

Director Of Nurses Stresses Golden Rule

Miss Margaret Nelson, Fresno Community Hospital director of nurses, stressed the Golden Rule and consideration for the patient in an address at the completion ceremony of Fresno City College vocational nurses.

Miss Nelson told the 16 graduates that when she was a nursing student many years ago the first thing her instructor wrote on the blackboard as something never to be forgotten was the word, "conscientiousness."

"Never forget it," Miss Nelson declared. "It certainly sums up how a nurse should act toward her patients in being kind."

Trite But True

She explained the title of her speech, Trite But True, by pointing out dictionaries define "trite" as meaning "worn out by constant use," "no longer having originality or novelty" and "an expression or idea which through repeated use or application has lost its original freshness or force."

However, she pointed out the same old things may retain their value, citing antiques as an example. But she said dealers and collectors of antiques must discriminate and know those items which have value and those which are worthless and must be cast aside because they don't stand up to the wear of time and trial.

"In the same manner nurses must be discriminating in their choice of attributes and capabilities which they bring to their nursing careers," Miss Nelson declared.

Nurses As Individuals

She declared, "I am interested in vocational nurses as a group and as individuals, as I was one of four directors on the advisory program which helped the college and local hospitals set up the program in Fresno in 1951. From a very modest beginning, the school has developed to one of the outstanding ones in the state."

Roy Thomas Weldy, the only man among the graduates, was the student speaker. His topic was "The Characteristics of a Good Vocational Nurse."

Plan Raises Admission Standards

Included in the master plan for California higher education to be presented to the legislature for approval is the recommendation to raise the standards for admission to the lower division of state colleges and the university.

At the recent Founders Day program of the McLane High School Parents and Teachers Association Stuart M. White, the FCC president, explained that under this new plan the state colleges would accept freshmen from the top one third of high school seniors, and the university would accept only the top one eighth.

The plan also would seek to divert about 50,000 students from state colleges and the university to the junior colleges between 1960 and 1975.

Additional Colleges

White stated that by 1970 the plan foresees 22 new junior colleges in the state with 42,000 students. It states "possibly five additional" state colleges will be needed by that year in addition to three already authorized for Alameda, Orange and Stanislaus Counties. It proposes three new campuses for the university by 1975 in the San Diego, La Jolla area, in southeast Los Angeles and Orange Counties, and in the south central coastal area.

White pointed out, "Junior col-

(Continued on Page 3)

Sixteen Students Receive Perfect Scores In Spelling

REGISTRATION — Hilgard Streets, FCC student, left, receives registration assistance from Harrison Hall, counselor.

Sixteen FCC students achieved perfect scores on the spelling test sponsored by the National Office Management Association.

Miss Ethel McCormack, the business division dean, said that NOMA is made up mostly of office managers and a few educators.

She explained that NOMA devised this test to create greater interest in accurate spelling in those students who are considering employment in business. The test is not to be confused with a spelling bee or a contest, she said.

Out of the 150 day students who took the NOMA test 51 students achieved 90 per cent or better on the 100 word test.

This percentage, Miss McCormack said, is an improvement over the percentages attained in previous years on similar tests.

The test given last month was the first of two official tests of 100 words taken from the first 300 words of a 600 word list which was issued to each participant.

Any student taking a business class or classes are invited to participate in the second test by signing up with one of his business instructors. Each student will be given the 600 word list from which the spelling test will be taken.

Any student who has spelled all the words correctly on either the first of the last test but who has either missed or failed to pass one test, will be given a NOMA Spelling Certificate.

A student who has spelled all the words on both tests correctly will receive the NOMA Spelling Proficiency Certificate.

The 16 students who made perfect scores on the first test are, Sonja Austin, Darlene Bowles, Rosalie Campbell, JoAnn Fragus, Mike Garrison, Norma Gonsalves, Dan Holtermann, Eleanor Perez, Marion Poitevin, Judy Potter, Marla Simmons, Martha Simpson, Seta Sarkissian, Mary Ann Steelman, Carol Ann Vucovich and Jenny Vasquez.

Dean Of Admissions Estimates Enrollment

George C. Holstein, dean of admissions and records, said approximately 3,950 students are enrolled for the spring semester.

