

Caught in the act.

Shoplifting: problem at all stores but not bad at FCC

"I don't think it's of major proportion here. But, we undoubtedly have some problem."

So commented James Stoner, FCC bookstore manager, on shoplifting, a common problem to those in the business of selling.

The tell-tale signs are there; merchandise in the wrong place, empty packages. No particular item is focused on--anything is subject to being lifted.

"It's a delicate problem to discuss," Stoner cautioned. "It can become a challenge to potential shoplifters."

Stoner was unable to say how much money is lost each year to shoplifting. He explained, "It would be impossible to determine with our system of inventory. We're on a cost

system; with the inflation factor, the losses are covered up."

Stoner said all different kinds of merchandise are taken, as well as new textbooks later returned for the full price. Kenneth Shrum, campus Chief of Police, said the big surge comes at the beginning of each semester, with the run on stolen books at the semester's end.

Of the cases of lifting which do occur, Stoner says, "We have caught shoplifters, but you never really know how many are getting away."

Shrum said the campus police have cited five or six shoplifters this year. Prosecution involves citation to the Municipal Court, as with a traffic ticket, unless there are extenuating circumstances such as resisting arrest.

FCC doesn't seem to have as bad a problem as two previous campuses at which Stoner worked, Indiana and Kansas Universities.

"I don't know if it's that there are campus security people around (here) at all times—I'm sure that must have some deterring effect," Stoner speculated. "There are always uniformed people in and out of the store, buying popcorn, etcetera."

Stoner also pointed out that the two universities which had many problems in this area were residence campuses, whereas FCC is not.

To attempt to prevent shoplifting, Stoner said the staff is instructed to watch for customers in need of assistance. He explained, "The best approach for a store the size of this one is an alert staff."

Acting chancellor is commencement speaker

Gus Guichard, acting chancellor of the California Community Colleges, will be Fresno City College's 1977 commencement speaker.

Graduation exercises will be held at 8 p.m. Tuesday, June 14, in the Fresno Convention Center. About 1,177 students will be eligible to receive degrees.

Guichard was executive vice chancellor of the state's community college system and was appointed acting chancellor by the system's board of governors

following the resignation of Sidney W. Brossman earlier this school year.

He was a probation officer, juvenile counselor and a California Youth Authority teacher before taking various educational jobs in the San Francisco Bay area which led in 1970 to the state chancellor's office as dean of Extended Opportunity Programs and Services.

He provided early leadership in establishing EOPS guidelines and policies.

ASB president, advisers comment on Senate snafus

"We have an almost unworkable constitution. That along with the fact that many of the senators did not take the time to even show up to the Senate meetings puts us not much ahead of last semester," said ASB adviser Doug Peterson.

"A lack of trust on the part of the students toward the ASB is evident in this spring's Senate performance," commented Doris Deakins, dean of women. "We should attempt to start all over with a new organization."

"With the five people on the

ballot for today's election, we should be able to have a quorum by next meeting. I'm just keeping my fingers crossed because we have to adopt an interim budget next week," said Dave Schroeder, ASB president.

Such are the feelings of three top figures in the ASB scene on campus. Their feelings reflect the performance of the ASB Senate, which has failed to make a quorum in three of the last four meetings.

"It is unfortunate the last election was invalidated as it was but this is due to the fact that

those responsible did not see that the voting took place," said Peterson in reference to the recent election which was rescheduled after being invalidated due to the fact that the polling place was not manned at night for student use. "Although I'm sure an invalid election is a common occurrence in ASB throughout the state, I still don't see us much ahead of last semester."

With the semester coming to a close, Schroeder suggests, "We can only keep our fingers crossed until the fall."

Hernandez, Segal vie in ASB election rerun

The Associated Student Body election held last week has been nullified and rescheduled for Wednesday and Thursday of this week--yesterday and today.

Dean of Men Douglas Peterson, adviser to the ASB Senate, said the nullification was voted unanimously by the ASB election committee after it was noted the polls were manned only the daytime but not at night on either of the election days, Tuesday and Wednesday.

Peterson, who visited the polling area both nights to find no one there, said he was informed by ASB President Dave Schroeder that students assigned to man the polling place simply failed to show up either night.

Schroeder linked the nullification of last week's student body

election results with the fact there has been no quorum at the last couple of Senate meetings.

"Individual senators have been absent from recent meetings because they do not think their absence will affect a quorum," said Schroeder. He pointed out when two or three do it, no meeting is possible.

The only race contested on the ballot is for president. Mark Hernandez and Stephen Segal

seek the job. Running unopposed are Tyrie Bivings for legislative vice president and five candidates for nine Senate seats.

Two write-in candidates reportedly seek election as executive vice president, a spot for which there are no announced candidates on the ballot.

Polling hours are at 10 a.m. to 2 p.m. and 6 to 8:30 p.m., in the foyer of the Cafeteria.

COUNSELOR'S RAP

UC requirements may tighten-- gonna transfer? Shape up!

The University of California is recommending that, effective in the fall of 1978, transfer students whose high school GPA and course work made them ineligible for admission to UC as a freshman should be required to earn a GPA of 2.4 or higher in at

least 56 transferable semester units of college work.

This would end the experiment started in the fall of 1973 admitting transfer students with 2.0 GPA in transferable units regardless of their eligibility. So if you are planning to transfer to one of the UC campuses in the fall of 1978, keep that GPA up to a 2.4 or better to be on the safe side. If you have any questions concerning this new action, see me in SS-207.

--Mary Alice Easton

Have a talk

Would you like to learn more about yourself, about your aptitudes, interests and abilities? Many students have experienced a need for this kind of information and have found the answer in our own Career Center in the new Student Services Building just north of the Library. Stop by and have a talk with one of the staff in the Career Center. You will find them friendly and knowledgeable, ready to help you find some answers.

--Eric Rasmussen

Do it right

The red tape during registration can be a "hassle"--if you have not cleared financial holds, obtained counselor approval, verified California residency, applied for grade forgiveness, requested for evaluation of your records, checked on veteran rules, and/or applied for admission to FCC.

Visit the Student Services offices before August registration to help the process go more smoothly for everyone. The Admissions and Records office will be open from 8 a.m. to 5 p.m. on Tuesday and Friday, and until

8 p.m. on Monday, Wednesday and Thursday during summer session. Admissions counseling remains available on Saturday mornings, 8 to 11 a.m. through June 11.

--Stan Mattoon

TI major?

Don't know what to major in? Job markets seem to be all filled? Too many people in the area you're interested in? Well, have you ever thought about a major in the technical industrial field? Some of the best job opportunities today lie in the area of industry and technology. Outstanding salaries, working conditions, and fringe benefits are only a part of the benefits offered to qualified individuals. Come into the Counseling Center and talk with a counselor and find out more about the opportunities that await you.

