen said that the vocational welding classes are equipped with two of these welders on which the students are trained.

It takes nearly two years to prepare a student for training in these advanced techniques of welding.

Larsen said the ultimate goal of the class is to train men to go into industry as advanced apprentices. Some have begun as journeymen.

The demand for personnel equipped with advanced and basic knowledge of welding far exceeds the supply, and job opportunities are unlimited, Larsen explained.

The new FCC shop, which is better equipped than the average shop, meets the needs very nicely.

Ready — Aim — Fire?

Four FCC Students Hail From Canal Zone

By ROBERT L. VOSS

The Panama Canal Zone is represented by four students at FCC. Oscar E. Townsend Jr., Luis Taylor Cox, Agnus Louisa Blades, and Eleanora McFarlane.

All four students graduated from Paraiso High School in the Panama Canal Zone. Agnes Blades won the "Most Popular" award at Paraiso High last year. Miss Blades, Miss McFarlane, and Cox are members of the International Club at FCC.

Each In First Semester

This is the first year at FCC for the Panamanian students. They wanted to see what California looked like and chose our college for their education.

Cox's adopted parents, Luis and Maria Cox live in Paraiso, Panama, which is on the Pacific side of the canal zone.

After graduating from high school Cox worked for the Panama Canal Company in the office of the comptroller, accounting division, as an accounting machine operator. Cox is majoring in accounting.

May Go Into Service

Townsend, an FCC business major, may go into military service after graduation. His parents, Oscar and Antoinette Townsend live in Gamboa. Townsend, Sr., is a seaman for the Panama Canal Company.

Miss McFarlane worked as a ward attendant at the Gorgas Hospital. She is majoring in recreational leadership and plans to go into welfare work after graduation.

Miss McFarlane's parents, Vincent and Edith McFarlane live in Gamboa.

Majoring In Accounting

Miss Blade is majoring in business accounting. Her parents, Ralph and Jenette Blade live in Gamboa. Her father does blue print work for the canal's engineering department.

Miss Blade said that Spanish is now the language used in the Panama Canal Zone schools. Until a few years ago English was used in the schools.

The students plan to return to Panama after graduation.

Library Books Are Due Next Week

All FCC library books are due Jan. 22. Students requiring books after this date may check them out overnight only.

Jackson Carty, head librarian, said the library will close Jan. 28 at 9:30 AM and re-open Feb. 4 for the spring semester.

Students having an unpaid fine or a lost book that has not been paid for should clear with the library so that their semester grades and records will not be held up by the main office.

What's New?

Two Intellectuals Face Our World

By ANDREW FEDERICO

"I tell you the universe is infinite," Sam Meadows said. "That can't be so," David Candles the III said.

The two of them were in the library whispering over a book about physical science. The library was quiet but it had many thunderous voices waiting to be listened to, voices which came from the books on the shelves along the wall.

Universe Is Expanding

"There's a prominent theory in existence that says the universe is either expanding or contracting," David Candles the III continued.

"That's a lot of whatyamacallit. The universe always was and always will be," Sam Meadows said.

"Don't be naive, Sam. There has got to be a beginning and an end to everything."

Lady Walks In

A young lady with long brown hair came in; her heels made a distinct sound, and one of her curls slipped out and seemed to wave goodbye at the two fellows with the universe problem.

"Do you mean to say that, like people, the universe is born and then dies?" Meadows asked.

"According to the theory I was telling you about, that's precisely right," Candles the III replied.

At the same time a seven-year-old girl named Charlotte was riding her bicycle down Kearney Boulevard. She was attracted by the palm trees, the homes along the sidewalk and the clouds which were darkening in the sky. As she went by Saint Alphonse's Catholic Church, she took her hands off the handle bars and did the sign of the cross.

A Pathetic Affair

"But there has got to be something more to it than that," Sam said, "things can't just always be — it doesn't seem right that they should. It sounds sort of sad and pathetic when you think about it like that."

Sam seemed anxious to say something, but he had difficulty getting it out.

Across town an old man stopped in front of a market that kept its vegetables on stands next to the sidewalk. For some reason the old man put his hand over the thin spray of wrater keeping the vegetables fresh.