FCC has approximately 2,000 day students enrolled and almost 1,900 night students. These enrollments may be slightly higher pending final registration today. Registration for day program ends at 11 AM and evening class registration is from 6:30 to 9:30 PM tonight.

College officials said spring semester enrollments are usually less than those in the fall semester. Final registration last semester was 4,254. They included 2,281 in day classes and 1,973 in evening.

Students may change programs from 1 to 3 PM today, which is the last day to register, except in short unit courses and apprenticeship classes.

Night Division Offers Tax Accounting

Tax accounting is being offered in the evening division this semester. The class will meet Thursdays from 7 to 10 PM.

Miss Ethel McCormack, the dean of the business division, said the class will emphasize individual income tax returns, but will include partnership and corporation forms. The instructor will be W. J. Billeter.

The class will study federal and state income tax laws, classifications of taxpayers, rates, and forms. It also will be concerned with sales, exchanges, capital gains and losses, social security, and withholdings.

Miss McCormack said four other night classes in accounting will be open for additional registration until tonight. They include two sections of a second semester course in principles of accounting. L. W. Martin is teaching the Tuesday night course, and E. Harrison Hall the Wednesday night class. The prerequisite is one semester of accounting.

Billeter is teaching an advanced accounting course Tuesday night; the prerequisite is one year of accounting.

Mrs. Anna Mae Turnipseed teaches a Tuesday night class in second semester basic accounting.

All the classes meet from 7 to 10 PM. Night students may enroll until tonight's deadline from 6:30 to 9:30 PM in Room 200B of the Administration Building.

63 HIGH SCHOOL STUDENTS ENROLL IN COLLEGE COURSES

The 63 high school students taking part in the college honors program this semester indicates an increase of 15 students over the previous semester. The students will attend classes on the Fresno City College campus. During the fall semester 48 students took part in the program.

The college credit program was started in September, although last year 13 students studied Russian at the college before the honors program was begun. All but one of the fall semester students completed their courses.

John S. Hansen, the administrative dean, said 47 high school seniors will be enrolled for college credit, as compared with 34 in the fall term. In addition, the same 15 juniors and one sophomore who were enrolled in Russian language courses for high school credit in the fall semester, will continue their studies in two Russian classes.

Night classes also will be open to these students for the first time since the program began.

Other changes in the program for the spring term include a number of additional courses available to the high school students. They include introduction to the physical sciences, mechanical drawing, analytical geometry and introductory calculus, problems of society, personal and social adjustment, the college choir, and second semesters of beginning and intermediate Russian and principles of economics.

Five of the day classes which were open to the students attracted no enrollment. These are brief-hand, botany, elementary plane surveying, engineering drawing, and regional geography.

Classes in which the students did take an interest include general psychology, California history, introduction to sociology, and music fundamentals.

The students who are taking from one to three college courses spend the rest of the day in their own high schools. For the first time three of the students are from outside the Fresno City Unified School District. They represent Fowler Union High School, Washington Union High School, and San Joaquin Memorial High School.

Hansen said the college is now in the process of evaluating the program. Each student will be asked to fill out a questionnaire, as will each of their instructors.

A law enacted by the legislature last year allows junior colleges to collect state money for these students. The college will receive up to one-third of the regular average daily attendance allocation.

Not more than five per cent of the seniors in the school district may be recommended for participation in the program.

FCC Hosts Dr. Vredevoe

Fresno City College was host this morning to Dr. Lawrence E. Vredevoe, nationally renowned lecturer, author, and educator.

In the first assembly of the spring semester at the FCC auditorium, Dr. Vredevoe's topic was "The Seven Dwarfs You Will Meet In Life — What Is Really Holding You And Your Group Back?"

Newly elected Student Body President David Hanna introduced Stuart M. White, the FCC president, and White presented Dr. Vredevoe to his audience.

Dr. Vredevoe received his BA at Hope College in Holland, Michigan, and his Ph.D. at the University of Michigan. He has had administrative and educational experience in Michigan, Ohio, and California. He is now Professor of Education at the University of California in Los Angeles.

Published weekly by the journalism students of the Fresno City College, 1101 University, Fresno, California. Composed by the Central California Typographic Service.

Winks Wink At Winks—WhatElse?

By ANDREW FEDERICO

There is always someone who at one time or another comes to tell someone else that life is a game which is played checker board style, with the player jumping from square to square trying to get by the opposition.