--Adrian Acosta

This about wraps up the "Counselors' Rap" for the spring semester, 1977. We hope our readers have received practical benefit from the various contributions of articles members of the counseling staff have made over the past several months. You know, there is so much to gain by coming in and rapping with a counselor!

You owe it to yourself to reap the benefits of this professional help to promote your education and to learn of the tremendous opportunities lying ahead of you if you will avail yourself of sound, reliable and helpful advice you are bound to receive from your FCC counselor. Our thanks especially, to the Rampage staff and the space they have afforded us in bringing to the students our messages each week.

News Briefs

Happy three-day weekend, Rams

On Monday, May 30, no classes will be held due to the Memorial Day holiday.

ID cards

Students enrolled for the voluntary Students Accident and Sickness Medical Expense Plan may pick up their ID cards at the Health Services office, between 8 a.m. and 5 p.m. Monday through Friday.

Measles shots

Due to the epidemic of measles in the community, the Fresno County Health Department is conducting free measles immunization clinics from 9 a.m. to 3 p.m. daily, Monday through Friday, at the Health Department, 515 South Cedar Ave.

Immunization is recommended for anyone 12 months to 22 years of age who has not been immunized against measles (rebeola) and has not had the disease. For further information call your private physician or the Health Department Immunization Clinic at 488-3067.

Lot G open

Parking Lot G is now open to students displaying a general parking permit. There are

several stalls in Lot G that are still restricted. There is one handicapped stall painted blue, one row of yellow staff stalls and two white stalls for Police business.

Final film

Due to the cancellation of "Bringing Up Baby," the film scheduled to be the last in the classic film series "The Reel World," FCC will offer "It Happened One Night" May 26 at 7:30 p.m. in the Recital Hall. Admission is free.

"It Happened One Night" stars Clark Gable and Claudette Colbert in Frank Capra's 1934 classic. The film won six academy awards, including best actor, best actress and best picture. It is a funny and moving comedy about a fugitive heiress and a rebellious reporter who tames her.

The film is sponsored by the SCCC and the Office of Community Services.

Transfers

Transfer students who need information or assistance in transferring to four year colleges or universities may find it at the Supportive Services Center, SS-103 of the Student Services Building, on Tuesday and Wednesdays between 9 a.m. to 2 p.m.

Al Forres, from the Fresno Educational Opportunity Center, is assisting students with financial aid and admissions material.

Fulltime jobs

Permanent fulltime jobs are now available for graduates with good skills. Business majors, clerk typists, stenographers, and bookkeepers who may be able to work half days from now until graduation in June, and others interested in jobs, should contact the Placement Office in the lobby of the Student Services Building.

Summer help

Local employers are now hiring parttime help for students who are seeking summer jobs to continue throughout the summer and on into fall. Summer jobs are scarce this year, because some summer camps are not opening because of the drought conditions. Availability and dependability are the key factors in getting a good job to carry you through the summer. Students may contact the Placement Office in the Student Services Building.

BEOG

All students are encouraged to apply for a Basic Educational Opportunity Grant (BEOG) to determine eligibility. Students may obtain an application in the Financial Aid Office, SS-201,

then submit your Student Eligibility Report received from BEOG as soon as received, even if it indicates you are ineligible.

Piano recital

Eight piano students and one organ student will perform in a concert on Friday, June 3 at 8 p.m. in the Recital Hall. Works by Bach, Beethoven, Chopin, Debussy, Gershwin, Poulenc and Schumann will be included in the program. The piano students are Kathy Crump, Debbie Green, Susan Lânse, Deena Waits, Jimmi Smith, Denise Oyler, Helen Wolfe, and Barbara Flanigan. The organist is Stanley Bartsch. The students are under the

instruction of music teacher Alex Molnar.

Financial aid

Students wishing to apply for Financial Aid for 1977-78 may still do so. Submit your application as soon as possible. Application packets are available in the Financial Aid Office, SS-201, for consideration for BEOG, College Work Study, Supplemental Educational Opportunity Grant, Registered Nursing Scholarship, and Extended Opportunity Programs and Services. Returning students must apply each year.

DJ Eddings move ahead -- now in Sheraton Inn job

By Fonda Kubota

Kevin Lynn Eddings, a former City College student and current 18/KYNO disc jockey was recently named the director of entertainment and advertising for Fresno's Sheraton Inn . . . a beautiful place for beautiful people.

The atmosphere of the blue office room seems calm, different, and quiet — not like a radio station. There is no music, tapes to pick out, talking to the microphone, answering listener's requests or sitting in the glass control room for hours.

Eddings, wearing a silk flower shirt with creme color pants, talked over coffee about his new position and how he got interested in the entertainment field.

"Shortly after I left City College, I started to get in contact with the concert promoters in town and different people. I worked for them on a side basis."

Most of the promoters are from the Los Angeles and San Francisco Bay area. "It proved to be kind of hard to get here. Most of them are not familiar with the Fresno area of different outlets, which newspapers and what concert halls to put in what shows. I kind of advise them."

What does the director of entertainment do?

Eddings books shows for the

Las Vegas Room (holds up to 1,200 people) and the Crazy Horse Saloon. He handles the music selection for the Disco Lounge and other functions.

The following concert schedules are announced: June 19 - Ray Charles and Danny Marona, June 23 - Rick Nelson, July 7 - Freddy Fender, September 23 - Bonnie Nelson, August 8 - The Platters, and December 1 - Kingston Trio and the Limelites.

Eddings was approached by General Manager Howard Downes "to take over the entertainment and advertising department. I always worked with Decker when I was in radio."

"It wasn't a walkup type thing." He said he showed interest in working with the Sheraton Inn six or seven months ago. "I wondered if they had a position available for someone to coordinate concerts in town and choose the entertainment."

Eddings graduated in 1966 from McLane High, where he got his first DJ job at KMAK, and wrote news for Bob Lee in the news department. Later, he got a license and attended Fresno City College for a year, then transferred to San Francisco State for two years, where he majored in sales and marketing. He was drafted for the army in September of 1969 where he got into the national guards and studied electronics.

When he came back, he became a DJ for KLP (Rhythm and blues station) in Fowler.

Since he now works at the

Sheraton, he is on the air at KYNO on Saturdays 6 p.m. to midnight, and Sundays at 4 to 10 p.m. Eddings has been in the radio business for 10 years and with KYNO for a year and 10 months.

In the past, he helped out on some concert promotions, such as Billy Paul, Parliament Funkadelic now with Bootsy Collins, Curtis Mayfield, James Brown, Stevie Wonder, and promoters with the Warnors, Rainbow Ballroom, and worked with Larry Bailey of Get Down Productions, now known as Concert Express.

