

Play Will Introduce New Design

The courtyard production of "Antigone," by Jean Anouilh, which will be presented at FCC on May 6-7 will incorporate both classical and contemporary elements in its scenic design.

Clyde Sumpter, director, said the elevated diamond shape platform, which will provide the primary acting area, is Grecian in concept. The diamond shape was frequently found imbedded in the orchestral-circle of the Greek amph-theatres.

Greek Design

Sumpter said the orchestral circle of the Greek Theater was a flat, circular area of about 78 feet. This area was the focal point of the theater. Its function as an acting area can be found in antiquity.

Sumpter said that in order to preserve something of the classic feeling in the FCC production of "Antigone," the audience will be seated in a circle around the diamond-shaped platform.

Symbolic Colors

The platform will be marbelized in four colors: green, rust, blue, and black. The familiar Greek key design will frame the edge of the platform. The platform has been constructed at various elevations primarily for greater versatility in acting areas.

In the center of the platform, atop its highest level, the Dolphin design, which may be seen in the Theater of Dionysus, will designate the focal point of the acting area.

Contemporary Danish furniture will be used for scenic props.

A model of this setting will be on display in the foyer of the student center soon.

ASSOCIATED WOMEN STUDENTS—Maxine Smith, Brenda Daum, and Georgia Photopoulos, left to right, make arrangements for the AWS tea and fashion show.

Students May File Petitions For Office

Students who are interested in running for student body offices may now file petitions for candidacy with the admissions office.

Olga Ermoian, the commissioner of elections, said the petitions must be turned into the office by next Thursday.

Students who wish to run for office must meet the qualifications of the constitution of the Associated Students of Fresno City College.

Candidates must be members of the FCC associated student body, must be maintaining at least 12 units during the semester of candidacy, and must have at least a "C" average for their total college record at the close of the previous

semester and for the midterms of the current semester.

Candidates for the offices of student body president and vice president must have completed at least one year at FCC at the time of taking office and shall fulfill the requirements of all other candidates, and, in addition, must have at least a 2.5 grade point average for his total college record and at the midterms of the current semester.

Miss Ermoian said a nominations assembly will be held May 3 to introduce the candidates to the student body. The election will be May 11 from 8 AM to 3 PM, and the new officers will be installed May 26.

Students have a choice of 16 offices which are president, vice president, secretary, treasurer, 10 representatives at large, Associated Men Students' president and the Associated Women Students' president.

There are eleven additional positions on the FCC student council which will be appointed by the new student president with the approval of the new council.

These positions include the commissioners of assemblies, athletics, oral arts, publications, publicity, rally, scholarships, social affairs, student welfare, elections, and the parliamentarian.

These positions do not have a voting privilege on student council.

David Hanna, the student body president, expresses his hope that many students will run for office. He said that the general feeling of many people connected with student government is that, although there are many qualified students who would do a good job in office, they don't run because they lack confidence.

Students Sponsor Tea, Fashion Show

An Oriental tea will be held Wednesday at 3 PM in the social hall of the student center to honor the senior girls of the Fresno City high schools.

The Associated Women Students, with the assistance of the sewing class, is in charge of the affair.

Miss Doris Deakins, one of the AWS sponsors, commented that the tea will have the added importance of marking the first time in the history of the college that the

AWS will be able to serve a tea with all the necessary appointments.

Miss Deakins and Mrs. Norma Carpenter, the other AWS sponsor, are extending an open invitation to all FCC coeds. Senior girls have been invited from the following high schools: Bullard, Fresno, Edison, McLane, Roosevelt, Fresno Continuation, and San Joaquin Memorial.

Features of the tea will be a fashion show featuring sports clothing, and entertainment arranged by Lowell Spencer, an FCC music instructor.

The receiving line will consist of Miss Daum, Miss Deakins, Mrs. Carpenter, and Robin Ann Hebrand, the vice president of AWS.

Clyde Sumpter, the drama instructor, will be in charge of carrying out the Oriental theme, which is being used for the second successive year.

Miss Deakins said AWS stages at least one tea a semester. This gives FCC coeds experience in the proper way of serving and receiving at social functions. She said the teas aid in carrying out the aim of AWS, which is to further the interests and to coordinate the activities of women students on the FCC campus.

Virginia Collins is in charge of

the refreshments; Evelyn Evans, entertainment; Joyce Johnson, serving; and Marilyn Ekizian, decorations.