This is all right; it's good advice, but when the player gets his curiosity aroused and he asks questions like "where did I come from? where will I go?" there is silence from whoever said that life was a game.

For these answers the man then goes out and looks up at the sky and asks where did I come from? where will I go?" And the sky looks back at the man and gives him a great, big, healthy wink.

So the man stops to look at the earth for advice, and the earth winks. He looks at a tree, and the tree winks. At a bird on the wing, and it winks. He watches a grasshopper jump away, and it turns and winks at him. Everything begins to wink.

Russia winks at General LeMay, LeMay winks at his daughter as she roller skates at Rockerfeller Center, and she winks at Dostoyveski, who is busy baking bread, but stops to wink at George Gershwin, and he winks and writes a song that gets on the lips of all the population's smiling, winking faces.

Numbers start winking at numbers, and even the words, "Where did I come from? Where will I go?" start winking at one another. "Where" winks at "did," did winks at "I," I winks at "come," come winks at "from," and so on.

A man is born and something winks. He dies and the same thing winks again. Each time the wink comes the man is in ignorance, and he says there or else becomes neurotic trying to figure out these questions of the world.

An old man winks at a young man because the questions "where did I come from? where will I go?" he will soon come to know, and even more winkful is the fact that the old man will not return to tell the young man about them.

It's a good life, but it would be pathetic if it weren't for the lies of art that keep telling a man to wink back.

Lackey Exposes Ways Of Siamese In Letter

By ROBERT VOSS

Curtis E. Lackey, on leave from the FCC faculty to assist the Thailand government in setting up a vocational program, reports that the people of Thailand are eager to learn and are very responsive to the vocational training program.

Lackey, the FCC apprenticeship training coordinator, is one of 10 educators chosen to help the University of Hawaii set up a vocational training program in 18 colleges of Thailand. This group includes three educators from California and seven from Hawaii.

In a letter to Stuart M. White, the FCC president, Lackey wrote, "The scope of occupations ranges from making gravel with a small hammer to making transistors for the new television sets being made here.

"Many of the rural people are still living and working in the stone age while others are as modern as anyone in the world. These are some of the things that make this job interesting and educational.

"The nation is at present in the state of flux, and it seems that anything that can be done is of great importance in the industrialization of the country and will be of help in making the country self supporting in the international competition of the world markets. At the present rate of progress Thailand should make great strides in the next ten years."

Lackey reported wages range from 15 cents a day for unskilled labor to about \$3 a day for the highly skilled technicians. He said

school teachers salary start at \$22.50 a month and can work up to \$45.

He observed there appears to be little or no shortage of food, and all of the people seem to be well and happy. The cost of living for the natives is reasonable, but Lackey said foreigners pay about twice what they would pay in the United States.

A national lottery which runs continuously in Thailand pays for a great deal of the national expenses, and income taxes are low and frequently not collected.

"The prime minister," Lackey wrote, "feels that most people cheat on the income tax anyway so is not inclined to prosecute for this violation."

Lackey said women in Thailand seem to be the bosses of their families and control its money. It is the general practice for women to work beside men in all occupations, including digging ditches and building roads.

He reported that many of the canals are used as streets, and houses are built all along them. It is not uncommon, he said, to see people doing their laundry, brushing their teeth and bathing in the same area of the canal, without apparent ill effects.

City College's Aircraft Program Trains Students In Various Fields

By GARY COOKE

Fresno City College's aircraft program is training 23 students in the fields of aircraft manufacturing, maintenance, and research.

The program, fully approved by the Federal Aviation Agency, requires that a student must have a minimum of 1,650 hours of instruction during the two year course, 960 for a power plant mechanic's license, and 650 for an air frame license.

New Non-Credit Courses Offered At City College

Two courses are being offered here at FCC through the civic center act.

Robert Kelly, the dean of the evening division, said that the courses will not be associated with FCC in any way except in the renting of room space. He said that no credit will be given for the courses.

The two courses are landscaping and gardening and architectural drawing. They will cost \$1 per lesson or class meeting.

The architectural drawing class is for the purpose of upgrading architects. It meets every other Tuesday from 7 to 9 PM in A-205. The course will continue until June 14. The instructor is Dave Mitchell. Kelly said that only graduate architects would be interested in the course.