"This is a 24 hour job. I'm kind of in the learning stages, to get to know the different departments here, where at KYNO it's a set time," said Eddings.

"The work is not hard, but it gets hectic at times. The most interesting part is to talk to the entertainers about business."

For the first two weeks at his job, working during the day at the Sheraton and at KYNO at night was tough at first. "It was proposed at one time, that I could work two jobs. This job is not allowing me to do it effectively."

"Radio has been a lot of fun to me and I enjoyed staying in it, but now I don't think I won't be able to."

Eddings tries to book artists on a Tuesday and Thursday night instead of Saturday and Friday, because of so many things that happen. "The biggest thing for booking artists, I found out that their prices are high for entertainment on a one-night basis."

Kevin Lynn Eddings

Photo by Kip Smith

"Most of them are from the east—New York, Chicago. When they come out they have a certain number of days available to play in large cities. It's hard to get them in a good night."

Most of the concerts are in the

Las Vegas Room. "What we are trying to attract here is not the downtown theatre type. We are more towards the show room. People can sit down, have a drink, even dance. It's not a rock type hall."

Space turkeys? Zorko?

By Mark Hernandez

What do you do when the notorious Space Mongoose is on your tale?

"Why, you write the Space Turkeys into your script, and watch them blast the evil creature to atomic ring dust," says Dave Hall of Bazork-Zorko Productions. Hall, a former FCC student, co-created the topical "Turkeys In/From Outer Space" audio series, and described it in detail to an enraptured audience May 20 at Fresno State.

"We have to realize that humor exists, but the only way to succeed with humor is to find a new situation which humor explodes in," Hall explained, "and to find that humor, we must go into outer space!" The audience, puzzled, does not fully understand the statement until he pushes a button on the tape player, and "Turkeys" is played to them.

The series, an outer space situation comedy, deals with two members of the United Space Confederation, Captain Artemus Dorn, and his sidekick, Cadet Perservio Stemmish. With the aid of Commander Roscoe P. Horowitz, an aging officer who is in charge of the USC, the two 'Space Turkeys' find themselves in a galaxy full of villains. But who are these villains?

"Well, we decided that to have the 'Turkeys' battle phony villains would take too much time, so we based them off real people," Hall stated. "Our first episode dealt with an evil Doctor Nixeous Millenious, based off of a former President of the United States. In our current series, we deal with Moonies and scientists."

An avid film-goer, Hall attributes both films and records to his irresponsible humor. He lists the Firesign Theatre as one of his

favorite groups, and enjoys listening to jazz and film soundtracks. "There is so much music in the soundtracks that people are often unaware of. It takes a keen ear and a steady turntable to listen to that kind of music, and still appreciate it." Often, while watching some of his own films, music that is very familiar winds its way through various scenes. Admitting that he does use soundtracks to enhance his own, Hall stated that it is difficult to use anything else and still achieve the mood he tries to set.

Hall started his film career around 1961 with a neighbor. Then, in 1973, he enrolled in instructor James Piper's film-making class. Once behind a camera, Hall filmed a short feature, titled "Men In Black," which Piper still shows to his classes. "I remember him quite well," said Piper. "He did some excellent work." Hall still attends the annual student film festivals at City College.

Becoming interested in tapes was his next major move. Starting with a small battery tape recorder, Hall produced a number of small programs until his stay in the Air Force introduced him to multi-track recording. This has prompted him to produce a number of the most sophisticated radio shows produced, the best of which is a detective series titled "Ceter Pith." The productions are now in the fourth season.

It was this fourth season that began pushing Hall closer to "Turkeys." On May 24, 1976, Hall and a friend were sitting in a Denny's Coffee Shop, when the idea struck them. "See, we had just ordered two French dips, but when we got them, my friend noticed that the dip was only water and grease. That's not how they are supposed to be

made," Hall remembers. "While we were making jokes about the food and service, we started talking about diversifying the shows I had produced. Suddenly, it dawned on us that no one had ever produced a sit-com (situation comedy) in outer space setting."

After they finished, Hall and his friend went home and produced the first chapter of "Turkeys." His friend, who prefers to be known only as "Zorko," said it was amazing. "We had no idea what to do, so we just wrote it and recorded it. We had also intended that this be the only one, so we put them in a totally impossible problem with no solution." But that was not the end of it.

Playing it for a number of people, Hall and Zorko began to realize that what they did was very popular, and so the series continued. In fact, popularity is so high, that a film has been proposed for theatre release in late 1978. "The film will be impossible to produce," commented Hall, "but we're going to do it anyway."

Hall has already spent 120 hours preparing the soundtrack, and, in addition, to six months of pre-production work, the film needs only be shot and edited.

"The success of the series has stunned us both," Zorko declared, "but we really haven't gotten anywhere with it in Fresno." He explained that Station KFTG had been contacted about playing the show, but that plans fell through when the station changed owners. "It is controversial comedy, but it is still full of good humor."

What will happen in the near future? The two don't really know for sure. Zorko admits he is a Fresno City College student, and plans to take Piper's filmmaking class "to learn the

Space Turkey

NASA Photo

finer points of cinematography." Hall, when not writing, is a professional cameraman and video operator for a local firm and is merely "considering the future" himself.

Having produced an insane comedy is one thing, but carrying it on is another. Asked about long-range plans, Zorko smirks and says, "We'll just have to see where Dorn and Stemmish go. And then we have the comic book."

