

Christmas Dance Tomorrow

Petitions Available For SB Offices

Petitions for student body offices will be available in the Admissions Office starting today and until Dec. 9, said Miss Doris Deakins, the dean of women.

Offices open are president, vice-president, secretary, treasurer and 10 representatives-at-large.

The office of president of the AMS and the AWS is also open.

Candidates must be a member of the FCC student body, taking 12 units a semester and have at least a "C" average for their total record at the close of previous semester.

The nominations assembly will be held Dec. 15 at 11 AM in the auditorium. The election will be held on Jan. 4.

Judy Potter is the commissioner of the election and members of her committee include Jon Johnson, Robert Roe, William Giese and Nancy Tamura.

Miss Deakins said applications for commissioners are also available and students interested may apply now.

Polling places will be located in the foyer of the Administration building and in front of the student center. They will remain open from 8 AM to 3 PM.

The new officers will be installed at the student council conference which will be held at the Sierra Sky Ranch Jan. 30-31.

Instructor Views Physics Students, Science Courses

By TOMMY BARFIELD

"Between 25 and 30 freshmen majoring in physics and engineering will drop out within four semesters," said Carl H. Morgan, FCC physics instructor.

Students shouldn't be alarmed too much because all the previous students who have gone on to higher institutions are now tops in their classes.

This record of achievement was revealed in an interview with Morgan. He pointed out two schools as examples, the University of California (Berkeley) and the California Polytechnic College (San Luis Obispo).

Cal Poly has five FCC graduates now and Morgan said, "All of them are doing fine and two of them are 'A' students."

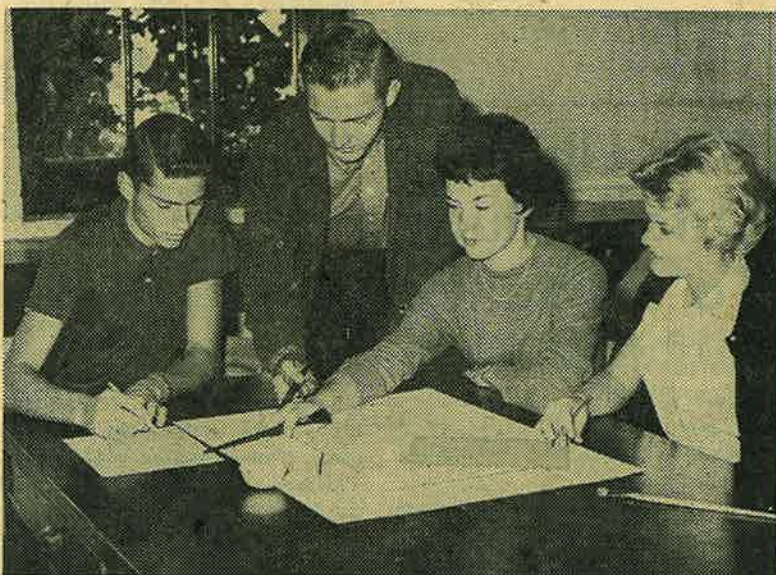

He went on to say, "I've never known a former FCC physics or engineering student to flunk out of any college or university."

"We simply follow the same curriculum as UC does. We even use the same textbooks."

Some of the required courses for the physics and engineering students are analytical geometry, integral calculus and advanced calculus.

Often science students are re-

(Continued on Page 3)

MAPPING OUT PLANS for the Christmas dance are, from left to right, Robert Wold, Deryl Jordan, Jean Dudley, and Kaye Weese. The all school dance, with a "Silver Bells" theme, is planned for tomorrow night, sponsored by the freshman class.

JC's Meet, Discuss Points Of Education

By RODNEY OLDFIELD

The junior college should be open to all high school graduates regardless of their goals.

This is the belief of Dr. Leland L. Medsker, vice chairman of the University of California's Center for the study of higher education, who spoke Nov. 19, at FCC to a faculty workshop on improving instruction of the Central California Junior College Association.

Dr. Medsker said if this broad concept is to succeed, four considerations on the part of all connected with the junior college are extremely important.

He listed them as the need for faculty commitment to the basic purposes of the junior college, a concern about methods and quality of instruction appropriate to junior college students, more and better evaluation of these efforts, and an open mind about curriculum and methods of instruction.

Medsker On Critics

He pointed out that certain critics of the junior college question whether it can possibly discharge its multiple functions, commenting that "critics are an impetus not to be resented." As an example, he quoted a speech by Chancellor Samuel Gould of the University of California at Santa Barbara to the fall conference of the California Junior Colleges Association in Yosemite National Park.