"Look," Candles the III said, "this is where we all get struck, trying to explain that which we know nothing about. Words have not been invented yet to explain it. We understand what never was as clearly as we understand that which will always be — to no extent at all. But because we are not able to understand it, this doesn't mean that we should not think of it as something that could have been — at least until we are able to prove different."

"I just don't know," Sam said. "I really don't."

The library was still quiet, quiet except for the rubbing sound being made by a fellow wearing corduroy pants.

Club News

Latin-American Club Receives Top Award

By MARY GULKE

The Latin American Club was again, for the second consecutive semester, awarded the most outstanding campus club plaque and certificate of award. Florence Harper, Alpha Gamma Sigma representative, was awarded the most active Inter-Club Council member for her services in ICC.

Miss Harper and the LAC were chosen by the council from the candidates presented by the evaluation committee at the last ICC meeting on Jan. 14.

The candidates were determined by an evaluation system inaugurated by ICC last month for the sole purpose of awarding the most deserving club and ICC member these awards.

Under this system, points are given to clubs and ICC members for activities, services and projects completed during the semester. Before clubs can be given points, their activities must be entered on the Dean of Women's Calendar in A-118.

Freshman Class

The freshman class will hold a meeting Feb. 9 in the auditorium at noon to nominate officers for the spring semester.

The election of officers will be held Feb. 18 in the auditorium at noon, allowing only one week for campaigning.

Floyd Quick, freshman class sponsor, said he found this semester's officers very cooperative and enthusiastic in supporting the freshman class activities. He hopes next semester's officers will support the activities as well.

The main freshman sponsored activity of the spring semester will be the freshman class dance.

Ram Yearbook

Students who wish to purchase the Ram yearbooks have only a short while to do so before the price increases from \$2.50 to \$3.75 after Feb. 2.

Yearbooks can be purchased at the bookstore or in SC-212, the Ram office.

Zodiak Spells Trouble For USC Coed

Southern California's Daily Trojan reports an SC coed must have misinterpreted the signs of Zodiak last month. One Thursday the astrological stars said that it was a day favoring the go-getters.

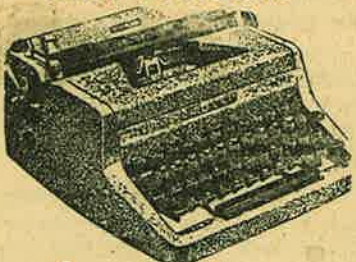

Judy Jones must not have realized this. When she parked her car in a student parking lot, she left the keys in the ignition, not wanting to stop other students from moving their cars in or out.

Someone, following the astrological advice to "make good use of smart ideas," moved Miss Jones' car right out of the lot and into oncoming Los Angeles traffic.

Perhaps Miss Jones wouldn't have been "so nice," as a local police officer put it, if she had read Fridays horoscope.

Friday's prediction for Miss Jones was "Avoid all risks."

Rampage Lists Several Openings For Spring

By JOHN CRIDER

Opportunities are available to all students who are interested in working on the Rampage next semester.

Philip D. Smith, FCC journalism instructor, said he would like to talk to any student who is interested in writing or non-writing work.

More openings exist in the writing field than the non-writing field. Anybody interested in writing should take the news writing and reporting class next semester. It is not necessary for the student to take Journalism 8A first.

Experience in journalism is not needed but the student should be able to make a passing grade in English 53 or 55 or pass the English entrance test to take Journalism 8B.

Students who are interested in non-writing work can do clerical work or be secretaries, photographers, ad manager or bookkeeper by taking project journalism.

Smith said that he feels sure there are students at FCC who are not taking any journalism courses because the lack of knowledge of the courses in journalism.

Smith said FCC needs more students in journalism and on the staff of our college publications. Smith replied that FCC needs technical people with good high school records in journalism, English and similar subjects.

The intended major of the student need not be journalism. Smith said that journalism courses give good training and experience for students who will major in English, art, radio, television, marketing, and advertising, photography, professional or creative writing, public relations and other mass communication fields.

New State Has Session

Dr. Robert E. Cralle, the executive secretary of the California Association of school administrators announced the 1960 summer session at the University of Hawaii will convene June 20 through August 1, 1960.