Home economic students modeling their own creations include Deborrah Williams, Peggy Bond, Johnette Labrue, Peggy Woodward, Mariangela Montagna, Midge Young, Hallie West, Karen Cates, Becky Sturgis, and Darlene Frinchaboy.

Other coed models will be Maria Angelina Casares, Sherry Smith, Julie Rockel, Joyce Johnson, Shirley Goldf, and Miss Ekizian.

Citizens' Council Selects Bond Issue Campaign Theme

"Give our children a full measure of education." This is the theme selected for the new educational campaign by the citizens committee for the Fresno City Schools bond issue which will be voted on in the primary election June 7.

The Fresno City Board of Education voted to place the \$17,512,760 school bond issue on the June 7 ballot. If the voters accept the bond issue, the FCC share would be \$1,403,320. This share would be used in adding and improving the facilities at FCC.

Proposed Facilities

Some of the additional facilities considered at FCC are the construction of new physical educational facilities which would cost \$850,000. This would be for a 42,000 square foot gymnasium costing \$750,000, and a \$100,000 swimming pool. Site acquisition for these two facilities would cost \$206,000.

Also, additions costing \$143,350 would be added to the cafeteria. Of this money \$90,000 would be used for the new 5,000 square foot dining area, \$28,350 to increase the kitchen space by 1050 square feet, and \$25,000 would be spent for refrigeration.

For contingency an estimated 5 per cent of the \$49,668 construction costs would be set aside. Furniture and new equipment for these new facilities would cost \$50,000.

Bond Issue Publicity

There is one problem facing the publicity subcommittee of the citizens' committee. This is the \$5,000 needed for publicity purposes.

It is illegal to use public or school funds to influence the result of an election, so publicity is being handled by the Parent Teacher Association and through contributions of firms to inform the householders of the school bond issue.

In addition to the school bond issue, a fact finding committee was formed at the request of the Board of Education to help determine the present and future needs of the school system.

CJCA Elects White Association President

Fresno City College President Stuart M. White was elected president of the California Junior College Association at the association's annual spring conference in Santa Monica.

He succeeds Bill J. Priest, president of Sacramento's American River Junior College.

White presided during the administrator's session where the technical committee discussed "Maps," the master plan survey.

The Maps recommendations affecting four levels of higher education were revised four or five times before passing the legislature.

Enrollment Increases

White said, "One effect will be to increase junior colleges' enrollment by about 50,000 students above the normal expected increase over the next 10 years."

The 50,000 lower division students will be diverted to junior colleges to implement more fully the action of the Regents of the University of California and the State Board of Education in 1955 that, "The University of California emphasize policies leading to the reduction of lower division enrollment in relation to those of the upper and graduate divisions, and that the state col-

leges pursue policies which will have a similar effect."

The recommendation is for state colleges to select students from the upper 33 1/3 per cent of high school graduates and the Universities from the upper 12 1/2 per cent.

Areas of Responsibility

White said the areas of responsibility outlined by Maps indicates that the junior colleges of California must be prepared to take on this added enrollment.

White will attend a dinner meeting with some members of the California Junior College Association in Modesto Monday to help lay the ground work for recommended solutions, to the problem of financing. The CJCA will work this year to prepare recommended financing legislation for presentation to the state legislature next year.

Representatives Work For Student Welfare

In the last issue of the Rampage, an editorial appeared in this very same space which labeled all the student government officers as "dictators."

Although many of the statements Larry Adams made in his editorial were true, the fact remains that just because a condition for certain things exists, there is no reason to believe that they will be taken advantage of.

It is true there is no provision in the FCC constitution for a recall, but we on the student council feel that we have a better safeguard than any recall can provide for. This safeguard is an understanding and interested faculty. Speaking as a member of the student body I would rather place the responsibility for deciding between right and wrong in the hands of the faculty, not in the hands of a few hundred uninformed students.

Not that I don't think the student council is responsible to the students, which it is to the highest degree. Our first responsibility and obligation is to the students.

The fact was mentioned that the raising of the student body cards to \$10 a semester was a use of the dictatorial right handed to the council. The truth remains that the council was only exercising its right to provide for the welfare of the students. The fact is that the student body budget for the spring semester was \$4,000 over the income for the same period.

The spring semester budget was derived at after many meetings with the commissioners and sponsors involved in the 29 different accounts in the budget. It was not a hastily made decision, and many of the accounts were reduced from the first amount which was budgeted for.