The landscaping and gardening class is open to anyone who is interested. It meets every Wednesday from 7 to 9 PM in A-215. The instructor is Ted Green, landscape architect.

Anyone interested can enroll in either class during regular class time.

Course In Astronomy Is Offered

Because of the constant demand, FCC is offering an astronomy course for the first time this semester.

The class meets every Tuesday from 7 to 9 PM. Students interested should enroll at the regular enrollment time for evening classes.

Robert Kelly, the dean of the evening division, said the course will not be technical. He said it will be a survey in the field of astronomy with the emphasis on an appreciation of the wonders of the universe combined with a study of the constellations.

The instructor is Richard McWilliams, a science teacher from Sierra Junior High School.

Instructor Shannon S. Smith's power plant classes began in the fall semester of 1958, and the air frame course under the direction of Harmon W. Allen started a year later.

So far four students have earned their power plant licenses. They are Thomas V. Williams of Madera, William R. Kemper of Chowchilla, and Ronald L. Smith and Hubert Tanaka, both of Fresno.

To be eligible for licenses, the aircraft students must pass written, oral, and practical examinations after completing the minimum hours of instruction. The two year course leads to an AA degree.

Smith said two more students will be taking the exams within the next two or three weeks.

The students work in their new shop building, TI-6, which is fully equipped for both the power plant and air frame courses. The aircraft program was previously housed in the engineering quonset hut on San Pablo Ave., north of the campus.

Situated on and around the building's 10,000-plus square feet of floor space are engines of all types, a Link trainer, various types of saws, pneumatic riveters, a propeller bench, a magnaflux machine which detects defects in steel, a \$2,500 painting booth which Allen said is one of the best in Fresno, an F86A Sabre Jet, and many other small machines vital to the program's needs.

Much of the equipment has been and is being supplemented by surplus materials donated or sold nominally by various branches of the armed services. The Sabre Jet falls into the "gift" class — it was presented to FCC by the Air Force Reserve late in last year's spring semester. The plane cost more than \$100,000 when it was manufactured to fight in Korea.

The equipment in the building is worth hundreds of thousands of dollars, the instructors said, but the college is aided by the State Department of Education, and cent-a-pound sales. Robert P. Hansler, the dean of the technical and industrial division, said that \$20,000 has been budgeted for equipment.

Allen said he hopes to start his air frame students building a complete plane next year. He said this would take approximately as many man hours as building a three-bedroom house.

Parking Stickers Must Be Shown On Windshields

All cars parked within a two block radius of the college must display a parking sticker in the lower right hand corner of the windshield.

After the first of next week owners of cars without the sticker may be given a citation by the Fresno City Police Dept.

Paul S. Starr, the dean of men, said that the registration of cars is necessary to make a complete and accurate survey of the parking needs of the college. All students and all certificated and non-certificated personnel will be required to register their cars.

The free stickers are available in Starr's office and students who own more than one car may receive a sticker for each vehicle.

Future plans for solving the parking problem include establishing parking zones. Each student will be assigned to a zone and to a parking place within the zone.

Exchange Notes

Daisies Don't Tell The Truth

Southern California's Daily Trojan reports the disconcerting fact that daisies don't tell.

For all those hopefuls who have been testing the allegiance of their lovers by plucking petals from daisies, the Trojan brings news that the daisy is a fraud. The game is fixed. If you play the game straight, you lose every time, because the flower is a cheat.

This is the gimmick: The daisy always has an even number of petals. If you start out in the normal manner — "He loves me" — you're bound to end up with, "He loves me not."

It is impossible that you will end up with "He loves me." In this case, either you can't count, you're a cheat yourself, or you've picked a shoddy product.

You can't even trust daisies anymore.

Club News

Campus Clubs Resume Semester Activities

By MARY GULKE

With the spring semester under way at FCC clubs are ready to resume activities. These clubs are open for membership and any FCC student may join.

Associated Women Students

All FCC women holding a student body card belong to the Associated Women Students and can become an active member by joining the organization.

Among the many activities of AWS this semester will be their sponsorship of the faculty tea, a fashion show and tea, an installation dinner, and co-sponsorship of the spring formal.

The dates are all tentative for these activities except for the installation dinner which will take place Feb. 25.

AWS will meet today at noon in B-6.

Associated Men Students

All FCC men students holding a student body card are members of the Associated Men Students. To become an active member of the club men students must join.