The beautiful Manoa Campus of the University of Hawaii, in our 50th State, will be opened to hundreds of teachers and scholars from all over the world. In addition, the six weeks session attracts a distinguished visiting faculty from the Orient, Europe and the Continental States, and offers a wide range of courses and unusual subjects. Included in the University's curriculum for the 1960 Summer Session are some 215 courses in 39 fields.

Special six weeks travel and study tour for students is being offered this year through the University Study Tour to Hawaii. Special prices for students begin at \$495.00. This price includes round trip transportation by ship or air, dormitory and hotel accommodations, field trips, tours of the islands, dances, adventurous summer picnics and outings, plus free bus transportation and many planned social and scholastic activities.

Registration Starts For Night Classes

All students who plan to enroll in evening classes of Fresno City College in the spring semester may start registration immediately.

Dean Robert M. Kelly of the evening division announced counselors will be available Monday through Thursday from 6:30 to 9:30 PM until Feb. 3.

He said students will start registration in the admissions office, where they may obtain necessary forms, catalogs and schedules, and other details. They will then be sent to the counseling center or offices of the business and technical and industrial division for counseling.

Kelly announced apprenticeship classes will register in the admissions office from Jan. 25 to 28. Instructors will start enrollment procedures in their classes and send students to the office to complete procedures.

The dean advised new night students in the academic program to take English and mathematics placement examinations and college aptitude tests. They will be given at 8 AM Jan. 27 and Feb. 1 and 2 and at 7 PM Feb. 1.

These are the silver wings of a U. S. Air Force Navigator. As a flying officer on the Aerospace team, he has chosen a career of leadership, a career that has meaning, rewards and executive opportunity.

The Aviation Cadet Program is the gateway to this career. To qualify for this rigorous and professional training, a high school diploma is required; however, two or more years of college are highly desirable. Upon completion of the program the Air Force encourages the new officer to earn his degree so he can better handle the responsibilities of his position. This includes full pay and allowances while taking off-duty courses under the Bootstrap education program. The Air Force will pay a substantial part of all tuition costs. After having attained enough credits so that he can complete course work and residence requirements for a college degree in 6 months or less, he is eligible to apply for temporary duty at the school of his choice.

If you think you have what it takes to earn the silver wings of an Air Force Navigator, see your local Air Force Recruiter. Ask him about Aviation Cadet Navigator training and the benefits which are available to a flying officer in the Air Force. Or fill in and mail this coupon.

There's a place for tomorrow's leaders on the Aerospace Team.

Rams Drop First Tilt To SFOC

The Fresno City College Ram wrestling team invaded the San Francisco area last Friday and Saturday and brought home a victory, a loss, and lots of experience.

The Rams defeated the San Quentin team, 25-8, Friday before dropping their first bout of the year to the powerful San Francisco Olympic Club, 26-8.

Although the Rams lost to the Olympic Club, which is loaded with present national champions or former champions, they gained a tremendous amount of experience from the veterans. FCC wrestling coach Hans Wiedenhofer indicated that only good competition teaches and improves the competitor.

However Larry Nehring and Eddie Davies did win. They were the only ones on the Rams squad who won in both the San Quentin match and the San Francisco Olympic Club match. Jim Markarian also won against San Quentin and drew against the Olympic Club.

The wrestling team will take two weeks off for final examinations and will resume play Feb. 4 against College of the Sequoias in a league match there. The results of the San Quentin and San Francisco Olympic Club are below.

San Quentin
115, Nehring F. pinned Sublett; 123, Davies F. d. Gallardo; 130, Noriega S.Q. d. Ed Seagle; 147, Moore F. d. Lettner; 157, Joe Ortega F. d. Foss; 167, Errol Johansen F. d. Woodmansee; 177, Jim Markarian F. d. Woodward; 191, Montgomery S.Q. pinned Joe Aquino; heavyweight, Lorenzo DeSantiago F. d. Ellis.

SF Olympic Club
123, Nehring F. d. Ingoglia; 130, Davies F. d. Gomez; 137, Osborn O.C. pinned Seagle; 147, Ortega and Ornellas drew; 157, Northrup O.C. pinned Moore; 167, Fejas O.C. d. Johansen; 177, Beno O.C. d. Markarian; 191, Newcombe O.C. d. Aquino; heavyweight, Dolto O.C. d. DeSantiago.