The raising of the student body cards to \$10 is not a crime in itself. Many of the other junior colleges in the state have higher priced cards than that. Ten dollars is still a cheap price to pay for the education and recreation a student may receive at FCC.

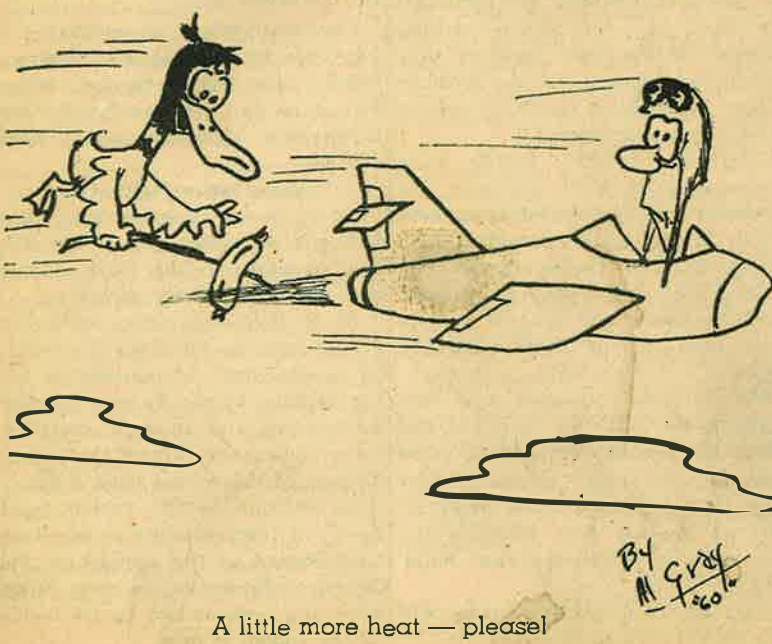

Another reference was made to the way the student body elections always seemed to be personality contests. I would like to know when and where an election was held on the junior college level that wasn't a popularity contest. In fact, many historians have said that Dwight D. Eisenhower was elected on the basis of his popularity. The person who is most popular with the voter as he or she steps into the polls is usually the one who receives that vote.

Adams' editorial stirred up much controversy, which in no way can be harmful to the problems of student government at this school. Perhaps some of these interested students may find their way to the next council meeting. The meetings are open to the public, they always have been, and always will be.

Another reference was made to the effect that the provision for petition was "buried" in the constitution. If anyone would care to look, he will notice that Article X in the constitution, which pertains to initiative and referendum, is printed in the same size type as the rest of the constitution. If anyone would care to look for these provisions, I am sure they could find them without too much difficulty.

It would be even better if some of these students would find their way into the actual operation of student government itself. Petitions for student body offices are now available in the admissions office to all qualified students. There isn't a person on the present student council who would be disappointed if three or four candidates were running for each office.

The problems of student body government can only be solved by campus-wide interest and participation. The concern of the students in their own government will be shown in the interest and participation in the coming student body election. Will you be at the polls? David Hanna

Geologists Take Trips

A number of geology students at FCC were kept busy during the Easter vacation.

Francis J. Leyden, geology instructor, took eight Geology 12B students on a tour of the United States Geological Survey Headquarters at Menlo Park, Palo Alto, and approximately 50 Geology 1A students to the Kings River.

Leyden and the eight geology majors were conducted through the Survey's facilities by Dave Gallagher, resident geologist.

"The purpose of the trip," Leyden said, "was to acquaint the men with the duties of government geologists." He also implied that some of the students were interested in the job opportunities offered there.

The Survey Headquarters at Menlo Park has jurisdiction over the geological surveying of the west coast of the United States and Alaska.

The excursion to the Kings River was intended to introduce the students to geology in the field in contrast to geology in textbooks, Leyden said.

"It was to show them the geological history of the Sierra Nevada Range, erosional work of the Kings River, and various types of rock found in the Kings River Canyon," he continued.

The students were also shown the geology of Pine Flat Dam, and had an unexpected lesson in how to kill rattlesnakes. Leyden said he used a shovel on what he termed "a good example of what they call a Pacific rattlesnake" after some students encouraged the doomed snake to come down off its ledge with rocks.

Leyden announced plans for a trip to the Kettleman Hills on April 30, and another outing to the Drum Valley, east of Dinuba, on May 14, to inspect tungsten deposits.