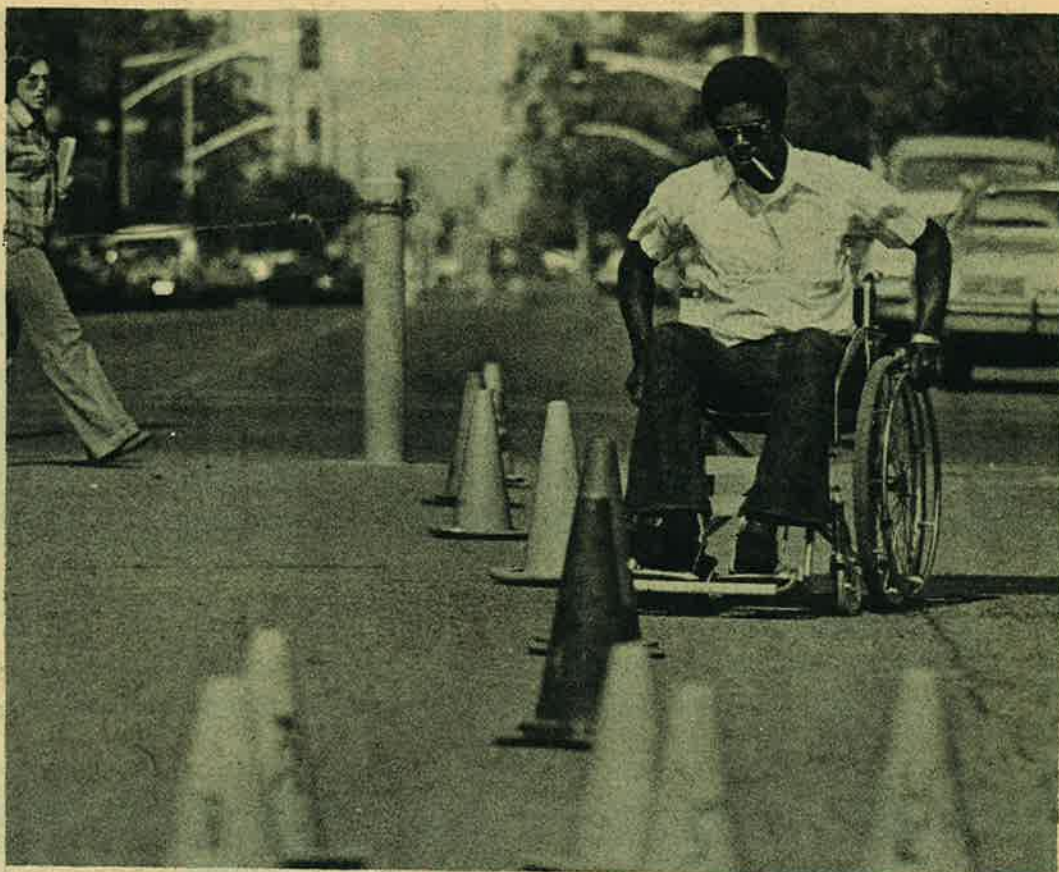

Comic book?!

Hall replies, "Sure! Every great movie has at least one comic book drawn about it." He explains a local artist is preparing preliminary sketches for submission before actual publications come out.

Hesitating, I slowly drop my pen down, afraid to ask about toys and dolls, but at least know that humor finds its way into everything. . . even outer space.

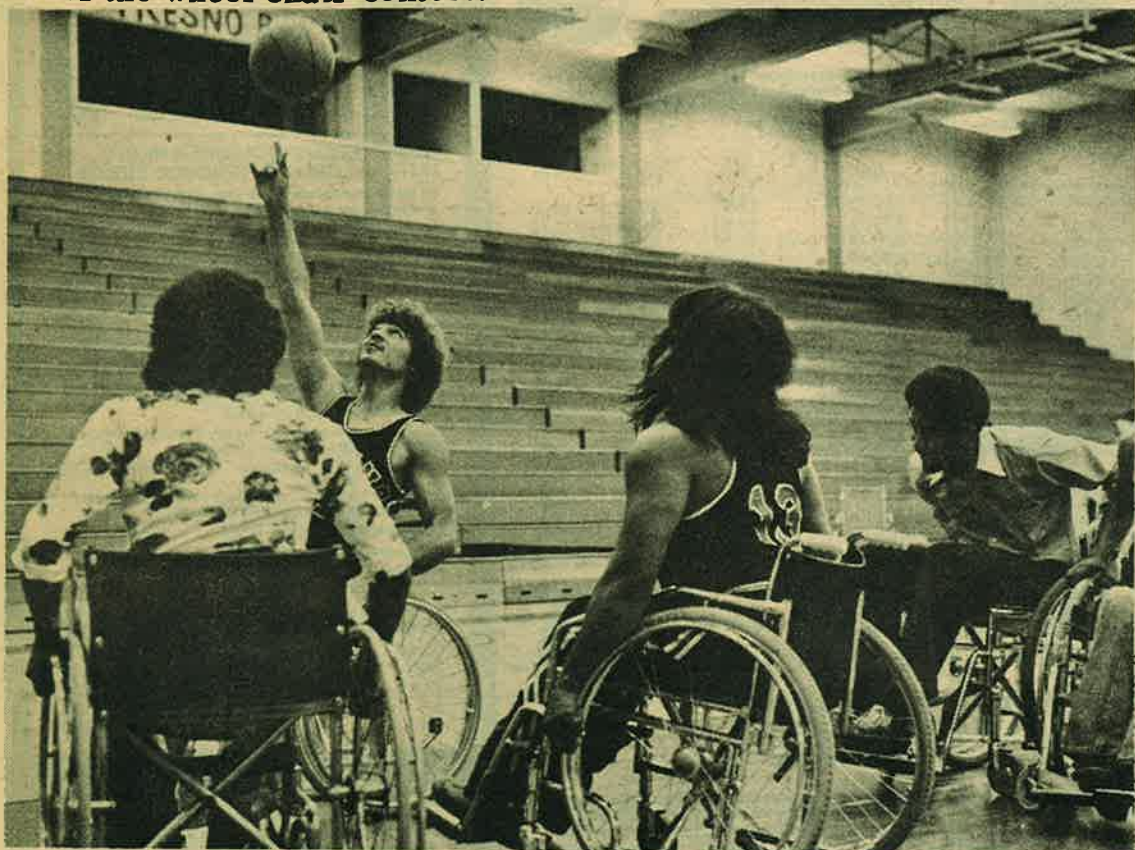

Joe Ozier gives the rules to a student of the wheel chair contest.

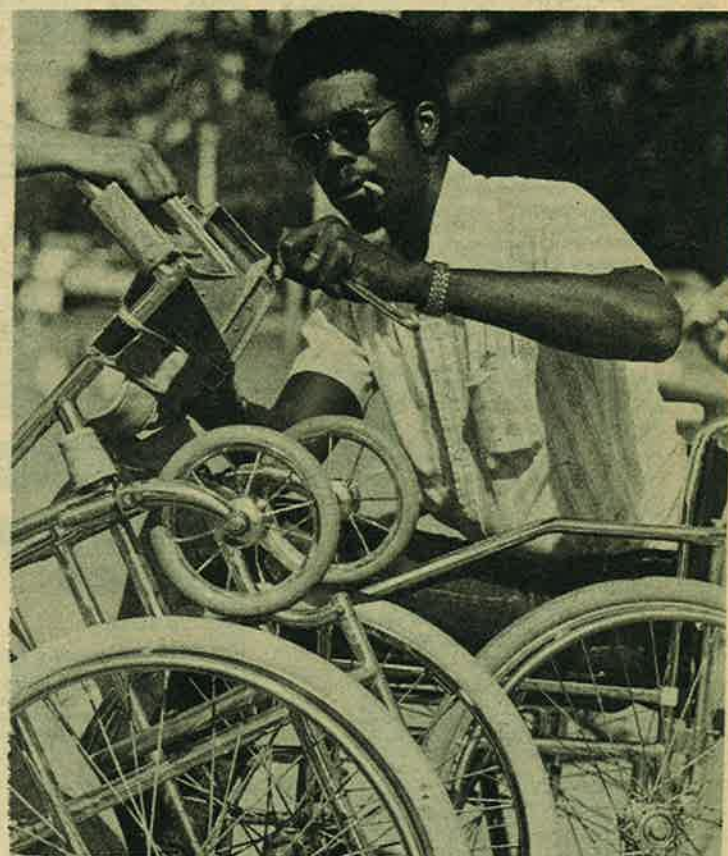

James Burris goes through the obstacles.