Separate JC's Won't Work

However, Dr. Medsker said if the alternative is two separate kinds of junior colleges, this will not work. "New York state experimented with this idea," he said, "and is now going to the comprehensive two year college that exists in California."

The Berkeley educator also reviewed junior college financial problems under the current Master Plan for Higher Education in the state. The plan includes a recommendation for more state money

to operate junior colleges and, for the first time, state money for buildings.

In concluding, he said junior college staff members have two alternatives. One is to admit their goals are too broad and that the cause of the comprehensive junior college is hopeless.

"The other," he said, "is to admit the difficulty of the task, to point to possible but unlikely alternatives to our present plans, and to suggest how the present plan can be made to work."

Other Sessions Busy

Teachers in the English workshop stressed the need to make grammar instruction functional rather than theoretical.

In remedial spelling, the English teachers agreed that words should be studied in context rather than in isolated lists.

Instructors in a workshop on life sciences and agriculture called for the use of experiments "instead of just talking about them."

The music workshop found that piano classes need to meet the needs of three types of students; they are the music major with a piano requirement, the elementary teaching major who has the need for a piano, and the terminal student who has a personal goal to satisfy.

Health and physical education teachers recommended efforts be made to have four-year colleges and universities accept for credit physical education majors junior college method courses in this field so the transfer students will not have to repeat the subjects.

'Silver Bells' Is Theme Of Event

"Silver Bells" is the theme chosen for the Christmas dance to be held tomorrow evening from 9 PM to midnight in the social hall of the student center.

The dance, sponsored by the freshman class, will be the first social affair of the Christmas season on campus.

The dance is open to all student body card holders. Each student will be allowed one guest.

The dance is a semi-formal affair.

Music will be provided by Herbie Palacio and his orchestra.

The theme will be carried out by ornaments and a Christmas tree.

Freshman class president Benny Edwards organized the planning committees for the dance.

Kaye Weese, Dennis Avakian and Phyllis Robertson form the publicity committee.

Other committee members include Deryl Jordan and Sharon Ebell, decorations, and Nanci Mosekian, refreshments. Robert Wold is the general chairman and Jean Dudley is in charge of the host and hostesses.

Panel Speaks Out On Junior College Roles

Since junior colleges are an organ of the community, they are "more sensitive to the pulse of the community" than state colleges and universities, concluded Tom Mullahey, moderator of a panel on the role of junior colleges on KFRE.

Other members of the panel included Dr. Leland L. Medsker from the University of California at Berkeley, Dr. Courtland L. Washburn of the American River Junior College, Roy Rosenberg, editor of the Englewood Daily News, and Alexander Bodi, editor of the Palo Alto Times.

Standards Elevated

In the role of serving the community, the junior college has elevated the standards of technical training, given impetus to adult education and has widened the opportunity for obtaining a college education by admitting all students over 18.

In meeting the needs of the community, junior colleges have lower entrance standards than state colleges and universities. The panel discussed the possibility of having to raise these standards because of lack of money, teachers and facilities. In spite of the high dropout of students and the expense, the panel was in favor of keeping the lower entrance standards if possible. Dr. Washburn said, "It is better to give them an opportunity to try, and fail, than not to try at all."

JC's Produce Good Mates

One of the panel members said even if the students weren't able to stay in a junior college, they could at least find a smarter mate.

Junior colleges have given adults a chance for a higher education.

The panel noted that adults are recognizing the importance of a higher education because of the complexities of modern living.

'Charley's Aunt' Tickets Available

Tickets are now available for FCC's fall production, "Charley's Aunt." The play is a three-act comedy. Tickets can be obtained in the foyer of the Student Center. See page 3 of this issue for picture and story.

Tournament Is Open To All

Fresno City College's Forensics Club is sponsoring the second annual FCC speaking contest, in which all qualified students have been invited to compete.

Charles Overs, Jr., president of the Forensics Club, said all students who are currently or who have taken speech 25, argumentation and debate, are disqualified.

The limitation of the speech should have a duration of no more than six minutes, overtime will result in penalization. Notes may be used; any style of delivery is acceptable; however no more than 100 words of the speech may be quoted.

He said the winning speaker will be awarded by having his name inscribed on a perpetual trophy.

The contest will be held on Dec. 13 at 11 AM in B-8. Students interested may sign-up in Franz Weinschenk's office, room M-128.

The deadline for signups is Dec. 8.

Football Banquet Set For Dec. 12

The annual football banquet, honoring the football, water polo and cross country teams, will be held in the Fresno City College cafeteria on Dec. 12, at 6 PM.