Census Takers Get Training

The United States Bureau of Census will be conducting a training session today and tomorrow from 1-4 PM in M-131 on the FCC campus.

The first stage of taking the census has been completed in the area comprised of Fresno, Madera, and Merced counties.

Howard M. Norris, Fresno district supervisor of the census bureau, said that depending on the population density and the size of the area, it is sometimes necessary to complete the census in a two-stage operation. The first stage deals with the population count and the second with the housing questionnaires.

He said approximately one-third of the original crew will be trained for the second stage phase. Training is necessary because the tabulation is completed by recording the statistics on FOSDIC (Film Optical Sensing Device for Input to Computers) Books. The information is then transferred to magnetic tape which is fed to Univac in Washington, D.C.

Russian Instructor Hails From Latvia

By ANDREW FEDERICO

GIEB KALISTRATOV

Ram Editors Finish Book

Eight months ago, a small staff sat down and wondered how they were going to publish a yearbook.

Four months ago, this staff wondered how and when they would be finished on time.

In a few weeks, May 27 to be exact, the finished product of all this work and worry, the 1960 edition of the Fresno City College yearbook, the Ram, will be available to the students.

Arthur H. Margosian, the Ram advisor, said the contract calls for delivery on this date, but since the staff was a week early on the last deadline, there is a possibility the book will be ready for distribution before May 27.

Margosian said the theme of the annual is "Motion," which is based on the ever increasing emphasis that is being placed on speed.

The book, which is 132 pages long, is divided into five divisions — Sports, Administration, Academic Life, Activities, and the Sophomore Class.

The cover was designed by Eddie Wax, the Ram editor, as were the five division pages.

Margosian said this year's book would have no advertising. Explaining this, he said that the money derived from advertising would only pay for the paper it was printed on.

Gary Oberti, the business manager, said the book will go on sale again Monday. The price is set at \$3.00.

Oberti also explained the price will rise to \$3.75 in May. This is in accordance with the contract.

A feature of this year's yearbook is that all pictures were taken by student photographers. Margosian said no professionals were hired for any photography work.

Margosian said the staff is now starting plans for next year's book, which will help FCC celebrate its 50th anniversary.

Other editors, besides Wax and Oberti, are John Rea, sports; Virginia Collins and Carrol Jacobsen, copy; Ramdex, Shirlee Hogadone; and Rex Wangburg, photography.

Staff members are Rae Deane Pyatt, Jerry Jerner, Albert Johnson, Christine Harrison, and Larry Wilkinson.

The printing is being handled by Thomas Lithograph.

To look at him there is nothing to suggest that Alex G. Kalistratov, Fresno City College's Russian instructor, has lived anywhere other than the United States.

His dress is in the conservative style of any other instructor on campus and his office desk is as generally upset. It isn't until he introduces himself in an understandable accent that one realizes he is from another country.

Kalistratov was born and educated through the high school level in Latvia, a small country in the Baltics area. He is of Russian descent and his father was a member of Parliament and an officer in the Czar's army. He also fought vigorously against the communist revolution in 1918.

In 1940 Kalistratov was arrested by the Stalin regime for anti-communist activities, imprisoned and was then executed. It was in 1940 that communist imperialism reached out to Latvia, forcing Kalistratov to exile to Germany. He lived there until the end of the war and then started a medical career at the university of Munich.

Kalistratov came to the United States in 1949 and studied at the University of Pennsylvania. He was graduated in 1955 and accepted an offer of the U.S. Army to instruct at their language school on the West Coast. In 1959 he accepted an offer to instruct at FCC.

"I still correspond with friends in Russia," Kalistratov said. "I find that they have a strong curiosity about America. They want to know how things are here."

It is Kalistratov's belief that the Russians need to know more about the United States. He thought that the only way this could be possible was through the support of a radio free Europe.

"The children of Russia are raised in the fear of communist propaganda. They do not know anything else," Kalistratov stated.

Kalistratov's family is now living in the United States. He has a mother in Philadelphia and a brother in Los Angeles.

Lifesaving Course Offered At FCC

Anyone want a lifesaver? If you do, just drop around to the FCC pool any Tuesday, Wednesday, or Thursday evening and take your pick. The bathing-suited group of students you find there will soon be bona fide lifesavers.

The group of swimmers are enrolled in a 17 hour course offered by the Fresno County Red Cross Chapter in senior life saving. The course is required of those who hope to serve as instructors in the Red Cross summer swim program.