'Awareness Day' opens eyes of non-handicapped

By Annabelle Waldman

You pull and pull on the door. Finally, you get it open a few inches. You can't make it. You can't get it opened wide. It weighs a ton, you think. You can feel frustration building up inside of you. A fellow student comes along and gets it open, and holds it for you.

You want to go to the cafeteria. There's a ramp. You push and push on the wheels of your chair. You can feel the muscles of your arms pulling and you know that tomorrow your shoulders will ache.

This was the experience of Joline Wasemiller when she rode around the campus in a wheelchair last Friday on Awareness Day.

"The door at the Student Center was impossible to open," she said. "and the soap and faucets in the restrooms were too high. Everywhere there was a problem."

Wasemiller works in Job Placement for the handicapped at FCC. "Next year," she said,

"there will be classes for job readiness and interviews with possible employers, plus skill and aptitude tests."

Linda Hallum, CSUF graduate, is assisting Wasemiller, working part time for her internship.

Chuck Keller, Adaptive P.E. director, participated in a lively basketball game in the Gym. Keller is an energetic 27 year old, full of enthusiasm and love for his job.

"It's fun," he said. "We have a good time. We beat Santa Rosa last week, 47 to 22. On June 18, 19 and 20 we will be in the Nationals at San Jose."

"You know," he said, "lots of people don't know that there are olympics for handicapped. The last one was held at Montreal, Canada. These olympics are held at the same time as the other Olympics."

Keller was chosen for Adaptive P.E. director over many

other applicants. Before coming to FCC he was P.E. director at San Jose State, West Valley College at Saratoga, Calif. and Physical and Adaptive director at the College of Alameda.

"I like Adaptive P.E. the best," he said. Keller puts in a 10 to 12 hour day. "You have to," he said, "with any new program. Besides, I'm having a good time." This was evident, as he jumped into a wheelchair and back into the basketball game.

James Callahan, retired president of the Friendship For the Blind, is now serving as Public relations man for the center.

"There are around 2,500 blind in the county," he said. "We have a professional staff who go to the homes to assist the blind."

Friday, the group will be bowling at the Blackstone Bowl. "Some of our members bowl around 170 and 180," he said.

Clayton D. Turner, the well-known artist, who paints by mouth, brought a beautiful selection of his drawings.

Turner was born in Oklahoma

and came to California when he was 10 years old. In 1949 he was injured in a swimming pool accident. Three years later he began to draw, and from the beginning his love for horses and the old west was apparent in all of this art.

"My favorite place to work is Palm Springs," he said. "I love the desert. I love its solitude, and there is quite a big art colony there."

Turner operates the "Hard Times Gallery" at 5707 East Jensen in Fresno, where he displays his own artwork, as well as glassware and antiques.

Within a year or two, the old St. Agnes hospital will be converted to a handicapped facility, according to Janie Eitzen, chapter member of the Fresno County Chapter of the California Association of the Physically Handicapped, known as CAPH.

"We are just waiting for the money to be funded," she said. "The Board of Supervisors is in favor of it, and we don't

anticipate any problem. We really need it, because where an apartment costs the average person \$200 a month, an apartment for a handicapped costs around \$400."

What changes would Eitzen like to see in public buildings?

"Doors with no more than an eight pound pull."

"Lower sinks and tilted mirrors in the restrooms."

"Level ramps. Room to turn around. It takes six feet to turn around in a wheelchair."

"Apartments equipped for a handicapped at a reasonable rent."

Marlyce Wall, FCC freshman, helped with the timing in the wheelchair obstacle course.

"I tried the course myself," she said. "and going backward and turning around was hard. I thought my arms were going to fall off."

Did this experience today make her more aware of the problems a handicapped person faces every day?

"It sure did," she said.

DISCOUNT TIRE PURCHASE PLAN

TIRE SYSTEMS INC.® GROUP DISCOUNT WHOLESALERS

One of the West's oldest and strongest Group Discount Wholesale Purchase plans, presents you with this confidential pricing schedule.

TSI Facilities Not Available To The General Public
This Special Plan Available Only To Members Of Participating Groups

FRESNO CITY
COLLEGE 8167
PERMANENT MEMBER

Present this permanent membership card at any TIRE SYSTEMS INC. warehouse as identification which will entitle you to special wholesale warehouse buying privileges on the purchase of tires, batteries, shock absorbers and other products as available. See page 4 for locations.

CLIP AND SAVE

- **LOW WHOLESALE PRICES** mean dollars saved on tires, batteries, shock absorbers, mag wheels. Factory direct railcar purchasing, low overhead wholesale warehouses, and high volume bring about these continuing low prices.
- **NAME-BRAND TIRES.**
- **PREMIUM ‡ AND 1st LINE TIRES** — backed by industry leading workmanship, material, road hazard, tread wear service policies.
- **FULL SERVICE INSTALLATION CENTERS** — Tire mounting/balancing/truing — front-end alignment/service work — brakes — tune-ups.
- **FREE TIRE MOUNTING*** — TSI Customers.
- **PRODUCT WARRANTY INFORMATION AVAILABLE FREE** at any TIRE SYSTEMS INC. WAREHOUSE

STEEL BELTED RADIALS

Steel Belted Radials

"The Gas Saver"

*FREE TIRE MOUNTING

Compare these important BENEFITS of our steel radial:

- **FULL STEEL BELTS** — up to 6.4 inches wide steel PROTECTS entire tread area, not just a narrow center steel belt.
- **PERFORMANCE CHAMPION** — Radial design offers responsive steering control and increased GAS MILEAGE. Lower heat factor gives longer tread life.
- **STYLISH COMFORT** — Built riding POLYESTER cord body. Popular tubeless whitewall design. Exclusive "variable pitch" tread design.
- **EXCLUSIVE WARRANTY** — \$8,000 and \$5,000 mile tread wear policy plus NATIONWIDE lifetime workmanship/material, road hazard policies.

Student poll

"What was your most memorable experience here at FCC in the spring semester?"

By Steve Paliughi

Photos by Eusevio Arias

'Memorable experiences' recounted

Tom Wolfe—"Probably the registration. The first time was pretty bad. I also remember the help I got from the Counseling Center."