A meeting of AMS will be held today in T-103 at noon.

Freshman Class

Nominated and running unopposed for freshman class offices are Douglas Besoyan, president; Leon Reid, vice president; Frances Ostos, secretary; Charles Chrisman, treasurer, and Deborah Williams, Inter Club Council representative.

An election will be held Feb. 18 at noon in the auditorium.

International Club

The International Club is designed for students, American and foreign, who are interested in international affairs, foreign customs, and further international understanding.

William A. Reynolds, IC sponsor, urges all students interested in joining this club to attend the meeting at noon today in B-6.

Latin American Club

The Latin American Club is open to all students who wish to join. It is organized to stimulate interest in school affairs and activities.

This club has received two awards as the most outstanding campus club.

Delta Psi Omega

Delta Psi Omega is a national dramatic fraternity organized to recognize and reward all student participation in college play productions.

Students who would like to join DPO may contact Clyde G. Sumpster, drama instructor and sponsor, for the requirements of this club. DPO is sponsoring the Mardi

Gras Ball to be held Feb. 26 from 9 to midnight in the student social hall.

A king and queen will be selected to reign over the Ball.

Players Club

The Players Club is a newly organized auxiliary of Delta Psi Omega, the drama fraternity. Students interested in drama activities may join the Players Club and work toward membership in DPO.

Contact Clyde G. Sumpster, sponsor, for further information.

CSTA

California Student Teachers Association is organized to give education majors an idea of the teaching profession.

CSTA will hold its first meeting of this semester at 11 AM today in A-211. Coming events and future speakers will be the objects of discussion.

Newman Club

Newman Club, composed of Catholics, is one of the most active clubs on campus.

Meetings are held every Thursday at 7:30 PM in the Sacred Heart Social Hall, 2140 N. Cedar Ave.

Campus Christian Fellowship

Campus Christian Fellowship has its first meeting for this semester at noon today in B-5.

Ron Vom Steeg, an FCC student last semester, will speak to the club.

Alpha Gamma Sigma

Alpha Gamma Sigma, FCC honor society, is organized to recognize and promote scholarship, not as an end in itself, but as a means toward greater achievement.

TELEVISION DEMONSTRATION — Manual Angel, left, and Keith Yee demonstrate the internal structure of a television set on the television demonstration board.

Electronics Students Work On Television Set

In the next six months two electronics students will spend two hours a day arranging into form \$300 worth of a television set.

The television set, which is in line of a do-it-yourself kit, will give the students a chance to wire it for instructional purposes, said James Dinsdale, class instructor.

The television demonstration board, which is the beginning stages of the set itself, is already being worked on by students in the electronics class.

Dinsdale said that the set is

capable of holding a 24 inch picture tube, but that only an eight inch tube will be used because of the danger of explosion in using a larger size tube.

The reason that it will take so long to complete the set is that the students will be limited in time, and once it is finished, it will have to be checked and tested for any possible faults, Dinsdale said.

DRIVE SAFELY!

Plan Raises Admission Standards

(Continued from Page 1)

leges help to discover the extraordinary possibilities in ordinary people."

He explained, "With the ever increasing demand for education and with an increased population we could establish 'elite' versus 'mass' education.

"We could choose to educate a few people exceedingly well or to educate a great number of people somewhat less well.

"A modern society such as ours cannot choose to do one or the other. We have no choice but to do both. Our kind of society calls for the maximum development of individual potentialities

Junior College To Carry Load

The FCC president said the public junior colleges of California will have to continue to carry the big load of students.

The plan, the preparation for which was authorized by the legislation last year, proposes to meet the needs of the state for the next ten years."

Veterans Must File Card For Subsistence Program

Veterans who fail to fill out a veteran's card each semester will be dropped from the G.I. subsistence program on the assumption that this financial assistance is no longer needed.

Mrs. Louise Murphy, the veterans' secretary, reminded all veterans of this fact. She said the Veterans' Office in Room 112 in the administration building is the place to take care of this business.

Get the quiet proof of Chevrolet's superior performance on the road—No other car in the low-priced three can match the borne-on-the-wind sensation you get from a ride in the 1960 Chevrolet. But that's not surprising when you consider to what lengths Chevy has gone to provide for your comfort at no extra cost to you. As you drive, count the ways Chevrolet has been thoughtful:

Supple Full Coil suspension—Coil springs at all four wheels melt bumps as no other suspension can. Taking the punch out of rough roads is their only function—they don't have to anchor the rear axle.