Four of the approximately 30 members of the class are FCC students. One of the instructors, Roy Havenhill, also attends FCC.

The senior life saving course will be followed by an 18 hour water safety instructor course in May, which also is mandatory for would-be instructors.

Lucius Powers, the Red Cross water safety chairman, said this will be the only opportunity to take the course this year.

Starting May 9 a combined Red Cross — YMCA lifesaving class will be started and will be available to all FCC students. Instructors will be Dr. Paul Pastor and Roy Havenhill, a student at FCC.

Coeds Attend World Affairs Conference

Vernie Morison and Linda Carol Miller have been selected to represent Fresno City College at the annual conference of the World Affairs Council in Monterey May 6-8.

Miss Doris Deakins, the dean of women, said that this is the first time FCC will have representation at the conference. The students were selected because of their scholastic standings and interest in foreign affairs.

In commenting on the conference program, Alvin J. Rockwell, council president, said, "This year's conference (the 14th) which precedes the Summit Meeting scheduled for the middle of May, will provide a timely opportunity to focus attention on the issues confronting us, now as well as in the decade ahead. The conference will examine in detail prospective areas of competition between East and West in the political, military, economic, and cultural fields."

The conference theme is, "Competitive Co-Existence — Dilemma of the 60's."

Leading guests and speakers will include: Their Majesties, The King and Queen of Nepal, who will be making an official U.S. visit in May; Walter W. Rostow, noted economist; Richard C. Hottel, CBS foreign correspondent; Dean Rusk, president of the Rockefeller Foundation; and Col. William R. Kintner.

Landscaping Job Nears Completion

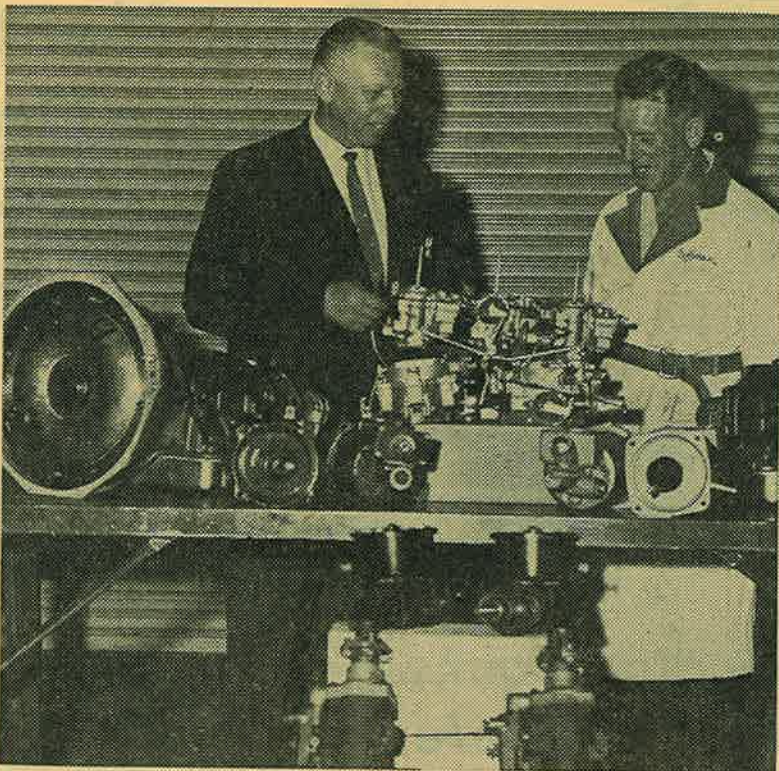

The \$20,000 landscaping job on FCC campus is nearing completion.

Stuart M. White, FCC president, said that extensive landscaping was done around the new technical vocational shop buildings. He said that in addition to the new shrubbery and lawns, an automatic sprinkling system was installed.

The new sprinkling system has a timing device with three master clocks to operate the system.

White said the sprinkling system works during the night at 15 minute intervals.

The entire landscaping project also included the new planting boxes in the center of the parking area, the remodeling and landscaping of the parking lot behind the library, the landscaping and sprinkling system in front of McLane Hall and a better lighting system around the new shop buildings.

AUTOMOTIVE EQUIPMENT — George Wall, left, service manager of a local automobile sales agency, presents Charles M. Coffman, Fresno City College automotive mechanics instructor, with more than \$2,000 worth of automotive equipment.