Mall Hein, line coach for USC, "one of the greatest football players of all times," stated Hans Wiedenhofer, FCC's athletic director, will be the main speaker for the night.

Published weekly by the journalism students of the Fresno City College, 1101 University, Fresno, California. Composed by the Central California Typographic Service.

Student Takes View On FCC Fire Alarm System

How safe are you at Fresno City College?
What protective measures have been set aside for your life; and how good are these measures?

It is the belief of this writer that the present fire alarm warning system at FCC is adequate only IF the students and faculty at this campus use something called COMMON SENSE. Otherwise we (the students and faculty) will make it a dangerous one, and we will be the ones at fault.

President Stuart M. White said, "We are more interested in getting everyone out of the building than getting them back inside."

Therefore, it is the duty of every individual to take it upon himself to evacuate the buildings as fast as possible. This seems to be the major concern of the administration . . . getting the people out. Closing the windows, shutting the doors and leaving the building are part of the fire drill procedure at FCC.

For some time, this writer felt that the fire drill procedure was weak because it lacked an "all clear signal" indicating that it was safe to return.

Vice-President John S. Hansen pointed out the fact that if we don't have such a signal it could be dangerous. He agreed with this writer that the students would not have any idea whether it was safe enough to return and that they would have no idea whether disaster was still present without a warning.

White stated that "there is no serious danger without it." He pointed out that if such a disaster ever took place that the fire sirens would be heard. The fire station is only two blocks away and the trucks would be at the scene before all the class rooms could be emptied. He feels that COMMON SENSE alone would be enough to keep the students away from the buildings if they heard the sirens.

However, he stated: "We would like to have an 'all clear signal'." COMMON SENSE appears to play a pretty important role. IF the students and faculty members fail to take the fire alarm seriously when it sounds, the chance of human disaster will be present; for one can not view the entire campus to see whether there is a fire.

ONLY YOU, THE STUDENTS AND FACULTY, CAN MAKE THIS SCHOOL SAFE.

OBSERVE THE FIRE ALARM. IT'S FOR YOUR OWN SAFETY.

—Richard Krikava

Letter Criticizes Review Of FCC Talent Assembly

Editors:

There are many students on the campus of FCC who are very upset about the critical review of the talent show presented on Nov. 10.

First of all, who is Roberta Silva? What experience does this person have to write a very critical review on only five of the acts presented? This is only one person's opinion of the show. It seems to us that if a review were to appear it should contain the opinion of several persons. We are sure that no one expected this show to come off like Ed Sullivan's Sunday night spectacular. This was an amateur show, not a professional one. It was also presented for the enjoyment of the students, not to be publicly criticized. Many students commented on the great variety of acts, and also that they were very enjoyable.

Pictured on page one were the "Balladeers," the winning act. Under the caption were the words "Story on page 2." We turn to page two expecting a summary of all the acts presented. Instead we find a ridiculous critical review of five acts. We would have been very happy to have found a "story" of the production, and a critical and constructive review consisting of the opinions of many students on campus.

Please! No more of this!

Editor's Note:

Roberta Silva is a Rampage staff writer who was assigned to write a review of the talent show. Opinions on any show will vary from favorable to unfavorable. Miss Silva's story reflected her own opinion, just as your letter projected yours. One student's signature is omitted from the letter because we could not distinguish the handwriting.

So I said to the prof, "You can't flunk me."

By Ira Krinberg

FCC Library Offers Much To Students

A little ceiling gazing is quite permissible in the Fresno City College library.

Those who look, will see a heavily beamed and beautifully painted ceiling.

It bears in narrative symbolism the story of the evolution of culture and civilization through various epochs of history.

Incorporated in the designs are portraits of Rousseau, Froebel, Spencer, Horace Mann and John Dewey.

Library Opened 1933

In March of 1932 the legislature appropriated \$250,000 for a new library building for Fresno State College. The hopes for the new library became a reality when Governor Rolph poured the cement for the new building. It opened in September, 1933.

Contrary to some beliefs the library is not English in design, but a combination of Romanesque influenced by Byzantine.

Although the recreational reading room is a thing of the past, Mr. Jackson Carty, librarian, wishes that it were still in use. The Board of Education now is using the room.

Carty said listening stations in the reserve room is but one of the many services offered FCC students by the library. Students may listen to music here or a shorthand student can do a little extra studying.

Offers Group Study

The conference room can be used by groups of students for study. There are also tape recorders for those who wish to record. There have been such great demands for this room that the board of education room and classrooms have been used to accommodate all the students.

Carty stated students are urged to return all books on time as there has been an increase in overdue books this year.