Priscilla Medina—"Making it as far as I did. Getting to class on time."

Melody Parker—"Trying to get to class on time with the weather so nice."

Marshall Chun—"This semester was not too exciting. I don't have an opinion."

Cindy Hernandez—"Some of the discussions I had in my speech class."

William Bell—"I remember Easter vacation because I went out of town."

Mary Hilt—"I remember the Indian dancers during Indian Cultural Week."

Charles Harshaw—"The whole semester was an encounter for me. I don't have a special memory but I really enjoyed it all."

College art gallery needs help, money to reach goals

"Man does not live by bread alone."

Or, whatever happened to the project Art Gallery in the new Art-Home Economics Building?

This question brought a look of wistful resignation to the face of C. Dean Draper, art instructor.

"We have been waiting two years for a director, or curator, but nothing has happened," he said. "I have been displaying work in the Library and hallways all at my own expense and time."

"We need a fulltime director who knows what he's doing," he added, "one who can run the gallery properly."

College President Clyde McCully made a request for a gallery director on December 21, 1976, but was turned down. In the request Dr. McCully stated, "Appropriately staffed, the presence of the gallery on the college campus represents an important opportunity for the college to establish itself as a community cultural center."

McCully said, "There just isn't enough money available at this time. The ADA is down this year, and this brings a slowdown

in the amount of money we receive from the district.

"We are all for a successful art program," he said, "and I think we have a good one, perhaps one of the best. We wouldn't have spent so much money for an art building if we didn't intend to have a good art department."

"But," he added, "there isn't enough money to operate the gallery at this time."

McCully said he didn't know when the money would be available.

Kent Steadman, art instructor, said "We have held exhibits in the Library, but have had a lot of theft and damage. We will need security and insurance, as well as a good director."

"Other colleges have successful art galleries, why can't we?" he asked.

Rodney Krueger, art instructor, said "Many colleges have classes in art management and there is a lot of opportunity for employment as curator. Gallery management is a good profession."

"The public," he added, would take more interest in the college, and a good art gallery would

attract art groups from all over the state."

In his request for a curator, McCully wrote:

"The new gallery at Fresno City College is envisioned as a community resource, and as an instructional facility. The gallery might also sponsor such community events as receptions, lectures, movies, demonstrations, competitions, art sales, rentals, and tours."

"By using community resource people on the advisory committee it would be possible to directly involve the community in such a way that the campus gallery, with its central location, might become a cultural asset to the whole community."

"Such use," the request continued, "would also favorably address the civic center aspect of the community service program, which posits that the college should 'become a center for community life' through public use of its facilities."

Krueger summed it up this way. "If something isn't done with the art gallery soon, it will just wind up as one more classroom."

Library wants books returned by June 1

The final due date for Library materials is June 1 (although books may be checked out on an overnight basis only through June 10). Because the Library staff will be conducting a complete inventory June 13-17, it is particularly important that books be returned promptly, a spokesman said.

The circulation department usually mails three overdue notices to patrons with overdue materials, but to provide service to the end of the Spring semester, there will be time to mail only one notice.

Students who have not returned materials due June 1 by June 6 will have a hold placed on their records. This hold prohibits the issuance of report cards, transcripts, or registration for classes.

Once a hold has been placed on records, the student is charged a \$1 hold fee in addition to the Library fine. Since issuing a hold requires considerable time and effort for the Library and records staffs as well as additional expense for the student, please make every effort to make sure your library record is cleared before June 8.

Board looks at sports

Planning to review the structure and regulations of inter-collegiate athletics in 104 California Community Colleges, the Board of Governors of the California Community Colleges, with Chairman Thomas M. Jones presiding, will meet in Sacramento, Friday, May 27.

During this meeting the board also will consider a recommendation to give the Board of Governors authority over inter-collegiate athletics, through

amendments to a bill. The bill, carried by Assemblyman Gary Hart, would give the California Community and Junior College Association rule-making authority and jurisdiction over athletics. The board's legislative committee also will recommend that the board have ultimate responsibility for activities.

The board also will consider a proposal to add a voting student to the Board of Governors.

Eddie Tate bites the dust in the triple jump

Four Ram trackmen head for state meet

"I don't know about winning the state meet, but we'll score some points." That is the way track coach Ken Dose describes the Rams' chances in the state track meet to be held Saturday in Bakersfield.

Four Ram tracksters survived tough competition in the Northern California meet to secure spots in the state meet. The athletes had to finish in the top four positions in their events to qualify for the state meet. The four qualifiers were Al Lara, Stan Reyes, Eddie Tate and Anthony Washington.

Lara came in second place in the 5000 meter run with a time of 14:49.2. Reyes cleared 15-6 in the pole vault to capture third.

Tate overcame an injured ankle to jump 50-0 in the triple jump, good for fourth place. Anthony Washington placed third in the 120 yard high hurdles with a time of 14.4.

Besides the four who qualified, FCC had four athletes who ended their season at Pleasant Hill. Ron Horn cleared 6-6 in the high jump, but reinjured a leg muscle doing it and had to settle for eighth place.

Jose Renteria finished eighth in the steeplechase, Dave Shepard claimed ninth in the pole vault, and Tony Williams was ninth in the discus and seventh in the shot put.

Fresno came in 10th in the team standings with 24 points. Some 35 schools from Northern California competed.

Dave Coulson

First year since '66, no major sports titles

If one of the Ram's more faithful fans had been gone for the 1976-77 sports season he would be surprised on returning to find out the Rams hadn't won the conference crown in any major sports this season.

So why, you ask, would he be surprised? Because FCC has won conference honors in at least one major sport every year since 1966. So why none this year? There are probably many reasons, but this article will just focus on some of the more obvious ones.

In football, the Rams lost a controversial game to COS that made the difference between first and second place. So with this, one question arises. Why does the Valley Conference continue its practice of getting local people to officiate local games? It is obvious that this type of system creates biased officiating and it needs to be changed. Why not have an official from each area represented in a contest share in the officiating?

So what about the basketball team? The basketball program has been having problems for a long time and this year was a reflection of it. With the quality of play put on by the local high school teams, why can't we produce a winning team? If new recruiting methods are needed to turn it around, then something must be done to accomplish it.

As for the baseball team, what can be said of a team that had a winning season in spite of playing with a team composed of mostly freshmen? They played in a way that gives you a good feeling about next year. But still, the coaches must recruit freshmen for next year to prevent a relapse in two years.

The track squad was lucky to do as well as they did. Without the help of out of state transfers the season could have been a disaster. The track coaches must not let themselves get complacent with past victories, but should make strong efforts to recruit new talent.

This is not to say that all was bad for the Ram sports program this season. The wrestling team proved they were the valley's best by taking first in the conference. And the golf team, both players and coaches, should be commended for coming in third in the state.