Group Schedules Speech Contest

Fresno City College's Forensics Club is sponsoring the first annual FCC club and organization speaking contest, in which all of the clubs on campus have been invited to compete.

All students who are currently or who have taken speech 25 are disqualified.

The topic of the speech, which is to be no more than eight minutes in length, will be "How the (name of club) Helps Students to Become Better Citizens." Notes may be used; any style of delivery is acceptable; however no more than 150 words out of the speech may be quoted.

The sponsoring club and the winning speaker's name will be inscribed on a perpetual trophy.

The contest will be held on April 28 at 11:00 AM in B-7. Entries are due today in Mr. Weinchen's office, M 128, at 3:00 PM.

Class Receives New Materials

Approximately \$2,000 worth of automotive equipment has been presented to FCC. The equipment will be utilized as demonstration aids in automotive mechanics and automotive transmissions classes.

Charles M. Coffman, an FCC automotive mechanics instructor, arranged for and accepted the equipment donated by the Cadillac Motor Car Division of the General Motors Corporation.

George Wall, the service manager for Fresno Motor Sales, made the presentation.

The equipment included: hydraulic transmission, carburetors, two types of power brake assemblies, and power steering assemblies and pumps.

Club News

Students Make Plans For Spring Formal

By JOHN CRIDER

The Associated Men Students and Associated Women Students are having a joint meeting today at 11 AM in Room B-6.

Miss Doris Deakins, AMS sponsor, said that the joint meeting is for the purpose of making plans for the annual spring formal.

She said the dance is to be held May 13 at the Rainbow Ballroom. Keith Williams and his orchestra from Hollywood will play at the dance.

Miss Deakins said that every student is invited to the meeting today and also to the dance in May.

Latin American Club

The Latin American Club will be host to William Sherman, field secretary for Mexico City College on May 8.

Ana Marie Arzate, publicity manager for the Latin American Club, said that Sherman plans to visit several Junior Colleges in California besides FCC.

She said he is going to interview students from FCC who would like to know about the possibilities of studying at an American college in Mexico City. Sherman has stated that Mexico City College is fully accredited in the Southern Association.

During the holidays the Latin American Club had a meeting where food was collected and boxes were decorated to be distributed to needy families in and around Fresno.

Jenny Vasquez, chairman of the committee, said the food baskets were given out Saturday.

Alpha Gamma Sigma

The Alpha Gamma Sigma, honorary society, is having a meeting today at 11 AM in the committee room.

Dr. Paul J. Pastor, AGS sponsor, invites all AGS students to attend the meeting. He said that Charles F. Overs, scholarship chairman, will give a speech.

Lions Club Honors FCC Instructors

Three FCC instructors, Miss Nellie A. Bartlett, Miss Kate E. Darling and Mrs. Hazel Pederson were among five teachers honored by the Fresno Lions Club luncheon Tuesday.

They were selected as representatives of the teachers in the Fresno City schools with the longest consecutive years of service.

For several years the Fresno Lions Club has honored the teaching profession by paying tribute to representative teachers each year.

Miss Bartlett has been an instructor at FCC since 1954, Miss Darling and Mrs. Pederson have been at FCC since 1948.

This airplane is actually a flying classroom. The course taught in it is Air Navigation, under *real* conditions. The students are young men who have been selected as possible future leaders of the Aerospace Team. Graduation after 32 weeks of training will win each of the students the honored silver wings of an Air Force Navigator and an Officer's Commission.

For certain young men, this training can open the way to a bright career of executive potential. Right now the Air Force is scoring impressive technological advances in the fields of navigation, guidance and tracking, electronics and radar. And here is where its highly trained and experienced Navigators will be expected to take over command positions of increasing responsibility.

To qualify for Navigator training as an Aviation Cadet, you must be between 19 and 26½—single, healthy and intelligent. And you must want to build an exciting, interesting career in the Aerospace Age. If you think you measure up, we'd like to talk to you at the nearest Air Force Recruiting Office. Or clip and mail this coupon.

There's a place for tomorrow's leaders on the Aerospace Team.

Big Meet With COS On Schedule For Saturday

By JOHNNY NOBLE

The Fresno City College track and field team will host the College of the Sequoias Giants, Saturday at 7:30 PM in the McLane High School Stadium. This meet will be an indicator of the outcome of the Central California Junior College Athletic Association league.