Inter-College Loan

Fresno City College participates in an inter-college loan service from which students may borrow books with only the postage fee to pay. These books come from colleges all over the state and throughout the country.

All audio-visual materials for the school are handled through the library with Mrs. Pate in charge of these operations.

Three main functions of the library are making the library a center of instructional programs; to teach students how to use books effectively; and to guide and encourage the recreational reading of the students.

Report From Denmark

Frodsham Reports On Danish School System

EDITOR'S NOTE — This is the second of a series of letters from FCC instructor Noel D. Frodsham, who is on a Fulbright Teaching Fellowship in the Danish school system in Denmark.

No marching bands, no baton twirlers, no pep girls, no student rallies or rally girls, no bonfires, no home coming, no parades, no cheer leaders, no cafeteria or snack bar — this is the Danish high school or junior college. It seems that school authorities and the students alike are committed to the antiquated idea that a school is a place to study and learn.

No Lunch Hour

The school day begins at 8 AM and ends at 2:05 PM with a 20 minute mid-morning "frokost" break. There is no noon hour for lunch. At "frokost" the student consumes a few open sandwiches and perhaps a bottle of milk. The faculty will have either coffee, tea, milk or beer as they may prefer with their "smor-brod." School opens with a brief assembly, the singing of a folk, patriotic or religious song, and a few announcements from the Rektor or principal.

At 2:05 PM it is a mad scramble and race to get out of the buildings first, the students or the faculty. This is necessitated by the fact many students must take a bus or train. At Randers, my present assignment, students come from a radius of 30 miles. The homeward dash is motivated no doubt by hunger, for they will eat again as soon as reaching home. There are no school buses in the sense of the type seen in the United States.

Also the schools do have ath-

letic teams but they play a very minor role in school activities. There are a few clubs but the role they may play in school activities is negligible.

Schools Have Excursions

There is, however, one activity which we in America have only on a limited scale, and that is the excursion. This may involve being away from school for four or five days. These will be limited naturally to certain classes each year. One may be off to Germany to visit historical sites, geologic formations, study of tides, etc. Or perhaps to the capital where museums, art galleries, plays and shows may be on the agenda.

In a word, the Danish high schools are academically oriented. Some instructors have confided it may be too tradition bound. Be that as it may, no one can deny its graduates have a good foundation in modern languages, math and science.

Nurses Get Top Training

Before an artist can paint he must learn the fundamentals of color and design; before a nurse may help her patients she must learn the fundamentals of a sure and pleasing bedside manner.

Mrs. Josephine Hostetler, Mrs. Mildred Bosteter and Mrs. June Pool, vocational nursing instructors for FCC, are teaching a group of students vocational nursing. It is a three semester course.

Of the 31 who have signed up, 27 are now going through the paces of laboratory work at the Fresno County Hospital.

Here the students, under the watchful eyes of their advisors, pick up the pace of daily nursing. Shots are administered to patients in the children's ward and baths are given to the newborn babies. This is just a small portion of the varied jobs encountered by the trainees.

But before practical experience is encountered, the students must spend a period of study in the classrooms of FCC. The fundamentals of the art of giving shots and the techniques of bathing a baby are learned in the preliminary study period.

From diaper changes to the holding of a psychotic patient, the practical and inner qualities of training in human emotions are put to use by a vocational nurse trainee.

FCC - 1950

Looking Back 10 Years Ago

Dr. Thomas Blakely, FJC president, appointed ten new members to the board of athletic control. The members acted in an advisory capacity in determining athletic policies of the school and all could vote on such policies. Both the faculty and the student body were represented.

Constitution Revised

The FJC constitution was in the process of being revised. One of the sections to be changed was the one dealing with the qualifications necessary for candidacy to the student body offices.

FJC student body members and Joseph King's student government class were working on the amendments. The revisions were to be presented to the student body for approval or rejection at a student body election.

Glass Class Is Offered

A weekly one-unit laboratory course was offered under the title of Glass Working, Physics 43. Four students were enrolled and Richard Jones was the instructor.

Students were taught how to repair laboratory equipment and how to make small glass objects useful in laboratory work.

The Woes Of A Journalist

Would you like to be a journalist? Being a journalist is no picnic.

If we print jokes, people say we are silly. If we don't, they say we are too serious.

If we reprint things from another paper, we are too lazy to write them ourselves. If we don't, we are too fond of our own material.

If we inadvertently fail to report a club meeting, it is because we are jealous. If we do, we are playing favorites.

And more likely than not some one is saying that we copied this. Well, we did!

