NUMBER

Dr. Peart Flies To Chicago To Assist in Education Program

Dr. Gilbert M. Peart, the coordinator of Fresno City College's merchandising field experience program, flew to Chicago Monday to assist the American Association of Junior Colleges and the Sears-Roebuck Foundation in planning a new program to improve distributive education programs in order to increase the supply of competent manpower in this field.

He is meeting with Oren T. Pollock, the foundation's director of civic affairs, and two officials of the association, Dr. Edmund J. Gleazer, Jr., the executive director, and Dr. Thomas B. Merson, the assistant director for commissions.

Dr. Merson, a former Bakersfield College dean of instruction, said Dr. Peart's advice is being obtained because he is "in charge of one of the better distributive education programs in community colleges and has recently completed his doctoral study of the importance of these programs across the nation."

Fresno merchants and Fresno City College are cooperating in FCC's program. Fourteen students are working on an average of 15 hours a week in retail, wholesale or service establishments while also attending classes at FCC. They are also enrolled in a merchandising field experience course

by which their work experience is supervised by Dr. Peart.

At the meeting Dr. Peart will describe how an effective distributive program in a junior or community college operates, and how it contributes to the manpower supply for local business.

He will also suggest what kind of help the foundation can give to selected colleges in two or three states to establish pilot programs.

Dr. Merson said that the goals of the project will be to motivate able students to select distributive careers and to recruit a continuing and adequate supply of competent manpower for each of the distributive fields and to stimulate colleges to develop appropriate programs.

Circle K Club Films Help March of Dimes

To help launch the 1963 March of Dimes campaign, the FCC Circle K Club has been showing a film to Fresno service organizations.

The 15-minute film, titled "Invitation," is an introduction to the MOD campaign. It features Jane Wyman and Dr. Frank Baxter of the University of Southern California.

Also helping with the MOD drive are the Circle K Club of FSC and the Key Clubs of Roosevelt, McLane and Bullard High Schools.

FCC Nurses Found Service Organization

A new club has been added to the Inter-club Council at Fresno City College with the formation of Phi Rho Nu, whose membership includes only those who are registered in the professional nursing program. The initials Phi Rho Nu stand for "pre-registered nurses."

Officers of the club include: Mrs. Betty Cavit, president; Robert Grisso, vice-president; Mrs. LeVella Phillips, treasurer; Sherri Zyen, secretary; Mrs. Frieda Kolmeyer, Inter-club Council representative and Mrs. Nancy Black, SNAC representative.

DR. GILBERT M. PEART

OFFICERS SHOE-INS IN ELECTION

Spring semester officers were elected at the election held last Monday at the campus. The election was unusual in that there were exactly the same number of candidates as there were offices available—thus there were no contests.

It had been hoped that last-minute write-in candidates would enter the race but none appeared.

Fred Faieta will serve a second term as president of the associated students and Fred Martin will be vice-president for a second semester.

Also elected were Janice Jackson, secretary, and Kathy Murphy, treasurer.

Jo Beth Jackson was chosen Associated Women Students president and Larry Krum was elected Associated Men Students president.

Five student council representatives-at-large were re-elected. They are Jim Anderson, Richard Anderson, Mitchell Bower, Jo Anne Terry and Jim Turpie.

The other student council representatives will be Dorothy Feldmann, Steve Garberson, Norman Stahl, Sandy Taylor, and Carolyn Poindexter.

The new officers will be installed Jan. 29 at the Sky Ranch Leadership Conference at the Sierra Sky Ranch.

Counselors, Deans to Visit 20 California High Schools

FCC counselors and deans will visit 20 high schools to tell the FCC story in the next four months.

Archie Bradshaw, dean of students, said the deans will visit local high schools and the counselors will visit out-of-town schools.

While visiting the schools and talking with the seniors, the counselors and deans will discuss the purpose and importance of a college education and the major functions of a junior college.

To aid them in their discussion they will show a series of slides.

Any questions the students may have about attending FCC or any other college will be answered.

The first visit is today with Bradshaw and the counselors at Sanger High.