Butyl rubber body mounts—Thicker, newly designed body mounts

further insulate you from the road.

Body by Fisher—Only Chevy in its field offers the polish and craftsmanship of Body by Fisher.

Foam cushioned seats—Chevy offers foam cushioned seats in both front and rear in all series but one.

Safety-Girder frame—X-built and not merely X-braced, the Safety-Girder frame affords greater rigidity to minimize twisting and squeaks.

Hydraulic valve lifters—Oil hushed hydraulic valve lifters reduce engine noise to a whisper.

Cushioned steering shaft—A universal joint and cushioned coupling keep those annoying road tremors from the steering wheel.

Precision balanced wheels and tires—Here again Chevy has shown concern for your comfort by eliminating vibration in this vital area—tire life is longer, too.

Easy steering ratio—Chevy's high ratio Ball Race steering takes the work out of steering for you.

Superior weight distribution—Chevy rides better, handles better and stops better because the car's weight is more equally divided between the front and rear wheels.

Wide choice of power teams—Choose from 24 different power combinations to satisfy the itchiest driving foot—more than any other car.

Now—fast delivery, favorable deals! See your local authorized Chevrolet dealer!

CC Rams Lose Two Key Men

Ed Davies and Larry Nehring, two starting lettermen on the Fresno City College wrestling team, have been dropped from Coach Hans Wiedenhofer's squad because of their academic standing.

These two were among the wrestlers that were "most counted on" by Wiedenhofer to bring the Rams victory in the state meet which is only one month away. Without the services of these two the going appears to be pretty tough for the rest of the team.

Davies, who wrestled in the 130 pound class, had a phenomenal record going for him. Last year he was undefeated and missed going to the state meet because of an illness. This year he is considered by his coach as "the best wrestler in the state in his class." He has not been defeated in junior college competition this year.

However last Thursday the Ram wrestling team did chalk up another win over the College of the Sequoias, 25-5, and remained undefeated in junior college competition. Although the team was not hurt without the services of Davies and Nehring in this meet, the low blow will be felt in the coming matches which will include the league and state meet.

Ed Seagraves took the place of Davies in the COS meet and won. Ed Seagle and Joe Aquino scored pins in the 137 and heavyweight classes respectively. COS picked all their points on a forfeit in the 123 pound division.

Today the Rams will meet Modesto Junior College here and Saturday they will meet Cal Poly frosh team at 6 PM, in a prellim to the FCC-Coalinga basketball game at McLane High School Gymnasium.

JIM MOORE GETS SET — The Rams' top wrestler practices on a teammate to get ready for the oncoming league and state meets to be held next month.

Pirates And Coalinga Next On Rams Slate

By LARRY ADAMS

The Fresno City College Rams, who opened the second round of league play Friday against Allan Hancock of Santa Maria, will meet the two teams who are battling them for second place honors, Porterville and Coalinga in two local games over the weekend.

The Rams will leave their usual home court, McLane, to meet Porterville. These two teams will battle it out on the Yosemite Junior High School floor. The Rams will return to McLane's hardwoods Saturday night to meet Coalinga.

The Rams will be seeking revenge Friday night against Porterville. The Pirates, along with Hancock, are the only league member to hold a win over FCC. In their first encounter the Pirates nipped Fresno, 76-75.

Saturday night the tide will turn as Coalinga's Falcons will be the team seeking revenge. The Rams beat Coalinga 75-69 on the Coalinga floor in January.

Wrestlers Appear

An added attraction to the Coalinga tilt will be a wrestling match between the FCC grapplers and the Cal Poly frosh-jayvee wrestlers. The match will begin at 6 PM.

Both Porterville and Coalinga furnished the Rams with good games in their previous tilts and a repeat should give fans something to go home talking about, at least as much as the Hancock tilt, which was one of the best of the season for the local fans.

Friday night, a game which saw the lead change hands 21 times, was both a crowd pleaser and worthy tribute to the twelve men who comprise Coach Joe Kelly's basketball team. Although the Rams fell short, 84-68, the All-Stars of Pennsylvania and Ohio found the local

laden Rams an almost equally talented group.