CLUB NEWS

Latin American Club Shows Film Of Brazil

A colored motion picture on Brazil will be shown Dec. 12 in A-158. Everyone is invited to attend the showing. This is one of a series of movies being presented by the Latin American Club to promote understanding of the Latin American countries.

Singing Groups Will Be Busy

There will be music in the air as FCC's choir and ensemble make their public appearances in the community.

Lowell C. Spencer, music director, stated this year the choir has 55 members.

Spencer added that a variety of singing can be done with such a group. The ensemble is composed of 20 people.

The Scottish Rite Temple will be the scene for the choir's next appearance tomorrow. They will sing for the Grand Council of Royal and Select Masters who are celebrating their centennial. Their York Rite will be a state wide affair.

The ensemble will appear for the North Fresno Rotary Club Dec. 8 at the Hacienda.

Mrs. Simpson reported an excellent turnout at the last show on Argentina. She said, "This is the best year for attendance."

She added, "The students are very easy to work with and seem to be on their toes."

Ski Club

Today was the last day of the membership drive of the Ski Club. Reports are that the campaign was a success.

Saturday night the members of the Ski Club have been invited to attend "The Snow Ball Dance" sponsored by the Fresno Ski Club.

Dec. 7 the club is sponsoring a cake sale. This is a fund raising project headed by Betty Brink.

International Club

Everyone is invited to attend the debate which will be held today at 11 AM in room B-6, sponsored by the International Club. The debate is concerned with Arab-Israel relations now. This should prove very exciting and very interesting.

First Basketball Game Gets Good Attendance

"The rally committee was very pleased with the number of supporters at the first basketball game of the season," said William Giese, the rally commissioner.

The game was held in the McLane High School gymnasium Monday night between Fresno City College and Bakersfield College.

Bus trips have been planned for the games held in Reedley, Coalinga and College of Sequoias in Visalia.

"We anticipate getting bleachers for all the rooters so they won't have to stand," said Robert Roe, the student body treasurer.

At present the committee is trying to work up a definite rooting section and reserve it for FCC students.

The yell leaders, pep girls and letter girls will participate in all the league games.

Counselors Swamped By Preregistration Signups

If you haven't made an appointment to see your counselor, do it now and avoid the last minute rush!

The counseling center reported that the counselors have been swamped by the students signing up for appointments.

Pay Students Register

Preregistration counseling for returning day students started last Monday and will continue until Jan. 27. New day students will be preregistered Jan. 30 and 31. Registration for day students is set for Feb. 1.

When counseling started, the counselors had the spring schedules with a listing of 467 day classes.

Classes offered include secretarial training, secretarial problems, product analysis, tax accounting, industrial chemistry, economic problems of the San Joaquin Valley, American economy, mechanisms, statics, art for the elementary teacher, general elementary bacteriology, principles and practices of biology, and general botany.

Organic chemistry without laboratory, organic chemistry with laboratory, creative writing, English literature, regional geography, survey of western civilization, survey of news, news writing, techniques of baseball, techniques of track.

Competitive Sports Offered

Competitive golf, competitive track, competitive tennis, competitive swimming, competitive baseball, comparative government, fundamentals of interpretation and ob-

stetrics and infant care for vocational nursing students.

The 50 science subjects range from elementary botany to general zoology. They also include courses in human anatomy, physiology, biology, chemistry, geology, physical science and physics.

Math Courses Offered

Among the 26 mathematics classes offered many specialties are included. They will range from algebra to calculus and trigonometry. They will also include plane and analytical geometry, mathematics for the elementary teacher and slide rule manipulation and theory. Others will be in basic, industrial and engineering mathematics and there are several remedial classes.

The 12 engineering classes include elementary plane surveying, manufacturing processes, engineering and architectural drawing, descriptive geometry, mechanisms and statics.

The eight foreign language classes are in Russian, Spanish, German and French.