The counselors, headed by Bradshaw, will visit Sanger, Los Banos, Central, Kerman, Madera Union, Chowchilla Union, Sierra Union, Washington Union, Caruthers, Selma, LeGrand and Dos Palos High Schools.

The deans will visit Fresno, Bullard, Edison, San Joaquin Memorial, Roosevelt, McLane and Clovis High Schools.

FCC counselors are Kenneth A. Wood, Dorothy D. Bliss, Joseph R.

Kelly, Gerald J. Fries, Dee Roshing, Kenneth M. Emme, Norvel R. Caywood, and Lawrence W. Martin.

Deans who will visit Fresno schools are Dr. Paul Nielson, FCC vice-president, James P. Collins, dean of letters, arts and sciences, Gervase A. Eckenrod, dean of business division and Robert P. Hasler, technical and industrial division dean.

FCC Students Placement Tests Now Available

The college placement tests for new students will be given Jan. 7, 14 and 22.

The first test will be at 8 AM in the auditorium, the second at 7 PM in M-200 and the third will be at 8 AM in the auditorium.

Students are expected to be ready to take the test ten minutes before the time scheduled. No late-comers will be accepted.

"If a new student at Fresno City College has already taken a national college placement test, such tests will be recognized here," states Archie Bradshaw, dean of the counseling division.

Bradshaw also stated that there will be no counseling after Jan. 29, and that the last day to register will be Feb. 1. There will absolutely be no late registration.

"Jan. 8 we will know whether the new gym will be completed for registration use," adds Bradshaw.

In order to register, new students must have a chest X-ray or have had one within the past year. The X-ray unit will be on campus Jan. 30, 31 and Feb. 1. It will be located in back of the auditorium.

If a student fails to show up for registration on the day and time signified on his line card, he must register on the last day.

Students now attending Fresno City College and planning to return for the spring semester are urged to begin registration early and try and take care of last minute problems before the last minute. Students are also advised to go as soon as possible to the office to pick up line cards.

Near Future Will See Gym Plaque

Construction on the new gym has reached a point where the new city college plaque is to be installed in the near future.

The student council approved the purchase of a new plaque to replace the Fresno State College plaque that is now in the library. It was decided that since an additional plaque could be purchased at a nominal expense, one would be gotten for the new gym.

The plaque is a reproduction of the official seal of Fresno City College. It is the same seal that appears on the official stationery of the associated student body, and on the books of matches that are available in the book store.

No official date has been planned for the opening of the new gym, but it is hoped to have it ready for the first league home basketball game on Jan. 25, 1963. That game will be with Stockton College.

Rampage Holiday

FCC students and the Rampage staff will have a vacation beginning tomorrow.

Students will leave tomorrow on an 11-day vacation but the Rampage staff will enjoy a slightly longer vacation. The next Rampage will be Jan. 10, three weeks from today.

All students, however, will return to their regular class schedules on Wednesday, Jan. 2.

SCALE MODEL OF CAFETERIA—This picture of an architect's scale model of Fresno City College's planned cafeteria shows the structure as it might be seen from University Ave. See story on page two.

A GUIDE FOR BAR-ATTENDERS

Chemists say that alcohol and gasoline do not mix, but despite their warnings, many people try to prove otherwise. They maintain that they are better drivers when they have a little "spiritual" fortification. Often they manage to weave their way home; other times they weave themselves into a freight train, or another car.

College students are far from innocent in this matter. Most of them are excellent drivers—when sober. Otherwise they are no better than the local tee-totaler.

Alcohol affects the system in strange ways, some beneficial, others harmful. On the road alcohol is a deadly killer. It creates a false sense of security and well-being. It contributes to the disregard of the white line and the red light. It can lead to the violent end of a holiday, for vacationing families as well as the tipsy party-goer.

In short, a little temperance and good judgment can go a long ways toward keeping out of jail (and out of the morgue).

Holiday Season Not So Commercial Abroad

By INEZ MARTA

Although American promotion men would not have us know it, Christmas is celebrated in other lands for what it IS. Here are some of the customs of the holiday season as it is celebrated in other lands.