AMS Bowling League Won By GDI's

The Associated Men Students sponsored FCC Bowling league put the wraps on Monday night and the GDI's came out as winners. This ended the second semester that the league has been formed under the sponsorship of the AMS.

Gerl Garcia won the over-all women's bowling with an average score of 127. John Sims won the men's contest with an average of 172.

The final standings:

	W	L
GDI's	27	6
Comedians	22	11
Pickups	20	13
Stars and Strikes	18	15
Cheaters	17	16
T & I	17	16
Business Club	16	17
Tragedians	13	20
Latin American	9	24
Pace Setters	4	29

THE 1959-60 RAM BASKETBALL TEAM — Standing, left to right, Coach Joe Kelly, Lee Stark, Dick Taylor, Russ O'Leary, Ray Allen, Don Nowell, Tom Jacobsen, Chet Bishop, and equipment manager Del Speaks. Kneeling, left to right, Cleo Johnson, Joe Lee, Charlie Lowe, Ken Farnsworth and Darnell Mikel.

Cagers Will Host Reedley Following Loss To Pirates

Changes In Lineup Planned For Rams

Errors, both mental and physical, offensive and defensive, have caused changes in the starting lineup for the Fresno City College Rams' basketball team which will meet league foes College of the Sequoias Giants and Reedley this weekend.

Russ O'Leary and Don Nowell, number one and two centers, have been showing poor of late and coach Joe Kelly has moved forward Darnell Mikel to the post position and moved Chet Bishop to Mikel's spot. This combination should give the Rams a better scoring punch and added strength on the boards.

Friday night the Rams will travel to Visalia to meet the cellar dwelling COS Giants. The Rams and Giants have a common loss to the Porterville Pirates. The Giants dropped a 74-62 decision and the Rams by a 76-75 count.

Saturday night the Rams will return to Fresno for the first home game since Dec. 23. The Rams will host the Reedley Pirates, who are tied with COS and Taft for last place in the league. The game will start at 8 PM and will be played in the McLane High School Gymnasium.

During finals and the semester break the Fresnans will meet the Taft College Cougars in Taft, Jan. 28 in the final league game of the

CHET BISHOP

Season Scoring

	FG	FT	TP	AVG.
Lowe	110	35	265	12.6
Mikel	101	50	252	12.0
Jacobsen	96	38	230	11.0
O'Leary	46	40	132	6.4
Lee	40	43	123	5.9
Stark	37	17	91	5.4
Bishop	33	20	86	4.5
Nowell	28	23	79	4.4
Farnsworth	24	25	73	4.3
Johnson	12	11	35	2.5
Taylor	9	13	31	2.4
Allen	8	6	22	2.2

first round and then will meet the Stanford Junior Varsity in Palo Alto in a non-league tilt, Jan. 30.

Starting off the spring semester the Rams will entertain the league leading Allan Hancock Bulldogs in the McLane High School Gymnasium, Feb. 6.

FCC Rally Falls One Point Short

The Fresno City College basketball team tallied 29 points in the final quarter but dropped a 76-75 decision to the undefeated Porterville College Pirates Friday night in Porterville.

It was the second league loss for the Rams and the second league win, and the thirteenth consecutive victory, for the Pirates.

The Rams kept fairly even with the Pirates for the first ten minutes of play but were trailing 20-15 at the end of the first quarter. Porterville extended their lead by the half, 41-29.

The Pirates had a hot streak from the floor, hitting 50 per cent of their field goal attempts, while the Rams netted 30 per cent of theirs.

Porterville kept adding to their advantage until midway in the final frame. With Darnell Mikel and Chet Bishop leading the way, the Rams cut the Pirates' lead to 76-73 with less than a minute left to play.

The Rams kept possession of the ball until the last second and Bishop shot, but the ball wouldn't go in.

The scoring:
Fresno (70)—Jacobsen 6; Mikel 18; Nowell 5; Lowe 9; Lee 7; Stark 8; Bishop 14; O'Leary 3; Farnsworth 1; Taylor 4.

Porterville (76) — Brooks 21; Coggins 5; White 27; Crawford 6; Rodriquez 17.