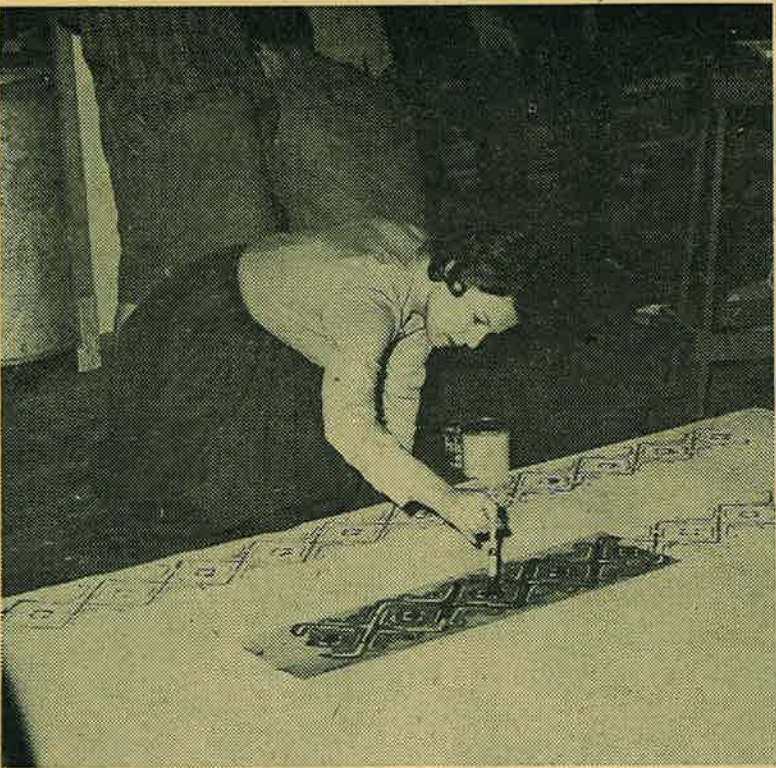

Morgan Discusses Science Majors

(Continued from Page 1)

ferred to as being slow in their other classes.

Morgan explained that students extremely interested in the science field and that are taking an average load of science courses can't seem to find the time for other classes.

He expressed his concern about this problem because he realizes the importance of liberal arts. This is expressed daily in his classes.

"STEADY NOW . . ." Helen Black, a member of the stage crew helping to put "Charley's Aunt" together, is shown here working on some of the scenery. The play will be presented Dec. 9 and 10.

Medsker Writes Book On Junior Colleges

"The Junior College: Progress and Prospects" was written by Leland L. Medsker, vice chairman of the Center for the Study of Higher Education, University of California at Berkeley.

In his book he gives the strong points and limitations about various aspects of the two-year college.

The first study presents the overview of the two year college movement, summarizing its strength and weaknesses; growth and the present emphasis on the junior college; the socio-economic forces that apply to its existence and the junior college's response to it.

The book summarizes the success of transfer students in colleges and universities. It investigates motives of students and extents to which they become terminal or transfer; attitudes of the teaching staff, position of junior colleges in statewide systems of higher education.

Services Are Compared

Financial support problems are weighed and evaluated. Services rendered are compared with those of extension centers.

Medsker emphasizes the importance of junior colleges offering terminal and transfer program accompanied by a good counseling program.

Studies tell how fully the JC is meeting the wide range of responsibilities; how extensive efforts of the junior colleges are in meeting needs of students and the attitude toward technical education.

Discusses Problems

The book tells how the JC projects into the immediate years. Major problems, its most likely encounters are discussed and certain conclusions are drawn. Everything, pro and con, is critically examined in this study.

Edmund J. Gleazer, Jr., execu-

tive director of the American Association of Junior Colleges, is editor of the book, "American Junior Colleges, 1960."

This volume is the fifth edition.

It is an essential supplement to American universities and colleges.

This book was a collaborative project between the American Council on Education and the American Association of Junior Colleges.

In the forward, written by Arthur S. Adams, president of the American Council on Education, the following was stated.

"Truism of our society is rapidly becoming more complex. It is approaching when two years of college to develop vocational skill or prepare for further collegiate education is necessary and commonplace as graduating from high school today."

The book gives detailed, accurate information about junior colleges and others who offer educational guidance.

The editor states that nearly 600 recognized junior colleges in 50 states, the Canal Zone, Guam and Puerto Rico are listed.

Tickets For Play Are Available

Tickets are now on sale for the fall production of "Charley's Aunt" in the student center foyer. The curtain will go up on the three-act comedy Dec. 9-10 at 8:30 PM.

Clyde Sumpter, the director, said the admission price for students with student body cards will be 50 cents. The admission price for the general public will be \$1. All seats will be reserved.

He added, "A great deal of time and work goes into producing a play and only audience attendance makes these efforts worth while."

Timothy Brooks, Arnold Huggins, William Workman, Diana Scott and Linda McCormack will be cast in the main roles.

Others in the cast include Ronald Eddington, Bret Shaw, Sally Fox, Claudia Fullerton and Samuel Ganimian.

Sumpter said that tickets may be reserved by calling AM 4-4721.

Death Takes James Weldon

James E. Weldon, former dean of FCC's technical and industrial division, died recently at the age of 71.

He was connected with the city schools and a faculty member of the formerly named Fresno Junior College for 24 years before he retired in 1954.