Since there is a scarcity of fir trees in Ireland, the homes there are gayly decorated with holiday greens. There is much to eat and drink, with the traditional goose as the center of the dinner table. Young Irish boys have a unique way of collecting gifts. They capture a wren and put it in a gayly decorated cage and extend it atop a long pole. They then carry this from house to house singing a song that suggests that people give a gift.

Red Christmas?

In Russia, Christmas celebrations are now banned. Formerly, however, it was a time of great social and religious celebration. The singing of many merry folk songs has long characterized the Russian's way of celebrating Christmas.

The Christmas tree is the center of festivities in Germany. Every family has at least one tree—some have more. Gifts are brought to German children by "Kris Kringle." He often leaves a switch as a warning to a naughty youngster. On Christmas morning there are widespread services in the various churches.

Treat For Reindeer

Wooden shoes are lined on the

doorsteps filled with hay to feed the reindeer of St. Nicholas. The original St. Nicholas was a bishop of Smyrna. According to the legend, he gave gifts to the three daughters of a poor tradesman.

Council OK's Gym Plaque

A plaque bearing the official seal of Fresno City College will be installed in the nearly completed FCC gymnasium.

The student council approved the purchase of the plaque since the emblem appearing on the library bears the insignia of Fresno State College.

The FCC emblem is printed on the official stationery of the associated student body and also on the covers of the matchbooks available in the book store.

Although no official completion date has been set for the gym, it is hoped that it will be ready for the Jan. 25 basketball game against Stockton College.

At Last

Board Approves Cafeteria Plans

Preliminary plans for the FCC cafeteria were approved at the Dec. 13 meeting of the board of education.

The plans include air conditioning and the most modern of equipment to make this building last for many years. The hopes of the administration are that the building will be ready for use by September 1964.

The building has been designed to blend with existing buildings on campus. It is also planned so that it can be expanded in the future.

Additions Pending

The board approved the cost estimate of the architects Walter Wagner and Partners. The basic cost is estimated at \$627,120.04 for the main cafeteria dining room, kitchen and faculty dining room. There also is a first alternate, which is hoped can be built at the same time if the cost for the main building is close to the estimate. It consists of the coffee shop and a covered passageway. The cost of this unit is \$97,113.19. Another alternate to be built under the same conditions as the first, will be for an outside dining terrace and site development. It will cost \$7,024.29. All these, including all fees and costs, come to a total estimated cost of \$731,257.52.

Now that preliminary plans

have been approved, the architects will draw the working blueprints. After the board of education approves these plans and they are checked to see if they meet the state architectural standards, the project then will be put up to bid.

Start This Summer

President Stuart M. White stated that he hoped that the bids will be advertised in June or July. Construction will then take approximately one year. It is hoped that the building can be in use by September, 1964.

After the cafeteria is moved into the new quarters, the present cafeteria will be remodeled into a new student lounge.

The new building will be located where the bungalows are now. It will complete a mall from the University Ave. parking area to Weldon Ave., with the main entrance of the new gym at the Weldon Ave. end.

Buzzing Around

Talking Satellites May Ruin Our Image

By TOM WALLS
Feature Editor

★ ★ ★ ★ ★

A Stanford University professor, Ronald N. Bracewell, recently made a rather thought-provoking statement. He said that it was likely that the first contact between the planets of the universe will not be made by the inhabitants thereof, but by communications satellites sent aloft for that purpose. The satellites, or "probes" will meet and discuss affairs on their respective planets, then return home with the scoop.

This says much for the genius of man, professor, but do you think we can trust a mechanical device to present a true and objective description of life on earth to other curious machines?

I mean picture a Martian space probe returning to that planet and reporting to the Martian scientists. I suspect the report would sound something like this:

"Gentlemen, I have Mars-shaking news to report. I have made contact with a talking space machine from the planet Earth. He was quite a personable fellow, but after talking with him over Strontium-flavored milk shakes served in the milky-way, I must hasten to suggest that in the future we make a valiant effort to avoid all contact with these people. They definitely have serious problems.