But it's the major sports that the public notices, and that's where the Rams have slipped. If the Rams wish to regain athletic supremacy in the Valley Conference they must not rest on their past laurels.

For FCC to return to its former position it is going to take work. Every year all the other schools in the conference improve themselves. One question holds the key to the results of next season. How much work are the coaches and athletes willing to put out to make FCC No. 1 again?

Moranda signs; another Ram hurdler on way to top?

For most athletes the thought of signing a pro contract is a dream, but for FCC's Dean Moranda it's a dream come true.

Moranda, one of the Ram baseball team's most successful pitchers the last two seasons, signed a contract last week to play in the Minnesota Twins organization.

The 6-0 tall 185 pound lefthander has been assigned to play with the Visalia Oaks of the California League. He will report to the Class-A team when the school year ends.

Moranda was the pitcher whose one-hit shutout of Modesto in the Valley Conference Playoffs clinched the championship for the Rams last year.

He is the eighth FCC baseball player to go to the pros. Other prominent pitchers include Tom Seaver, Dick Selma and Jim Maloney.

IM archery tournament

The intramural archery tournament will take place Friday at 10 a.m. in the north field behind the Gym. Spectators are welcome.

Coast mayor says 'Blacks are in trouble because don't know it'

By Lori Eickmann

"I think there's a need for black people to talk to each other, unite with each other. We need to continue to fight for liberation."

So said Gertrude Wilks, mayor of East Palo Alto, one of several guest speakers on campus this week for the Afrikan Umoja Festival.

Wilks spoke yesterday at noon in the Theatre on "Becoming Self-Sufficient."

Wilks, 50, also is the founder and director of the Nairobi Day School, High School, and child care centers in East Palo Alto. She is in her third term as mayor.

When asked why she went into

politics, Wilks replied, "I felt that was a way to get things done. I saw a lot that needed to be done—and it's best to do them yourself."

In East Palo Alto, Wilks has helped organize black unity festivals. She says of her people, "We are in the worst position now we ever have been in throughout history, because we don't know we're in trouble. The slaves knew they were in trouble, and they did something about it."

Wilks also spoke informally to a group of about 20 black women on Wednesday. "What can we do on this campus?" she asked. "What have we decided today?

What have we learned?"

"Well, you shouldn't wait for someone to lead you," one young woman began. "We should help ourselves."

"And we should help each other," added another woman.

In a quiet voice, Wilks responded, "I want you always to remember that."

The festival, which began Tuesday, will conclude tomorrow after a full schedule of speakers, song, dance, and poetry presentations, and a karate exhibition. The last event will be a dance with the band Essence of Life. Admission is free.

All of Friday's events will take place in the Student Lounge.

Datsun accepted by auto department

In an effort to promote educational and industrial relationships for increased service to the community, Nissan Motor Corporation in South San Francisco has donated a Datsun and

components to the FCC automotive department.

Godfrey Leon, automotive instructor, said this also will help with studies programs with foreign and import cars started at FCC.

FCC instructors receiving the car in south San Francisco are: third from left, Godfrey Leon, middle (receiving keys) Bob Andrews, and third from right, Shaw Hiroyasu.

Singers, dancers, crew needed for summer 'Guys and Dolls'

Tryouts for singers, dancers and technical help needed for City College's summer production of "Guys and Dolls" will be held June 7 at 7 p.m. in the Theatre.

The musical requires a large cast and people from all age groups. Rehearsals will begin June 20. Seven performances will be given between July 20-26. Characters include Sky

Masterson, a gambler who'll bet on anything; Sarah Brown, the Save-a-Soul Mission lady who falls in love with Sky; Nathan Detroit, the colorful proprietor of New York's "oldest established permanent floating crap game"; and all the others including Nicely-Nicely, Big Jule, Harry the Horse, Angie the Ox and more.

Dr. LeGrand Andersen will

direct the show. Tim Quinn is the technical director and in charge of set design. The production's music will be under the direction of Gil Rodriguez.

"Guys and Dolls" is the second summer show from FCC. Last year "Oklahoma" was produced. For further information see Dr. Andersen or Quinn.

Adaptive PE classes offered for summer

Adapted physical education classes for students temporarily or permanently disabled are being offered by City College during the 1977 summer session as part of a rapidly expanding Adaptive Physical Education (APE) program.

City College currently offers two Adaptive PE courses and plans to expand the fall schedule to include 10 APE courses and possibly 15 by spring.

During the summer session the courses being offered are Adaptive Swimming, Wheelchair Basketball and Adaptive Weight, Gait and Balance Training.

Instructor for the APE program is Chuck Keller, a recently-hired instructor who has a master's degree in physical education with an emphasis in adaptives and exercise physiology.

Keller said, "Disabled students coming into our program are usually very much in a shell and when they get involved with our classes they develop physiologically, psychologically and sociologically through the interactions of their course work, the individual assistants and their disabled classmates."

The important thing, Keller emphasizes, is that the students will receive one-to-one assistance and instruction. Each student is individually evaluated and given his own exercise program to insure maximum benefit of the

course.

Keller is enlisting the help of physical therapist Tom Northey in the weight training program and Dick Thomas, former member of the U.S. Wheelchair Olympic basketball and track teams, in the wheelchair basketball class.

This summer, Adaptive Swimming is offered from 10:10 to 11:15 a.m. daily. The hydrotherapeutic class is designed to increase strength, endurance and range of motion. Keller said most of the disabled students find the course particularly appealing because the buoyancy of the water gives them a sense of freedom not experienced on land.

Wheelchair Basketball, offered from 10:10 to 11:15 a.m. daily, co-instructed by Thomas, teaches basic and advanced basketball and wheelchair mobility skills and will be the nucleus for developing a wheelchair basketball team at FCC.

Weight training is offered from 11:30 to 12:35 p.m. daily. Individual weight programs developed from individual evaluations and doctor's recommendations benefitting the student's particular needs are employed. APE aides help each student.

Keller said this course is very beneficial for virtually all disabled, whether temporarily or permanently.

1212 E. BELMONT (west of San Pablo)

ASB Senate's role needs protection

Last week, an editorial concerning ASB activity was withheld from publication by the editorial page director and the Rampage adviser, owing to a number of challenged issues pointed out by the ASB adviser. Those challenged issues now researched, it is difficult to change the content of this week's version.

The ASB elections this year were not publicized by the Rampage for a simple reason: The Rampage could not obtain the names of the candidates until after presstime. According to the ASB adviser, Douglas Peterson, a policy of withholding candidate names for release had been established in the fall of 1976. The rationale for this action was to "protect the students from being exposed to the names of unqualified candidates."