Weldon was a leader in many community and welfare activities including the United Givers Plan, YMCA, March of Dimes and High Twelve Club.

He appreciated education because he had gotten his "the hard way." He was teaching welding when he received his high school diploma from Roosevelt High School at the age of 42.

Later he took courses at the University of California at Los Angeles and Fresno State College, adding to his academic status.

Weldon held a life teaching certificate in vocational arts and vocational education supervisor's credential.

Fresno Gets Sequoia Bowl Bid

BEST CROSS COUNTRY TEAM in the history of the school is made up of Lee Harris, Bill Hall, Ken Baker, Jarvis Crocker and Arthur Clardy. Back row, Ted Cox, Jim Barnes, DeWayne Peterson and Fernie Montanez.

Jacobsen, Malone Lead FCC In Season Opener

The Fresno City College Ram basketball team, decked out in their new red and white uniforms, opened the 1960-61 season with a rousing 63-46 win over the Bakersfield College Renegades in the McLane Gym, Monday before a packed house.

Today the Rams are taking part in the Bakersfield Tournament in Bakersfield. The tournament will last until Friday night and then the Rams will return home to battle Mt. San Antonio Junior College on the McLane floor at 8 PM, Saturday.

Seven other teams will take part in the Bakersfield Tournament including Stockton College, Chaffy Junior College, Santa Ana College, Los Angeles Valley College, Modesto College, Phoenix Junior College and Bakersfield College.

In Monday's opener, coach Joe Kelly's crew threw everything but

the kitchen sink at the Renegades, including fists. Tom Jacobsen, 6-4, and John Malone, 6-8, led the Rams in the scoring department with 15 and 11 points respectively.

Although the Fresno team looked sloppy in the first half, Kelly felt that the team "looked good in spots" and was fairly satisfied with his team's first game. Kelly also praised the work of smooth moving Malone for his hustle and board work. Fresno's team scoring is below.

	FG	FT	TP
Jacobsen	5	5	15
Malone	4	3	11
O'Leary	3	3	9
Hampton	4	0	8
C. Johnson	2	4	8
Lee	1	4	6
Uriarte	1	3	5
Parrish	0	1	1
TOTALS	20	23	63

THE KNOCK DOWNS

Below are the final statistics for the 1960 season of tackles made by the defensive members of the Ram football team. However, the tackles made in the Sequoia Bowl will be added to this total.

Ron Cernokus, G	44
Jerry Gaynor, E	41
Levi Owens, HB	37

Bob Voorhees, C	10
Steve Hopper, E	9
Ed Aubuchon, HB	8
Woody Gregory, C	8
Ralph York, G	8

Season Ends With Defeat

The Fresno City College water polo team concluded their first season of collegiate competition two weeks ago by losing to Fresno State, 11-6. Coach Mickey Shelley finished with a 3-7 record for the season.

The team was led by the highest scorer, Mike Osborne. Other point leaders were veterans Jerry Opperman and Mike Satterberg. Freshmen stars were Chris Heil, Larry Giviliano and Joe Aquino. The defensive stars were Ed Wilde, Wayne Turl and Dennis Rogers.

One of FCC's biggest wins was their first one over the University of Santa Clara, by a narrow 20-19. Other wins were over California Maritime Academy and Sacramento City College.

Shelley will be out to better his record next season and with a good group of returning swimmers. The coach expressed his sincere thankfulness to all the players for their cooperation.

FCC WRESTLERS BEGIN SEASON

Coach Hans Wiedenhofer's Fresno City College Ram Wrestling team will open their wrestling season at the University of California Saturday when they take part in the Northern California Novice Wrestling Tournament.

The Rams' first home match will be Dec. 8 against the College of the Sequoias.

Wiedenhofer plans to use Larry Nehring, 123; Jim O'Neal, 130; Don Nelson, 167; Dan Thetford, 177; Lorenzo DeSantiago, 177; Jerry Noricks, 157; Roy Stuckley, 123; Joe Aquino, heavyweight, and Jack Wernick, heavyweight.

Two other members of the wrestling team who have not reported because of their football playing are Bob Voorhees and Jim Markarian.

Three veterans from last year's team, Ed Davies, Ed Seagle and Joe Ortega, will join the team in the second semester.

Rams Finish 'Best Year'

Well it's all over and we have seen the greatest cross country team in the history of Fresno City College end its season. Their final season's mark was 6-1.

The biggest of those six wins was the winning of the Central California Junior College Athletic Association title. This marked the first time in history that a Fresno team has won this title. Fresno's lone defeat came in the last meet of the season, when they placed third in the Northern California Junior College Finals.