"They talk about love of neighbor and the equality of man, yet they cut each other to ribbons over their right to sit in certain sections of restaurants. They preach endlessly about the evils of war, but they wage fierce competition to build bigger and more death-dealing weapons. They cry in their beer about the slaughter on their highways, yet they continue to build faster and more powerful autos. They hold investigations of loyalty organizations, and then investigate the investigations!

"No gentlemen, at present I cannot recommend further attempts at establishing relations with the people of the green planet, but perhaps we should be patient. After all, they have only been around for some four million years; perhaps with a little more maturity they will learn to get along with each other. Then maybe we can consider having them get along with us."

End of report.

Jaycee Group Trains Leaders

Two years ago American junior college leaders — with financial backing from the W. K. Kellogg Foundation—created a nationwide "executive development" program to seek out and train administrative talent for the burgeoning junior college field.

Known as the Junior College Leadership Program, the \$1½ million four-year effort already has contributed deans, department heads and presidents to junior and community colleges in many parts of the nation.

The first graduate of the Teachers College, Columbia University program, George G. Erbstein, recently was appointed dean of the evening, extension and summer school divisions of Montgomery Junior College in Maryland.

Nine participants in the University of Texas program, some of them with their doctoral work fully completed, are now on junior college campuses in various capacities. One of them, Lamar Fly, has moved into the presidency of the new Hill Junior College at Hillsboro, Tex.

"The success of the program can be measured only in terms of the quality of its graduates, and there is ample evidence that this executive development effort is achieving the goals set for it," says Edmund J. Gleazer, Jr., the executive director of the American Association of Junior Colleges.

Gleazer explained that the program aims at identifying, selecting and encouraging qualified young men and women to enter the junior college administrative field, and at the same time provides intensive inservice programs for persons already occupying executive positions.

Debaters Win Own Tourney

The Fresno City College debaters, under the guidance of advisor Frans Weinschenk, edged Pasadena City College and six other schools in winning the Fresno Team Championships held last Friday and Saturday on this campus.

FCC, scoring 215 points to Pasadena's 207, was led by Bob Rogers, Karen Hayes, Don Petrucelli and Richard Anderson. Rogers placed second in the individual point standings with 40. Miss Hayes contributed 39 points, followed by Anderson and Petrucelli with 38 each. Ronald Manuto contributed 28 points to the FCC total and teamed with Anderson in the team competition.

The team of Rogers and Petrucelli turned in the most impressive performance for FCC in the team events, winning four out of five debates. Miss Hayes and John Beth Jackson combined to win three of five events, losing twice to Stockton College.

Circle K Club Sorts Mail For M-O-D

Circle K Club members will assist with Christmas activities for the Veterans' Hospital and the March of Dimes.

They will process mail for the March of Dimes, Dec. 27 at 7:30 PM at 165 North Fulton.

On Jan. 2 they will assist in removing Christmas decorations from the Veteran's Hospital.

Phi Beta Lambda

Phi Beta Lambda, business society, will sell chocolate bars today and tomorrow from 10 AM to 1 AM in the foyer of the student center.

Latin American Club

Latin American Club will have a pre-holiday picnic Saturday noon in Kearney Park. Henry Peralta, club president, said the affair would be held "rain or shine."

Saturday evening the group will hold a party in the Funston Hall at 7:30 PM.

Through indecision opportunity is often lost—

RED TAIL HAWK—Dean Pepper, Biology 2a-2b teacher, received this non-flying red tail hawk when a neighbor heard that someone had shot a hawk. The neighbor found it with the help of his dog, who unfortunately found the bird first and came out fighting with a split nose. Elroy Robinson, Biology 1b instructor, says he has found respect for the chicken size fowl when the bird got loose. In catching the hawk, he received claw marks on the forearm.

Second Federal Program Aids New FCC Nurses

Fresno City College has started its second program under the Federal Manpower Development and Training Act of 1962 to train unemployed women in geriatrics to become nurses aides who will care for aged persons in rest homes.

Dean Robert P. Hansler of the technical and industrial division said the federal government has allocated \$9,425 for the program in which 25 women are attending a six weeks' course in the FCC vocational nursing laboratory in McLane Hall.

Government Reimburses

The national government completely reimburses training institutions for their expenses; the college will receive \$4,200, while \$5,225 is being allocated to pay subsistence to the students.