The Giants could well be the toughest competition that the Rams will encounter this year. The Giants have one of the finest quarter milers in the state, Pete Petrinovich, who has run the distance in 49.1.

The Giants have three men who have all cleared the bar in the pole vault at better than 13 feet. Fresno has none that could compare with this effort.

Rams In Weights

The Rams are considerably stronger in the weights with men such as Harry Edwards in the discus who has tossed the weight 169 feet and Chet Rooters in the shot put with a throw of over 50 feet. COS has no one who will come anywhere close in these two events.

In the high hurdles the Giants are extremely strong, with three men running the distance around 15 seconds. They also boast three men in the low hurdles who run around 24 seconds. The Rams have two fine performers in these two events in Ron Tinkler and John Kruzic, but neither man has had time as good as the COS men.

Gene Johnson of the Rams, who has had a jump of six feet two inches in the high jump, should prove to be stiff competition for the COS jumper, Ron Kissick, who has had some outstanding jumps this year.

Dashes Provide Competition

Clark Bridgman should give Bill Hall added depth in the 100 yard dash, Hall's specialty. Hall has a record time of 9.8 in this event and is expected to come through with a first place. He has also had a record time of 21 seconds flat in the 220 yard dash and should take a first place in this event, although the Giants have a man who has run this event in 21.7 seconds.

The Giants are the defending league champions and would like to maintain this title, but the Rams have a different opinion on this controversy. The Giants are considered a little stronger in team depth, and if this is true, the Rams could be in for some trouble.

This meet will be the last dual meet of the season for the Rams and should prove to be of top-notch caliber. All Ram fans are strongly urged to attend this meet.

Giants Beat Rams; Rams Trip Tigers

Coach Paul Pastor's Fresno City College swim team will travel to Visalia Saturday for their Central California Junior College Athletic Association Championships.

Although the Rams have had a disappointing season, they will be looking forward to some individual bests from some of the swimmers. College of the Sequoias is the favorite. The Rams nearly upset them Apr. 7 in the FCC pool.

The Giants took the meet by winning the last event of the day which was the 400 yard freestyle relay, winning 51:39.

However the Rams won a hard fought meet with Reedley College a day following the COS contest. The Ram tankers were paced by Ave Minasian, Dan Opperman, Stan Bush, and Sid Craighead who all picked up first place victories.

Following the league meet the team will be preparing for the Northern California Junior College championships in Vallejo Apr. 29-30.

Trackmen Do Well During Easter Week

With a tremendous effort of 57 points, the Fresno City College Rams downed the University of California at Los Angeles Freshmen and the Reedley College Tigers in the tri-track and field meet with the UCLA Freshmen acting as host, Saturday, Apr. 9.

Harry Edwards, who is known around the FCC campus as "the giant," had one of his better throws of the year against these two teams. His throw of 162 feet two inches captured first place.

Bill Hall, FCC sprint star, again turned in a time of 21 seconds flat in the 220 yard dash, which was an easy first place. Hall also took first place in the 100 yard dash with a time of 9.8 seconds.

The Rams traveled to Santa Barbara Saturday for the annual Easter Relays. They made a good showing, finishing with a strong fifth.

At the Santa Barbara Relays, the Rams were in competition with four-year colleges as well as other junior colleges.

Edwards was the only Ram thinclothed to bring home a first place, although Hall and Johnson took seconds in their events. Edwards had a throw in the discus of 157 feet nine inches.

Sting-Rays Will Accept Members

Skindiving enthusiasts are invited to attend the second official meeting of the newly organized diving club, the "Sting-Rays."

The club, barely a month old, is ready to accept new members, announced Bill LaFeber, publicity director and charter member.

"We will take anyone from 16 to 99 years of age, whether he is an experienced diver or a novice," LaFeber said.

In order to join the club a prospective member must be a fair swimmer, and have swimming flippers, goggles, a snorkel, and some sort of a safety pack, LaFeber said.

Full membership will not be awarded until tests in distance swimming and buddy breathing have been passed.

Club functions will include training, instruction, meetings, and dives along the coast as well as locally.

LaFeber pointed out that membership in this club will automatically mean membership in the National Skindiving Association, thereby making members eligible for any national competition.

The second meeting will be held Apr. 27 at 7:30 PM at 1316 N. Blackstone Ave.

BOB HART

Death Claims FCC Athlete

Hang up No. 56! Last semester's football team was led by this number in its first two games, and much of the team's chances hinged on the feelings of the wearer of this number.