Hancock Overcomes Rams

In the first half of this thrilling and suspense filled game the Rams, with Charlie Lowe leading the way, jumped to a quick lead, saw the score tied five times before they yielded the lead to Hancock. Hancock led 41-37 at the half, but had to break a 31-31 tie with five minutes left before they took over.

In the second half, behind the phenomenal shooting of Darnell Mikel, the Rams retook the lead five times in the first eleven minutes only to have the Bulldogs of Hancock spurt ahead for the last time and eventually win the contest.

Of individual stars in the game Hancock's Jerry Foster, one of the three starters on coach Joe White's Bulldog five from Chester, Pennsylvania, stood hands above every one else. The lanky forward netted 35 points. If it wasn't Foster it was guards Paul Firth and Paul Farrell, both from Akron, Ohio. These two dazzled fans with their passing antics and smooth ball handling, besides having a terrific shooting eye.

Three Rams stood out in the game. Charlie Lowe, Darnell Mikel, and Ken Farnsworth all did outstanding jobs. Farnsworth, although fouling out was a defensive standout while Mikel and Lowe were outstanding in offense.

Rams End Semester With 15-10 Record

The Fresno City College Rams basketball team closed out the fall semester of play with a three win, one loss record. The Rams overall record for the first semester was 15-10 in all games and 4-2 in league action.

The three Ram victories came at the expense of league opponents Reedley, Taft, and College of the Sequoias at Visalia. In the final game of the semester the Rams were set back by the Stanford Indians junior varsity.

Giants Are Trimmed

The Fresno's first win during finals was against a tough COS Giant five Jan. 22 in Visalia. The Rams held off two determined Giant drives, after building up a six to eight point lead, and held on for a 73-67 league win.

In this contest both starting guards, team captain Charlie Lowe and Joe Lee, were benched by the flu. Ken Farnsworth, who replaced Lowe, gave his best accounting for the Rams with a 17 point output.

The scoring—Fresno (73)—Mikel 20; Farnsworth 17; Jacobsen 14; Nowell 8; Bishop 6; Johnson 3; Stark 2; Allen 2; O'Leary 1. Sequoias (67)—Gillespie 18; Schiller 16; Murphy 10; Marshall 9; Bunch 6; Folsom 3; Craig 3; Kissick 2.

Rams Down Reedley

The night after the COS game the Rams met the shorter Reedley College Tigers in the McLane Gymnasium and sent them home with a resounding 76-52 loss. The Rams jumped to a quick lead in the game and never relinquished it.

Again Ken Farnsworth was a hero in the game. He was aided by Russ O'Leary, who had one of his best nights in rebounds, and regular forward Darnell Mikel.

The scoring—Fresno (76)—Mikel 13; O'Leary 13; Farnsworth 10; Jacobsen 8; Stark 8; Lowe 7; Johnson 5; Allen 5; Nowell 3; Taylor 2; Bishop 2. Reedley (52)—Brown 10; Epler 8; Trout 8; Scott 10; Garrigus 4; Napier 7; Koop 3; Fisher 2.

Taft Bows Easily

Closing out the first round of Central California Junior College Athletic Association play the Rams

traveled to Taft and came home with a 94-58 victory, their most lopsided win of the season, on Jan. 29.

The scoring—Fresno (94)—Lowe 13; Jacobsen 15; Mikel 10; Johnson 10; O'Leary 9; Bishop 8; Stark 6; Farnsworth 5; Nowell 5; Allen 4; Lee 3. Taft (58)—McDaniels 18; Jones 15; Whitt 14; Rector 7; Harrington 3; Farr 1.

Stanford Whips FCC

In their final non-league tilt of the season the Rams ran across a tougher Stanford University junior varsity five in Palo Alto and suffered a 72-59 loss, on Jan. 30.

The Rams never had a chance against the talent loaded JV's and Stanford kept adding to their already large lead. Stanford led 36-20 at halftime

The scoring—Fresno (58)—Mikel 12; Lowe 11; Stark 7; Lee 7; Jacobsen 6; Farnsworth 6; Johnson 3; Taylor 3; Nowell 2; O'Leary 1. Stanford (72)—Ledgerwood 12; Whelan 12; Thompson 11; Christenson 11; Muhs 6; Jacobs 6; Mathieson 5; Cover 2; Peglow 3.