The women attend classes from 10 AM to 5 PM daily for 30 hours a week and will receive an average of \$38 per week and a maximum of \$43. Mrs. Frances Elsner, a registered nurse, is the instructor.

Women Receive Help

Hansler said some of the women, most of whom are between 35 and 45 years of age, receive only \$20 a week, and some get nothing. The exact sum, he said, depends upon the need of their families. Under the provisions of the law all of the students must be unemployed and need training for employment in a new occupation.

Hansler said the motivation for the program in geriatrics came from requests of local rest and nursing homes and a study by the Fresno office of the state department of employment. The office screens applicants for the program and refers them to the college. It also assumes responsibility for placing them in jobs after they complete the course.

Office Contacts Homes

The office contacted 35 homes, which will pay a starting wage of \$1.50 per hour to the women. In September the college start-

ed its first program under the act to train welders. The government allocated \$42,240 to train 24 men in a 42-week course.

Screened Women

Hansler said the department of employment has screened 100 women for a proposed vocational nursing program. However, he said the college is not able to assume responsibility for this program at present because of a shortage of hospital facilities.

Fresno State College is sponsoring a program in vine and tree pruning.

Girl (on doorstep at end of date):

"Since we've been going dutch all evening, you kiss yourself and I'll kiss myself."

Top Analyst Offers New JC Reforms

Legislative analyst A. Alan Post has offered an 18 point program to improve California's junior colleges.

Post proposed changes in what the colleges teach, how they're financed and how they're run.

His recommendations, submitted to a joint meeting of the senate school and finance higher education subcommittees, include:

Form a state occupational education standards commission to approve junior college vocational programs.

Adopt Standards

Adopt minimum standards for all junior college courses, covering content, attendance, objectives and admission.

Study the formation of a broader JC tax base by partially shifting from district taxes to a state-wide property tax.

Require every JC district to plan a full year program of instruction, in order to get the maximum use from junior college facilities.

Student Fees

Set minimum fees of \$10 for every full time student, \$250 for every full time non resident student, and \$5 a credit for every student who has earned an associate or higher degree. Increase adult education fees toward the full tuition level.

Review junior college open door admission policies to determine the effect on the quality and cost of instruction.

Post: Cut Aid

Post also recommended reducing JC basic aid from \$125 to \$120 a pupil a year, and keying junior college support to the cost of the first two years of education at state colleges and the University of California.

The state board of education at its November 30th meeting put off action on a department of education proposal similar to Post's recommendation of a state-wide property tax for junior college support.

FCC'S PRIDE IN THE RING—Gabe Terronez displays his tremendous punching power against Charlie (Tiger) Smith in their first fight when Gabe knocked the San Franciscan out after 45 seconds had elapsed in the first round.

Gabe Terronez—Student, Fighter, and Gentleman

In June of 1958, less than three months after his 18th birthday, a United States Marine called "Gabe" entered a boxing ring in the Hawaiian All-Marine Championship Tournament for his first amateur fight.

Today, some four and one-half years later, Gabriel Terronez, an FCC student, a boxer, and a gentleman, holds the California State Welterweight championship and is already negotiating for a fight with well-known boxer Gaspar Ortega.

The Hawaiian Marine tournament offered Gabe an opportunity to start a career in boxing, a dream he acquired as a youngster while his older brother Roger was boxing professionally in the middle-weight division.

Won 31 As Amateur

His four-for-four victories in the tournament started a string of fight wins that carried him through an amateur career of 31 wins and 3 losses and has extended into his professional career that lacks about two months of being two years old.

As a professional, Terronez has 17 wins including 14 knockouts, two against Charley (Tiger) Smith, in a total of 19 fights.

Smith fell victim to Gabe's powerful blows Sept. 11 when he dropped the state title after 45 seconds were gone in the first round and again in a return bout Dec. 12 after two minutes and two seconds of the second round. The sequence of photos on this page shows Gabe knocking out Smith in their first bout.

Started Young

Terronez first started going to the Merced Street Gym as a youngster some seven, maybe eight, years ago but didn't go into training until he was 17 years old.