The Ram harriers defeated Reedley College, San Jose City College, Hartnell College, Modesto College, Coalinga College and the Fresno State College JV's.

The consistent placers for the Rams all season include Fernie Montanez, DeWayne Peterson, Jarvis Crocker and Jim Barnes. Other champion Rams were Ted Cox, Art Clardy, Bill Hall, Lee Harris and Jim Watchempino.

Fresno Wins Seventh; LACC Defeated 22-14

The Fresno City College Rams will try for their second Sequoia Bowl championship Saturday against undefeated Hartnell Junior College Panthers of Salinas in the Sanger High School stadium, at 8 PM.

The Rams defeated Sacramento City College 27-19 in 1958 for their first Sequoia Bowl championship.

The Panthers, coached by Arvin Smith, are considered a well balanced team with plenty of speed and fine passing abilities. The only stain on their season record is a tie with Foothill College of Palo Alto, early in the season.

The Rams, coached by Clare Slaughter, boast a strong driving backfield in fullback George Ward, and two fine hard running halfbacks, Levi Owens and Ed Aubuchon.

Ward has racked up a total of 466 yards and 82 points this season, and is expected to be the work horse for the Rams.

Owens has scampered a total of 361 yards and has come close to running back several kickoffs. When asked by this reporter when he was going to do it, Owens replied, "I'll get one yet." This game will be his last chance this season.

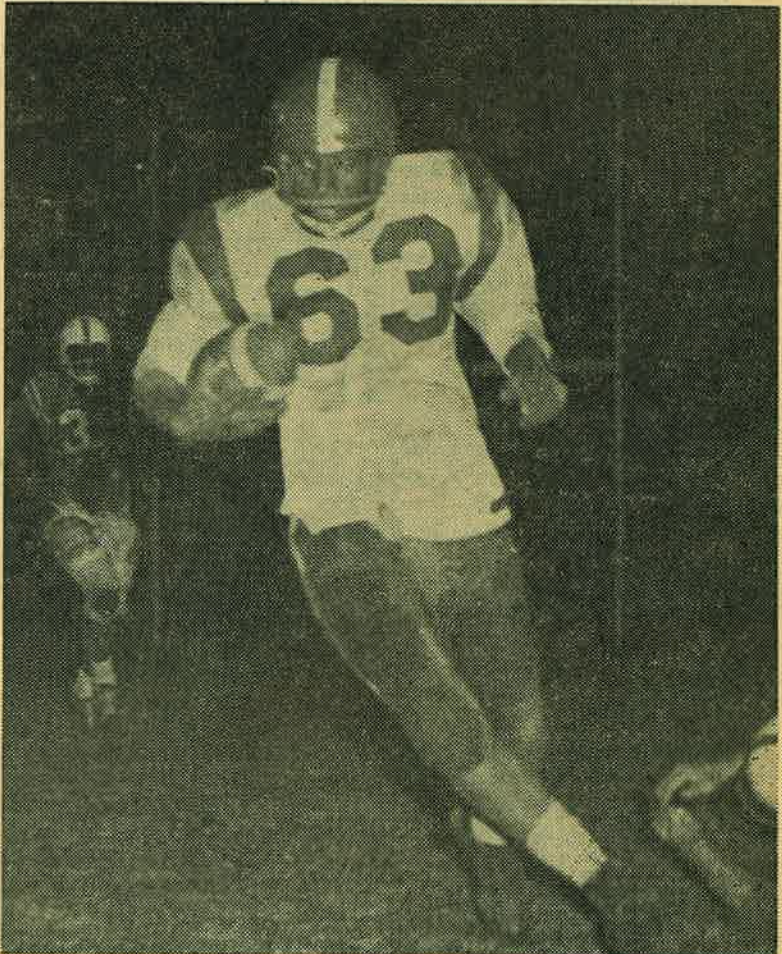

Aubuchon is noted for his quick bursts of power through the line. He has picked up 367 total yards this season.

The Rams also have a fine passing attack in Chuck Caldera and Joe Williams. This combination has accounted for 344 yards and 24 points in the previous games. Williams shines on defense as well as offense.

Jerry Gaynor, Ron Cernokus, Ed Gomez, Francis Ragghianti and 240 pound Cliff Beagle will anchor the powerful Ram defense.

The Rams ended their official season by smashing the Los Angeles City College Cubs 22-14 Nov. 23 in Los Angeles. Ward, Owens and Aubuchon accounted for the Ram scores, with Williams adding two extra points worth two points each.

Score by quarters:
Fresno 0 6 0 16 — 22
LACC 7 7 0 0 — 14