On the first night of the Easter vacation, Apr. 9, the shadow of death overtook a 1960 model Porsche Speedster and claimed the life of Bob Hart and two of his companions.

As reported by the California Highway Patrol, Hart, who lives in Madera, and Russ Birch, also of Madera, were killed almost instantly at 4:40 PM. The traffic accident took place on California Highway 41, six miles north of the Highway 145 junction.

The patrol reported that the car apparently went into a curve too fast and rolled. It slid down a rockfilled gully, throwing all three occupants from the automobile, killing Hart and Birch instantly.

Jerry Martin, a former student at College of the Sequoias at Visalia, survived the accident and was taken to the Madera Hospital. He died the following morning.

Hart, who was the starting quarterback for the Rams until he received a shoulder injury in the second game of the season, had thrown 20 passes and completed 11 for 78 yards and one touchdown. He was a top field captain and was heavily depended on, but the injury prevented him from ever wearing No. 56 for the remainder of the season.

Hart is survived by his wife of five months, an older sister, and his parents.

Jerry Weil Leads FCC To Easy Win

Led by Jerry Weil, the Fresno City College golf team soundly trounced Taft College, 36-0, at Muni, Apr. 7.

Weil shot his personal low of 36-31-67, which is the lowest score recorded this year at Muni. Duffy Allison and Bill Byrd shot lows of 73 and 77 respectively.

Allison, Norm Taber, and Chuck Wills reached the championship round in the Northern California Golf Tournament in Santa Cruz last Thursday, Friday and Saturday, but failed to place. Weil and Byrd were eliminated in the championship flight and failed to make the finals.

Rams Meet Porterville Team In Doubleheader

By LARRY ADAMS

The rapidly improving and clutch playing Fresno City College Ram baseball team will get back into league play Saturday when they meet the fourth place Porterville Pirates in Porterville, in a double-header.

These games will end the road season for the Rams and their next five games will be played either at Eulless Park or the Fresno State College diamond.

The Rams, after a miserable start, have now hit better than 50 percent in the win column with a 12-8 season record. Three of the Rams' four wins over the Easter holiday were by one run.

Bucky Hoover continued to baffle opposing hitters and extended his scoreless innings to 16. He will be one of the starting pitchers against Porterville. The other starting pitcher is a toss-up between Doug Atwood, Don Coulter and Tom Burkman.

Expected to start for the Rams against the Pirates is rapidly improving shortstop, Tom Jacobsen. Jacobsen accounted for two home runs and a triple in one game over the vacation. Joining Jacobsen in the infield will be Tom Burkman, first base; Pete Lango, second base; Jim Saunders, third base, and Ken Frankfort, catcher.

The outfield positions will be held down by leading hitter Joe Monis, in left field, Earl Cozart or Dan Rameriz in right field, and Glen Schmidt or upcoming Clark Bridgeman in center field.

With the Rams splitting with Reedley, they remained in a tie for second place, behind COS.

A week ago last Saturday, the Rams divided their doubleheader with Reedley College in a conference game. The Fresno team won, 5-0, behind the shut out pitching of Bucky Hoover and behind the hitting of Tom Jacobsen. Jacobsen paced the hitting attack with two home runs and a triple. Jim Sanders also hit a four bagger for the Rams.

In the nightcap, Reedley handed the Rams their first league loss of the season by eaking out a 3-2 decision in eight innings.

On the following Tuesday the Rams invaded San Jose City College and brought home a 10-9 victory behind the booming bats of Jacobsen and Clark Bridgeman who collected three hits apiece off three SJCC hurlers. The Rams pushed across the winning run in the ninth inning when Joe Monis scored on a passed ball.

The next day the hot FCC team knocked off Vallejo Junior College 7-4 behind the combined pitching of Doug Atwood and Hoover in Vallejo.

The Rams won their third straight by downing the Castle Air Force Base nine in John Eulless Park, 9-8.

Tuesday the Rams extended their winning streak by edging the strong Stanford JV's 9-8 at Palo Alto.

Lifesaving Course

A combined Red Cross and YMCA life-saving class will be offered to anyone attending Fresno City College. A temporary sign-up sheet is posted on the Bulletin Board at the pool and instructors Dr. Paul Pastor and Roy Havenhill urge students to sign up early.

Instruction will be given between 2-4 PM, Monday through Friday at the FCC pool.