SPORTSTALK

By LARRY ADAMS

The results of this weekend's games in the Central California Junior College Athletic Association race will probably be the decider for the eventual winner of this year's league.

Allan Hancock's fabulous Bulldogs will get a full test Friday and Saturday night when they invade the valley. Tomorrow night will find the Bulldogs meeting third place Coalinga and Saturday night they will meet the Porterville College Pirates. The 200 mile trip might hurt Hancock with Coalinga and the Pirates both capable of defeating them on their home courts.

If Hancock wins both games they should have clear sailing to their fourth league title in five years.

The FCC Rams will get a chance to get into the top three over the weekend when they tangle with Sequoias and Reedley. Saturday night the Rams will be home for the first time in a month.

Friday night Reedley will be tested in Taft by the Taft College Cougars in a battle of the losers

Joe Kelly, FCC basketball coach, might have some added woes this weekend when the Rams meet COS and Reedley. Both Joe Lee and Charlie Lowe have the flu and missed Monday and Tuesday nights practice.

and Saturday night Sequoias will travel to Taft to meet the tall Cougar five.

One of the best games coming up on the Rams schedule will be Feb. 6, when FCC will meet the Allan Hancock Bulldogs in the McLane High School gymnasium. This game will be the first for the Rams in the second round of league play.

In last week's games the favored Porterville Pirates and Hancock Bulldogs won their games. Jerry Foster led the Bulldogs to an easy 71-54 win over COS Friday night and again Saturday night when they whitewashed Reedley, 89-52.

Porterville squeezed by Fresno Friday night and then behind center Titus White beat the Taft Cougars, 82-69, the next night. Coalinga pulled ahead in the final minutes to win over Taft Friday night, 63-56.

CCJCAA Basketball Standings

Team	Won	Lost
Hancock	3	0
Porterville	3	0
Coalinga	2	1
Fresno	1	2
Sequoias	0	2
Reedley	0	2
Taft	0	2

Weekend Results:
FRIDAY
Porterville 76, Fresno 75
Hancock 71, Sequoias 54
Coalinga 63, Taft 56
SATURDAY
Porterville 82, Taft 69
Hancock 89, Reedley 52

Heaven's—The Women Take A Different Perspective Of Man's Definite Definitions Of Basketball Rules And Terminology

By DIANE NIXON

For some reason men are not very good at explaining the finer points of basketball (or any other sport) to the women who accompany them to the gymnasium.

Men and women should have a common knowledge of basketball. The following glossary of terms should help to establish a basic foundation for both sexes of basketball spectators.

First of all, here's a definition of a basketball game. It is a game in which ten tall men spend an hour (or more) running from one end of a gymnasium to the other, shooting foul shots.

An important term you'll hear right away is zone defense. This is what a policeman uses when he puts a No Parking sign in front of the gymnasium.

The Defense

Another form of defense is man to man defense which is when two opposing players fight over the ball, not to be confused with woman to woman offense, when two coeds fight over who's going out with the cute center after the game.

A bucket is an item used for liquid refreshments when the team captain stalls by calling time out for an ice cold coke. When the

captain calls time out in a hurry it's called a fast break.

A basketball ring is what holds the miniature tennis net on the hula hoop which is attached to the backboard which is attached to the post (we'll get to the posts later) which the players shoot the basketball at.

When a player starts down court and begins to weave, he sits down and weaves a new basket which is used for storing the basketball between games.

The Player

Some of the fellows must get confused and forget what sport they are playing because a player

came charging down the court on a high scorer (very tall player) last week.

A hacking player is one who has a bad cough and should be home in a sagging defense (bed with poor springs).

The Posts

Now, all about posts! A single post is used in a small gymnasium where there is only one basketball backboard; thus, only one post supporting it. Therefore, it is simple to understand that a double post is a court with two posts (side by side) which gives the players a double chance for scor-

ing because they have a choice of baskets to shoot for. A split post is when some wise guy puts a basketball post at each end of the court (100 feet apart).

Some of the players are so nice the referees award them charity shots for having clean uniforms.

The Dribble

A dribble is usually what the referee will do if he has to keep the whistle in his mouth the whole game. A double dribble refers to two referees having whistle trouble. Also, common with a "ref" who has a double chin.

Actually, this whole article has been out of bounds!