His present manager, Pat DiFuria, a native of Fresno, picked up on Gabe shortly afterward and has brought the promising boxer into western prominence. DiFuria managed Gabe's brother and handles Irish Wayne Thornton, another Fresno professional.

Although Gabe, a language major at Fresno City College, has a bright future in the ring, he plans to terminate his career as a boxer to become a teacher in five or six years.

As for his immediate future, Gabe plans to go to school another semester at City College and then to Fresno State while aiming for bigger fights in the ring. When asked about his ambition as a boxer he said, "The ambition of every fighter is to be the champ," he continued, "I would like to be a success as a person and as a fighter."

Hand Injury

In his last fight with Smith, Terronez suffered a hand injury which should keep him from any serious training for a couple of weeks.

Hand injuries have been a problem with Gabe since his boxing career started, the worst being in his first ten-round main event against Tommy Jefferson. Gabe considers the Jefferson fight the roughest that he has had in regards to personal injury. After the fight, which was Sept. 12, 1961 when he won by a decision, he had a dislocated thumb, a badly cut eye, and battered kidneys.

Terronez, who was born in Leon Guanajuato, Mexico but spent most of his life in Corcoran, Calif., regards an Ortega fight as a step in the right direction. "It would be a big boost to get past him," says Gabe. "I can figure on going all ten rounds wide open if I fight him. He can take a punch along with the best of them."

Valley Sports, the company which sponsors Terronez's fights, reports that a fight with Ortega may be delayed because of pending negotiations between Ortega and Joe Brown, a ranking welterweight.

Rams to Host Tourney Against Rugged Foes

By RICH SALAIS

The powerful Fresno City College Ram quintet, riding on a nine game winning streak, will host the first annual Fresno City College Invitational Tournament this Friday and Saturday in the Roosevelt High School gymnasium.

The talented Rams, led by a well-balanced scoring frontline, swept to their eighth and ninth consecutive victories of the year by knocking off the tough Bakersfield College Renegades, 78-70, and the stubborn San Jose College Jaguars, 94-82, the past week.

Fresno's superior height and experience again proved too much for Bakersfield as the Rams upended the oil city hoopsters for the third time this season.

Forwards Rich Turney and John Loyear and guard Billy Hicks led the scoring for Fresno with 14 points apiece. Defensive demon Lonnie Hughey, a 6'7" freshman center, was the surprise of the game by holding the highly regarded Loren Thomser of the 'Gades to only 12 points.

The San Jose Jaguars held their own for over half the game after trailing the Rams by only two points at halftime. But San Jose, using a fullcourt press, ran into foul trouble.

Foul Trouble

Jaguars Ben Pope and Lee Scarlett, a pair of fine outside shooters, each picked up four personal fouls and were forced to play sparingly. Thus Fresno capped by Hughey's 27 points, and the floor work of diminutive guard George Monreal outran the San Jose club to victory.

Ram Coach Joe Kelly will be without the services of regular starting guard Steve Mazzoni for the coming tournament. Mazzoni, a 6'0" defensive specialist, sprained an ankle against San Jose. Rich Turney leads the club in total points with 167 for an 18.0 average.

Top Teams

The Fresno Invitational Tournament could very well be a preview of the coming state JC playoffs as three of the teams entered are regarded tops in California. Always tough Alan Hancock of Santa Maria and the Oakland City College Thunderbirds are rated as two of the top JC squads in the state.

The other entry comes from Compton College which figures to have a rough time against Fresno in the opening round. Hancock will meet Oakland following the Fresno-Compton tilt. Game time for both nights is scheduled for 7 P.M.

Grapplers Top Cabrillo, 25-5

The Fresno City College wrestling team picked up its second non-conference dual victory last Friday, shellacking Cabrillo College, 25-5.

The Rams won seven of eight matches as big 230 pound Jack Vernick remained undefeated over the season with a decision over Bill Matson in the heavyweight division.

Other victories for the EC grapplers were Jim Cox, Ed Cox, John Oller, and Ed Kerby on decisions, and Don Johnson and Fred Andrews by forfeits.