This affront to the right to know was finally breached after three Rampage reporters called Peterson's office constantly, and managed to obtain the candidates' names before qualifications were checked.

This all points up a very interesting situation: Secrecy of actions in regard to ASB. This charge can be leveled fairly at both sides, administration and students; but on the basis of consistent action, the administration must take top honor.

The most interesting of these was a formerly listed account, titled the "Administrative Guest Fund". As it was discovered last year, this fund had been set up with ASB monies so as to provide Dr. Clyde McCully, FCC president, with a sort of expense account for visiting guests. However, since last year, no administrator has given any indication of what year this occurred in, nor any documents proving that any ASB officer authorized such a transfer of funds. The only evidence given is a statement to the effect that "a typewriter was stolen, so we reimbursed Dr. McCully for ordering one for ASB."

Another facet of this controversy is, again, the spending of student body funds. Although no determination has yet to be given in a court of law, I did consult one attorney who referred my attention to a number of court cases in the last two years. These cases, in California and other states with similar laws, have all determined a student signature is mandatory for approving the release of student funds on an individual basis. That is, for each and every expenditure. But, again we must stop and understand that each new situation can breed a new decision, although a weighty precedent is established. The administration of this college only recently allowed the ASB treasurer to authorize funds before expenditure (February, 1976).

The other intriguing point was brought up by the previous editorial, and punctuated after a meeting with Dean Peterson.

A claim that administrative interference was a potential and real hazard to the continued function of ASB as a democratic organization was made, denied, and proven this week. At the close of the Spring '76 semester, a former ASB president was removed from office, and, before appeals proceedings were completed, reinstated to the office by Dean of Students Merle Martin. According to Peterson, Martin had done this on the same day as the Constitutional Appeals Committee voted. Yet I find it difficult to accept the June 3, 1976 date of Martin's order and the June 6, 1976 minutes date for the Appeals Committee as the same day.

True, Peterson could have been mistaken, but this brings up another point: Isn't there a sort of moral responsibility for a student government adviser to support their actions unless these actions are contrary to a campus code? Further, shouldn't that same adviser notify the students that the irregular actions might be opposed or nullified? Dean Peterson has done this in the past, and I certainly hope he continues in the future.

I call upon not only the students, but Dr. McCully as well, to better define and protect the individuality of the administration and student body, for these invasions of authority serve only to reduce respect and promote tension...and that could be the worst thing to happen.

By Mark Hernandez

Letters Policy

The Rampage welcomes comments from its readers. Letters should be typewritten and double-spaced. Letters must be signed by the author, although pen names may be used at editorial discretion. All letters will be corrected to Rampage style.

Submit material to SC-211 no later than the Monday before intended publication.

LETTER

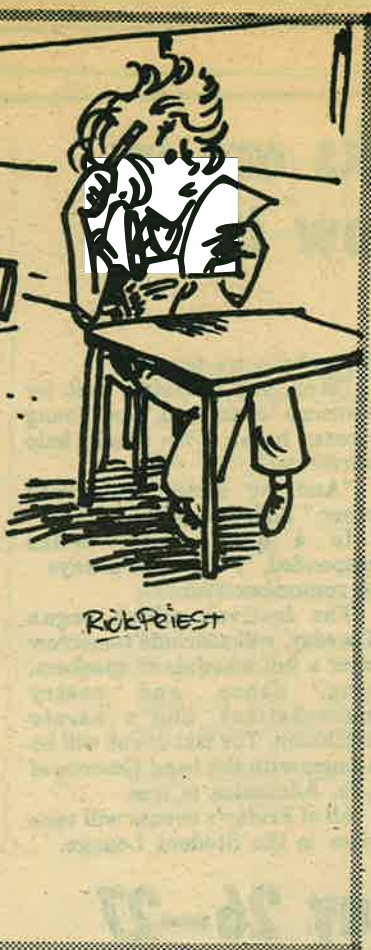

Your neighbor a hit man?

Israeli fear of a Palestinian state on the West Bank of the Jordan has been explained before. People still do not understand.

If Israel allowed the PLO,

their mortal enemies, to move in next door, it would be like allowing a hit man to be your neighbor when you know there is a contract out on you.

Robert Kirsch

"GOOD LUCK WITH THE FINALS NEXT MONTH."

ALBUM REVIEW

Fleetwood Mac scores again with new LP album 'Rumours'

By Roger Lucio

Fleetwood Mac
"Rumours"

Fleetwood Mac undoubtedly has another "smash" LP with their latest release, "Rumours." "Rumours" contains what would be called "soft rock," a good combination of British-American sound.

There is nothing "extra" about Fleetwood Mac as some of the music groups of the time. They produce good music. Although having been around the recording scene awhile, their latest LP

releases, which include "Rumours," have brought them acclaim and much popularity.

Mac is a combination of two females and three males working together to bring out music very much their own style. "Rumours" is rock you can sit back, listen to and enjoy.

They dote on vocals, but with good reason. With three vocalists as talented as Buckingham, Nicks, and C. McVie it is understandable. The vocals on the album are mellow yet spirited. Their musical style on the LP does not switch much.

Good cuts off the album include, "Second Hand News," "Dreams," "Go your own way," off side 1. Side 2 includes "The Chain," "You Make Loving Fun," "Oh Daddy" and "Gold Dust Woman."

The Fleetwood Mac ensemble is John McVie; bass, Lindsey Buckingham; guitars, vocals, Mick Fleetwood; drums, percussion, Christine McVie; keyboards, synthesizer, vocals. (Album courtesy of Tower Records.)

New seats for stadium are still a season away

New seats for Ratcliffe Stadium will become a reality but probably not before the 1977 football season.

The State Center Community College District Board of Trustees last week approved preliminary plans to replace all seating between the 10-yard lines on both sides of the stadium.

Architect Richard Simpson said, however, the project probably could not be completed prior to the start of the football season in September and that the district, therefore, would most likely defer starting the project until after the grid season.

The project will include new

aluminum seating for 7,780 seats and upgrading the balance of the seating in the 13,200 seat stadium with refurbished wooden seats.

The project also calls for new guardrails, handrails and grab-rails and ramps for handicapped spectators. Construction cost is estimated at \$217,600.

Bill Chester, SCCC facilities planner, told the board that the district and Fresno State University officials are currently negotiating to have the Bulldog boosters box on the east side of the stadium closed. Trustees inspecting the stadium this week declared the seating box both

unsafe and unsightly. One trustee suggested the university assume liability for the box if CSUF insists it remain open.

A new locker room and shower under construction at the stadium is expected to be completed by the start of the football season. Construction of new public toilets on both the west and east side of the stadium is planned to begin in about two months with completion expected during football season. Construction of new lighting for the football and track fields, to begin soon, is not expected to be completed by the beginning of the grid season.
